INNOVATION

Lufthansa Technik is synonymous with innovation. Thanks to creative engineering work and cutting-edge research facilities, we constantly set new standards. Alongside the continuous further development of maintenance, repair, and overhaul procedures, we develop new technologies, cabin products, and servicing processes for aviation. Always striving for the highest quality and safety standards, we are able to guarantee technological excellence.

More mobility for the world

Four decades of innovation and efficiency.

Cavotec helping to improve sustainability

Tarmac congestion. Pollution. Cable clutter. Long turnaround times. These are what inspired us to develop our unique underfloor ground support system. It consists of pop-up units located near or under parked aircraft – and can be connected to an underground tunnel, for truly efficient delivery of power, air, fuel, water and other services. The result?

A cleaner tarmac, cleaner air, and a big increase in productivity.

Cavotec's Airports Market Unit is a complete ground support equipment (GSE) manufacturer and integrator for the global airports sector.

We are present in the GSE market through Cavotec Fladung, Cavotec Dabico, Cavotec INET and Cavotec Alfo.

16 EDITION
Aviation Guide
Year Book 2016
EMERGING MARKETS
Middle East ✈ Africa ✈ South Asia
The First & Only
B2B DATABASE
WHO'S WHO
Released Dubai Airshow 2015
www.aviationguideem.com

We extend a warm welcome to all our esteemed readers, patrons and advertisers to our 16th edition of Aviation Guide - Emerging Markets Year Book. It is with immense pride and joy we share with you all our completion of 15 long, successful years of this yearly guide book.

Into its 16th year now, the Aviation Guide has evolved as an authentic source of information on the aviation industry in the Emerging Markets of the Middle East, Africa and Asia.

The emerging market economies in the Middle East, Africa and Asia are witnessing dramatic changes in the air transport industry. Moreover, the Middle Eastern region has registered the highest rate of growth in passenger and freighter traffic as well as aircraft movements. As the first and only comprehensive resource for the rapidly growing aviation industry, the year book provides first hand information and insightful thoughts on various aviation sectors.

We take this opportunity to thank everyone who provided us the valuable information for the 16th Edition of Aviation Guide. We would like to thank especially our patrons, advertisers and our readers for their constant support, co-operation and encouragement. Errors or omissions that might have occurred in compiling this voluminous edition, if any, are regretted. We welcome ideas and suggestions to enhance or add value to the publication.

Aviation Guide™

EMERGING MARKETS

Middle East ✈ Africa ✈ South Asia

Year Book 2016

Editor's Note

Despite the current economic uncertainties, expected demand for connectivity, especially air transport remains strong. And that is good news for the global aviation sector. Growing air transport links not only generate jobs, but also underpin economic growth in all economies. In order to help aviation flourish, Governments needs to recognize the sector with policies that do not curb innovation, promote tax regimes that do not punish success and foster investments that enable infrastructure to keep up with growth.

Aviation Guide- Year Book Emerging Markets remains the region's premiere B2B directory and reference guide dedicated to the ever expanding aviation market in the region in specific and globe in general. Into its 16th edition now, the Aviation Guide provides its readers up-to-date, in depth news and analysis, interviews and features on aviation industry in the Emerging Markets of the Middle East, Africa and Asia.

From airports to airlines, MROs, FBOs, aircraft manufacturers, airport suppliers, consultants and many more pivotal divisions, our readers can easily access a wide range of information. The sections in each division include 'Whos Who' of the industry, Women in Aviation, Corporate Profiles, Features, Industry insights and business listings.

As more and more passengers are travelling to and via the Middle East region than ever before, the Middle East and the Gulf states are investing billions of dollars to build new airports or expand existing facilities. Middle Eastern cities such as Abu Dhabi, Dubai and Doha are racing to develop the biggest transportation hub in the region to meet this growth in air travel. The International Air Transport Association (IATA) estimates that around US$40 billion is being invested in airport infrastructure in the Gulf region alone. Dubai alone is expected to invest over US$8.1 billion in Al Maktoum International in order to cater for the influx of visitors during Expo 2020. The region's desire to be a global hub, and the uncapped business and leisure passenger demand that helps fuel it, is exerting pressure on an already saturated aviation network.

In the bid to develop the global superlatives, regional airline carriers such as Emirates, Etihad and Qatar Airways are racing for market share. Dubai recently surpassed London Heathrow as the world's busiest airport; Abu Dhabi's mid-field terminal occupies seven million square feet – that's larger than the Pentagon and Doha's recently opened Hamad International Airport that boasts the world's second longest runway.

IATA released an industry traffic forecast which predicted that airlines were expected to welcome some 3.6 billion passengers in 2016. That's about 800 million more than the 2.8 billion passengers carried by airlines in 2011. This industry consensus outlook for system-wide passenger growth sees passenger numbers expanding by an average of 5.3% per annum between 2012 and 2016. The 28.5% increase in passenger numbers over the forecast period will see almost 500 million new passengers traveling on domestic routes and 331 million new passengers on international services.

International freight volumes are also expected to grow at 3% per annum to total 34.5 million tonnes in 2016. That is 4.8 million more tonnes of air cargo than the 29.6 million tonnes carried in 2011. The emerging economies of Asia-Pacific, Latin America and the Middle East will see the strongest passenger growth. This will be led by routes within or connected to China, which are expected to account for 193 million of the 831 million new passengers over the forecast period (159 million on domestic routes and 34 million traveling internationally). Passenger growth within the Asia-Pacific region (domestic and international) is expected to add around 380 million passengers over the forecast period.

HH Sheikh Ahmed Bin Saeed Al Maktoum
President, Dubai Civil Aviation Authority; Chairman, Dubai Airports
Chairman and Chief Executive, Emirates Airline & Group

Over the past 25 years HH Sheikh Ahmed Bin Saeed Al Maktoum has been at the forefront of Dubai's remarkable economic development spearheading the successful expansion of aviation, which now supports 28 per cent of Dubai's GDP, and more recently, formulating economic, investment and fiscal policies and strategies in support of the emirate's overarching vision.

Sheikh Ahmed embarked on his career in the aviation industry in 1985 when he was appointed President of the Dubai Department of Civil Aviation (DCA) – the governing body that oversaw the activities of Dubai International and Dubai Duty Free, among others. In the same year Emirates airline – Dubai's international carrier was launched with Sheikh Ahmed as its Chairman. He is now the Chairman and Chief Executive of Emirates Airline & Group, which includes dnata – the region's leading travel services and ground handling company, and other aviation related entities. Under Sheikh Ahmed's leadership, the DCA underwent an organizational restructuring in April 2007 resulting in the creation of the Dubai Civil Aviation Authority (DCAA) as the local regulatory body, and Dubai Airports as the owner and operator of Dubai's airports – Dubai International and Dubai World Central. Following the restructuring, Sheikh Ahmed became the President of DCAA and Chairman of Dubai Airports.

The fact that Dubai is now firmly established as the region's leading tourist destination and business, trade and transport hub is due in no small measure to the efforts of Sheikh Ahmed. Under his leadership, Dubai International has developed from humble beginnings into the world's fourth busiest airport for international passenger and cargo traffic with a network of over 260 destinations served by more than 140 airlines.

Founded in1985, Emirates has grown from being a regional airline with just two leased aircraft and three destinations, to an acclaimed international airline with a fleet of some 200 aircraft, including the world's largest fleet of Boeing 777s and Airbus A380s. Flying to more than 130 destinations across six continents, Emirates is the world's fastest growing intercontinental carrier. In addition, the airline has reported profits for 25 consecutive years, a rarity in the airline industry. Dubai Duty Free has become one of the biggest single airport retail operations in the world in terms of turnover with revenues of US$1.46 billion in 2011.

In June 2009, with the launch of flydubai, its own budget carrier, Dubai added another first to its long list. With Sheikh Ahmed to guide the fledgling carrier as its Chairman another success story is already in the making. Within three years of its launch flydubai has already emerged as the second largest contributor to traffic at Dubai International and features over 820 flights per week.

The opening of Concourse A, the world's first purpose-built A380 facility, in early 2013 is part of a $7.8 billion expansion plan designed to boost capacity at Dubai International to 90 million passengers by 2018 to accommodate the anticipated traffic growth driven by the rapid expansion of Emirates airline and flydubai. Dubai World Central (DWC), Dubai's airport of the future launched on June 27, 2010 was another historical moment for Dubai as the first major step towards establishing Dubai as the world's most preferred aviation and logistics hub. It followed the spectacular opening of Dubai International's Terminal 3 on October 14, 2008 – widely acknowledged in the industry as the most successful launch of a terminal of its size.

Sheikh Ahmed holds a number of government positions and plays an increasingly pivotal role in leading the emirate's finance and energy sectors. Despite his numerous business activities, he is Patron to many charitable organisations. He has also received numerous accolades from various Governments and multi-nationals (see the addendum attached).

HH Sheikh Ahmed has a Bachelor's Degree from the University of Denver, Colorado, USA. He is well known internationally for his contribution to the development of aviation in the region. The Royal Aeronautical Society, one of the industry's oldest and most respected professional associations honored his achievements in aviation with a fellowship of the Society at the 1994 Farnborough Air Show in the UK In May 2013, he was presented with an honorary Degree of Doctor of Science from City University London – Cass Business School in May 2013 in recognition of his outstanding leadership in the development of professional sectors including aviation, finance, banking and entrepreneurship among others in the UAE

HH Sheikh Ahmed Bin Saeed Al Maktoum holds the following positions:

1. President Dubai Civil Aviation Authority (DCAA)
2. Chairman and Chief Executive Emirates Airline and Group (including dnata)
3. Chairman Dubai Airports
4. Chairman flydubai
5. Chairman Dubai Duty Free
6. Chairman Dubai Supreme Fiscal Committee
7. Chairman Department of Oil Affairs
8. Chairman Dubai Supreme Council for Energy
9. Chairman Board of Dubai World DW
10. Chairman Economic Development Committee
11. Chairman Dubai Airport Free Zone Authority
12. Chairman Emirates National Bank of Dubai ENBD
13. Chairman Noor Investment Group and Noor Takaful
14. Chairman Alliance Insurance Company
15. Chairman The British University in Dubai
16. Chairman Dubai Air Wing
17. Chairman Dubai Aerospace Enterprises
18. Chairman Supreme Committee -Dubai Events & Promotions Establishment
19. Chairman of Dubai EXPO 2020 Higher Committee
20. Chairman Board Trustees Al Jalilah Foundation for Education and Medical Research
21. Vice-Chairman Dubai World Trade Centre
22. Second Vice Chairman Dubai Executive Council
23. Board Member Investment Corporation of Dubai (ICD)
24. Board Member General Civil Aviation Authority of UAE
25. Board Member Dubai Council for Economic Affairs

Mohammed A Ahli
Director-General - Dubai Civil Aviation Authority, CEO - Dubai Air Navigation Services

Mohammed A Ahli is the Director General of Dubai Civil Aviation Authority (DCAA) and CEO of Dubai Air Navigation Services (DANS). As the top official in the DCAA, dealing with air service agreements, he has brought in more airlines to Dubai. Mohammed is a popular figure in international circles and an expert negotiator who possesses the decision making power to ensure growth of aviation in Dubai.

His contribution towards liberalisation of aviation policy and its successful implementation in Dubai is a landmark in his career. He was among the pioneers who were instrumental in the establishment of the Emirates Airline. With an extensive background in the aviation industry, Mohammed has steered the Dubai Aviation in the right direction, which is his lifetime achievement.

The services he has rendered to Asia and Asia Pacific Region of ACI, is well recognized by the aviation community and it summarizes his commitment to its cause. He is also the First Vice President of Airports Council International (ACI) Asia/Pacific region, which has given a boost to the Asian and Middle East Region.

Shibly Aziz
Chairman of Civil Aviation Authority, Sri Lanka

Mr. Shibly Aziz is a well-known and eminent President's Counsel in Sri Lanka who has contributed extensively to the development of the legal system in the country since 1968. He is the former Attorney General of Sri Lanka and has served on a number of national commissions and statutory bodies and represented Sri Lankan in several international fora. He continues his legal career now in active private practice, specializing in commercial law, shipping and aviation law, and public law, and has litigated several landmark cases in the country.

Mr. Shibly Aziz completed his senior school studies from 1954 to 1963 at Royal College, Colombo. He continued his tertiary education in University of Ceylon, Peradeniya where he completed his LLB with Honours and thereafter proceeded to the United Kingdom and obtained an LLM from the University of London and Diploma in Shipping & Maritime Law (University of London) and Diploma in Air and Space Law(University of London -London Institute of World Affairs).

He took oaths in 1968 as an Attorney-at-Law and was in 1969 appointed State Counsel at the Attorney-General's Department. He was thereafter appointed President's Counsel in 1988, the highest honour afforded to a lawyer in the Sri Lankan legal system, in recognition for his professional contributions and exemplary conduct as a lawyer. He was holding the substantive post of Deputy Solicitor General when he was conferred 'silk', which is yet unique in the Attorney General's Department. He served in the department for 27 years and was promoted to Solicitor General in 1992, and finally, served as Attorney-General from 1995 to 1996.

He was appointed as an Attorney-at-Law and was in 1968 and in the following year appointed as the State Counsel at the Attorney-General's Department. He was thereafter appointed President's Counsel in 1988, the highest honour afforded to a lawyer in the Sri Lankan legal system, in recognition for his professional contributions and exemplary conduct as a lawyer. He served the department for 27 years and was promoted to Solicitor General in 1992, and finally, served as Attorney-General from 1995 to 1996. Shibly Aziz also served as a consultant in International Relations and Legal at Airlanka Limited, the national carrier, from 1990 to 1994. He was appointed Director, Airport and Aviation Services Limited (Airport Authority) from 1985 to 1994. He was also instrumental in drafting legislation in the country, particularly air navigation laws such as the extensive amendments made to the Air Navigation Ordinance.

Shibly Aziz was member of the Sri Lanka Law Commission from 1994 to 2003, and 2011 to present and a member of the Council of Legal Education from 1992 to 1996, 2010 to present. He was also Chairman of the Civil Aviation Authority of Sri Lanka from 2003 to 2005. He was also a member of the Incorporated Council of Legal Education serving two periods.

Shibly Aziz was voted into office as the President of the Bar Association of Sri Lanka in 2010 and served his maximum tenure in office until 2012.

Ahmed Al Nemah

Acting Undersecretary, Civil Aviation Affairs Ministry of Transportation & Telecommunication, Kingdom of Bahrain

Ahmed Al Nemah currently holds the position of the Acting Undersecretary for Civil Aviation Affairs at the Ministry of Transportation & Telecommunications and is responsible for overseeing the strategic development of aviation services and regulations in the Kingdom of Bahrain. His responsibilities also include developing and implementing open skies policies for the Kingdom, signing air transport and bilateral agreements with nations worldwide as well as heading Bahrain's delegation at the International Civil Aviation Organisation (ICAO) General Assembly and other international congresses. Ahmed Al Nemah manages the Air Transport, Air Navigation, Aeronautical Licensing, Aviation Safety and Security, and Meteorology Directorates.

Prior to his current post as the Acting Undersecretary for Civil Aviation Affairs, Ahmed Al Nemah was appointed as the Director of Air Transport and Head of International Relations in 2001. He began his career in the aviation industry in 1978 when he joined the Civil Aviation Affairs as an Air Traffic Controller.

Ahmed Al Nemah graduated from the Aviation College in Doha, Qatar and obtained a degree in Business Management from the University of Bahrain. He is married with five children.

He is also involved in the following committees and organisations:
- *Member of Bahrain International Airshow Supreme Organising Committee*
- *Member of the Executive Committee at Arab Civil Aviation Commission*
- *Member of the Board of Gulf Aviation Academy*
- *Member of the National Committee for Disaster Management*

H E Ali Majed Al Mansoori
Chairman, Abu Dhabi Airports Company (ADAC)

H.E. Ali Majed Al Mansoori was appointed Chairman of Abu Dhabi Airports Company (ADAC) in June 2012 to manage the significant expansion in infrastructure taking place in the Emirate's airports and to lead ADAC in becoming "the world's leading airport group".

H.E. Ali Al Mansoori brings to ADAC more than 20 years of experience in financial management and strategic planning on both an international and local level. He also brings significant knowledge associated with working for Abu Dhabi government organizations, as he led major projects during his tenure with the Abu Dhabi Investment Authority (ADIA). Prior to joining ADAC, He was the Director of External Funds, Europe, the second largest portfolio within ADIA's equity investments business unit. During his eight years in this role, he restructured the entire portfolio and moved it from a single country mandate to a Pan-European mandate benchmarked against the MSCI-Europe.

Prior to that, he served as a Portfolio Manager at ADIA where he oversaw the airline sector and the auto sector (GMC, Ford and Chrysler) and was later a Senior Portfolio Manager for the oil services sector. Currently, he is a Board Member at Al Hilal Bank, Esdaar Capital, Atlas Center and the Capital Investment Company.

H E Al Mansoori holds a Bachelor of Science in Business Administration from an American University, has attended a series of Harvard Business School Executive Seminars and is a Chartered Financial Analyst (CFA). He is also a member of the US Society of Financial Analysts - CFA institute.

HE Saif Mohammed Al Suwaidi
Director General, General Civil Aviation Authority, UAE Chairman of Arab
Civil Aviation Commission Council

HE Saif Mohammed Al Suwaidi was appointed as Director General of the General Civil Aviation Authority (GCAA) in the United Arab Emirates (UAE) in April 2008. Prior to joining the GCAA, Al Suwaidi, a career air force veteran as pilot, held several senior positions in the UAE Air Force, including his last tour as Director of Air Force Operations.

Upon his graduation from flying school in Abu Dhabi as a helicopter pilot in 1983, Al Suwaidi started his career as a pilot in the UAE Air Force. He held several positions in the Air Force Headquarters, until he was assigned as Director of Operation in 2006. Al Suwaidi obtained a law degree from Beirut Arab University in Lebanon in 2004. He was re-appointed as Chairman of Arab Civil Aviation Commission Council in May 2012. He is married and has two sons and two daughters.

The GCAA, the federal regulatory agency of the UAE, is primarily responsible for aviation safety, security, regulation of civil aviation for overseeing the development of air traffic control system in the UAE airspace and air transport agreements. As the sole agency in the UAE charged with controlling security measures at airports and companies, GCAA works in close co-operation with other security agencies including the police in the UAE. The agency is governed by a Board of Directors which represents the UAE aviation community.

Abdulaziz Mohammed Al Noaimi
Chairman of the Steering Committee of the New Doha International Airport (NDIA)

Abdulaziz Mohammed Al Noaimi, Chairman of Qatar Civil Aviation Authority, has over 30 years experience in aviation and airport management. He started as Air Traffic Controller in 1975 and became the Director of Doha International Airport in 1979.

Al Noaimi was appointed Chairman of the Civil Aviation Authority in 2002. He also became Chairman of the New Doha International Airport (NDIA) Project Steering Committee the same year. From 1989-2002 Al Noaimi was a Member of the Board of Directors – Gulf Air. He became a Board Member, Doha International Airport Public Corporation (1999) and Member, Board of Directors, Qatar Airways (2004). In 2006, Al Noaimi became the Executive Chairman – Arab Civil Aviation Commission, and Board Member, Qatar National Hotels Company. He is the Chairman of the New Port Project Steering Committee since 2007.

Al Noaimi earned his bachelor's degree in Business Administration from the Beirut Arab University; holds a diploma in Air Traffic Control; and diploma in Telecommunications. He holds a private Pilot License. Born in Doha, Al Noaimi speaks Arabic and English. His leisure interests are reading, tennis and flying.

Mohamed Mubarak Al Mazrouei
Chief Executive Officer, Abu Dhabi Airports Company (ADC)

Mohamed Mubarak Al Mazrouei took over as the new CEO of Abu Dabhi Airports Company in 2015. He succeeds Mr. Tony Douglas who has taken a senior post with the UK's Ministry of Defence.

Al Mazrouei is the Chairman of Bin Nawi Group, a private investment group which supports local businesses in their growth and development. He is also a board member of Abu Dhabi Ports Company. He has considerable experience in major infrastructure projects and the governance required to secure their delivery.

Al Mazrouei was previously Chief Executive of Manazel Real Estate PSJC, a leading developer of residential property in Abu Dhabi, a position he held for more than three years. Before that, he was the Projects Director of the General Authority of Health Services and also held a number of roles in the Public Works Department.

Al Mazrouei holds a Bachelor of Science in Civil Engineering degree, with a degree from the University of North Carolina, Charlotte, USA. He also served as a Lieutenant in the UAE Armed Forces.

H.E. Sulaiman Al-Hamdan
President, General Authority of Civil Aviation (GACA),
Kingdom of Saudi Arabia

H.E. Sulaiman Al-Hamdan is the President of the General Authority of Civil Aviation and brings with him a wealth of knowledge and experience within the Kingdom of Saudi Arabia's aviation sector. Counted among the dynamic leaders in the Kingdom, Al-Hamdan's expertise in aviation traverses various functions - leadership and management, finance, and strategic planning and development.

Prior to being appointed as President of GACA, Al-Hamdan served as President and Group Chief Executive Officer of NAS Holding where he presided over a team of industry experts that helped turnaround the fortunes of the Group during his six year tenure. Al-Hamdan has a proven track record in Saudi Arabia's banking sector, having worked at The Saudi British Bank (SABB) for 23 years where he last served as Deputy Managing Director in charge of all the bank's customer-facing departments including corporate & commercial banking, private banking, institutional banking, the entire network of branches, three regional area management offices, remote delivery channels and all the retail market segments which included credit cards, payment and cash management and trade services.

Al-Hamdan's extensive experience in HR & Personal Banking gained during his tenure at SABB was advantageous and valuable during his leadership role at NAS Holding Group. Prior to working at SABB, he served at the Saudi Fund for Development in various capacities across the Loans, Capital and Investment Departments. Al-Hamdan currently serves as Chairman of the Board of Directors of Saudi Arabia Airlines as well as a Board Member of Gulf International Bank (GIB) in Bahrain.

He holds a Master of Business Administration degree with concentrations in Management & Organization, and Marketing from the University of New Haven, Connecticut, USA. He has attended several high-level trainings such as INSEAD's Strategic Management of Services Programme, Harvard University's Advanced Management Programme and Human Resource Management at Pennsylvania State University.

HE Mohamed Abdulla Sultan Al Salami
Chairman, Department of Civil Aviation, Government of Fujairah

HE Mohammed Abdullah Sultan Alsalami was born on December 25, 1960, in Dibba, UAE. After completing his secondary education, he pursued further studies at Indiana State University, USA, where he earned a bachelor's degree in Political Science and Public Administration in 1984.

Upon returning to the Emirates, Alsalami began his career as a government official. He was made Director of the Department of Industry and Economy from 1984-1986. In 1986, he was appointed as Chairman of Fujairah Aviation Centre, Member of the Federal Council-United Arab Emirates and in addition, became the Vice- Chairman of Port of Fujairah and Fujairah National Group and Director of Al Fujairah Insurance Company. In 1987, he also became a Member of the Airports Council International - Asia region.

Since 1986, Alsalami is Chairman of Department of Civil Aviation, Government of Fujairah and Fujairah National Catering Establishment (FNCE). In 1997, he became a member of General Civil Aviation Authority.

Pusapati Ashok Gajapathi Raju
MINISTER OF CIVIL AVIATION, INDIA

Pusapati Ashok Gajapathi Raju is India's Minister of Civil Aviation in the Narendra Modi cabinet. He brings a touch of old royalty being from the royal family of Gajapati from Vizianagaram. He is a first time Member of Parliament (MP) from Vizianagaram and one of the senior most leaders of the Telugu Desam Party, an ally of the National Democratic Alliance (NDA).

Ashok Gajapati Raju has been a seven-time legislator and served as Finance and Revenue Ministers in the state of Andhra Pradesh. His family is also full of politicians. His father PVG Raju was an MP. Both his elder brother Ananda Gajapati Raju and his sister in law Uma Gajapati Raju were also MPs.

Known to be a no nonsense man with a clean image, Ashok Gajapati is widely travelled, well read and a serious legislator. In spite of being from erstwhile royal family of Vizianagaram, he uses the ordinary bus instead of a special air conditioned ferry car at airports, goes through the ordinary security check. He is entitled all of these facilities as civil aviation minister. He also carries his own bags at airports.

"Whenever he (Raju) visits any airport, only minimum number of officials should receive him. Normal security procedures as mandated should be followed. There should be no inconvenience or disturbance to passengers and security personnel/procedure," a recent order issued by Airports Authority of India on the directive of the minister says.

Ashok Gajapati Raju has initiated several reformative programmes and is keen on extending international routes to Indian airlines by signing new bilateral agreements.

Mohamed Yousif Al Binfalah

CEO - Bahrain Airport Company

Mohamed Yousif Al Binfalah is a Bahraini national with over 12 years of experience in the aviation industry. In his current capacity as CEO of Bahrain Airport Company (BAC), Mohamed is responsible for overseeing the overall management of BAC and steering the Company's performance to achieve its target objectives.

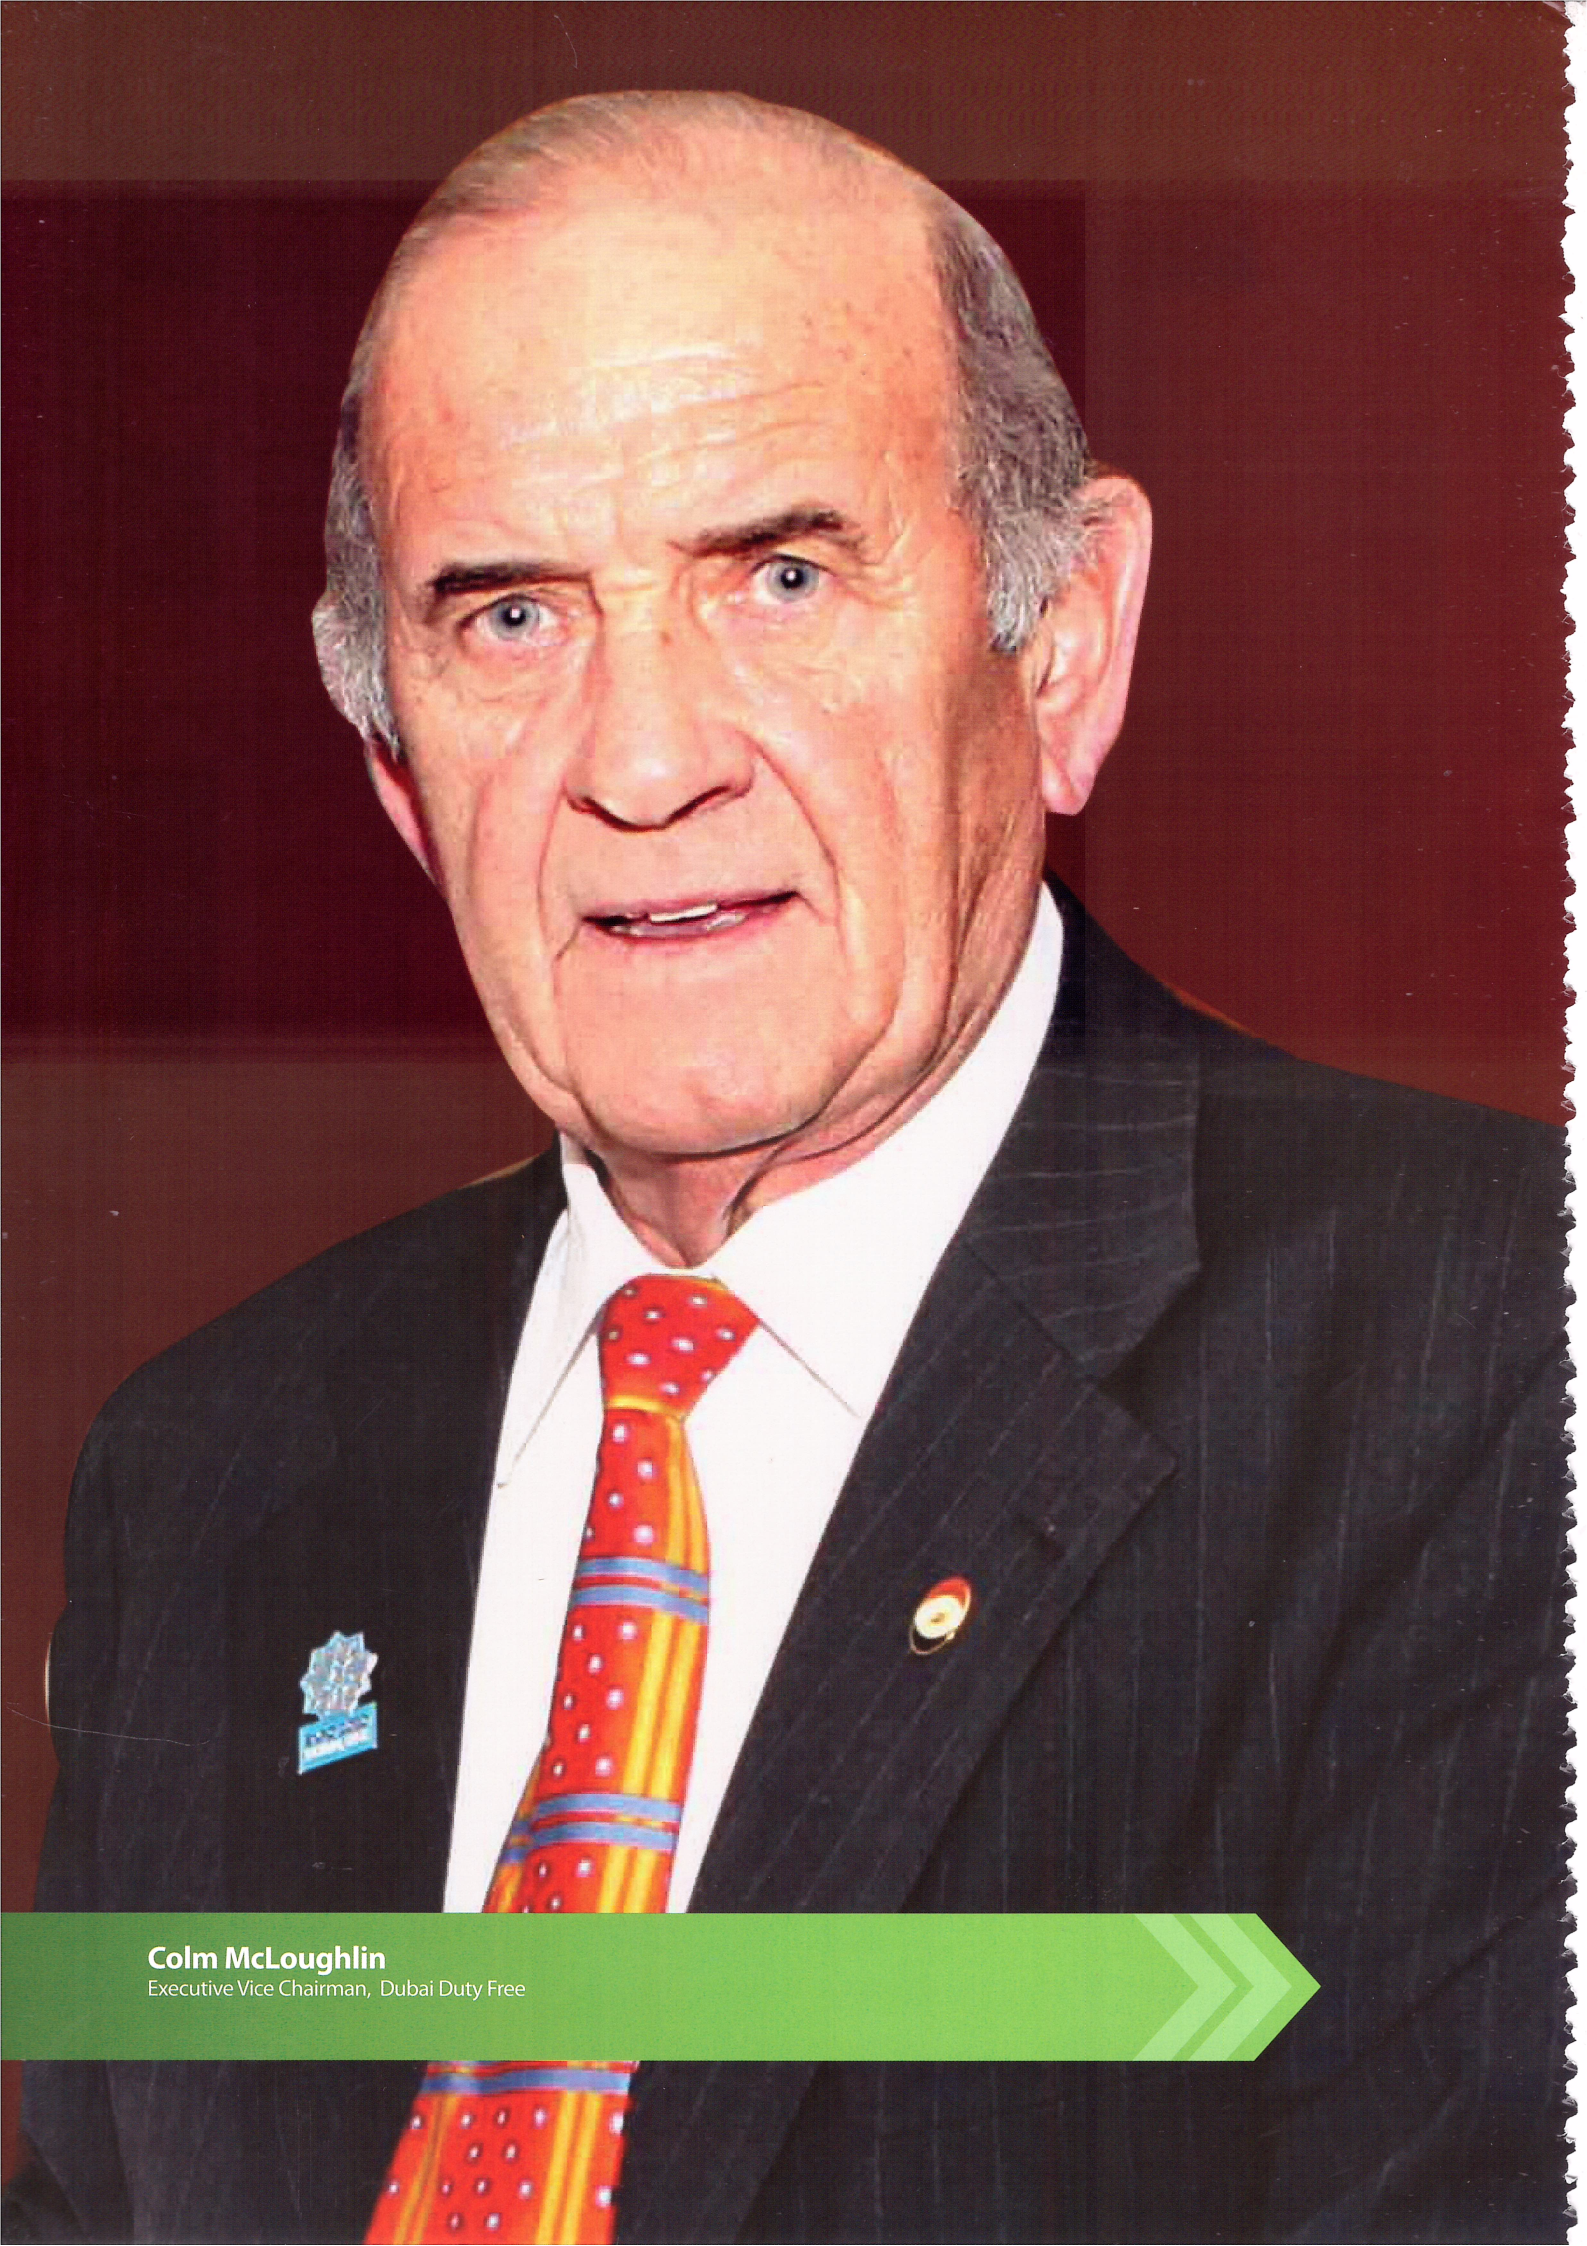
Mohamed brings with him a wealth of knowledge in the general aviation sector and was previously the General Manager of DHL Aviation Service WLL for over 8 years, based at the Bahrain International Airport.

A high achiever with a proven track record of success accumulated over his 27 year career, Mohamed has extensive experience and a solid understanding of the facility management industry which he acquired during his work at Gulf Petrochemicals Company BSC (c) as well as through his role as Founder and CEO of Olive Facility Management Company.

He holds a Bachelor's degree in Mechanical Engineering and a Masters in Business Administration from the University of South Wales, formerly known as the University of Glamorgan.

An active member of the community, Mohamed's interests extend to sporting initiatives and he previously held the position of Director for both the Tennis Federation of Bahrain and the Muharraq Club for multiple years.

Mohamed is married and has three children.



Colm McLoughlin
Executive Vice Chairman, Dubai Duty Free

Colm McLoughlin was a member of the consultancy team from Aer Rianta, the Irish Airport Authority, which was contracted by the Dubai Government to launch the new duty free operation in 1983. Mr. Colm remained in Dubai as General Manager of the new operation, later becoming Managing Director and being named Dubai Duty Free's Executive Vice Chairman in July 2011. Under the Executive Vice Chairman's leadership, Dubai Duty Free has grown dramatically over the past 32 years during which the business grew from US$20 million (1984) to Dhs6.999 billion (US$1.917 billion) in 2014.

Mr. Colm is a recipient of several personal awards including the Frontier 'Lifetime Achievement Award', the 'Galway Millennium Man of the Year', the 'Most Distinguished Employee Award' from the Dubai Government Excellence Awards and the 'Businessman of the Year' from the Middle East Business Awards. In 2013, Mr. Colm was presented with The 'Sir Michael Smurfit Business Achievement Award' which was presented at the 25th Annual American Celtic Ball hosted by the Irish Chamber of Commerce USA (ICCUSA) held in New York. The award recognizes his leadership over the past thirty years and he joins a list of renowned business leaders from Ireland for their significant contribution to international business. He was also presented with the 'CEO of the Year' at the 3rd Asian Leadership Awards, and the 'Lifetime Achievement - Editor's Choice Award' at the inaugural Conde Nast Traveller ME Awards in 2013.

In 2014, he was named one of the 'People of the Year' by The Moodie Report, a highly-respected online industry publication, 'Best Manager of the Year' at the Europe Business Assembly's Socrates Awards held in London. He also received the 4th Asian Leadership Award "Hall of Fame" award and the 'Outstanding Contribution to Business' Award at the CEO Middle East Awards organised by ITP Publishing. This award recognizes his achievements and leadership skills during his distinguished career with Dubai Duty Free.

Mr. Colm was presented with the Irish Presidential Distinguished Service Awards for Business and Education category, making him one of a select group of people, and the first Irish person living in the UAE, to be recognized by the Irish government for his outstanding contribution to Irish business and communities abroad.

Mr. Colm has the overall responsibility for the operation and its subsidiary businesses, which include The Irish Village, The Century Village, the Dubai Tennis Stadium, home to the Dubai Duty Free Tennis Championships, and the Jumeirah Creekside Hotel.

Born in Ballinasloe, Co. Galway, Ireland in 1943, Mr. Colm is one of five, with two elder brothers and two younger sisters. He attended the village Boy's National School and Garbally College, where he excelled in sport including hurling and tennis and went on to play rugby for Co. Galway. He began his retailing career in London in the 1960's working for the popular high-street chain of Woolworths, before moving back to Ireland to work for Shannon Duty Free.

In July 2012, Dubai Duty Free successfully raised a US$1.75 billion loan facility to finance the expansion plans at Dubai International Airport. The facility received strong support from a syndicate of 26 international, regional and local banks.

Married to Breeda, Mr. Colm has three adult children and two grandchildren. A single handicap golfer, he is also the former Captain of the two golf courses in Dubai: the Emirates Golf Club (1995/1996) and the Dubai Creek Golf & Yacht Club (2007). He is the only person to have held both captaincies. He also holds a private pilot's license for light aircraft.

Paul Griffiths
Chief Executive Officer , Dubai Airports

Paul Griffiths is Chief Executive Officer of Dubai Airports, with the responsibility for the operation and development of Dubai International as well as Dubai World Central, which will eventually be the world's largest airport with capacity to handle 160 million passengers and 12 million tonnes of freight annually.

Paul joined Dubai Airports as its first CEO in October 2007. Exactly a year later, on October 14, he orchestrated the flawless launch of Terminal 3 at Dubai International and on June 27, 2010 successfully opened the emirate's second airport Dubai World Central. He achieved another milestone in Dubai's aviation history on January 2, 2013 with the similarly flawless opening of Concourse A, the world's first purpose-built A380 facility.

Prior to moving to Dubai, Paul was Managing Director of London's Gatwick Airport, the second largest airport in the UK. Before joining airport operator BAA in 2004, he spent 14 years with the Virgin Group, working closely with Sir Richard Branson as a Board Director of the Virgin Travel Group, embracing the commercial activities of both Virgin Atlantic Airways and Virgin Trains. Prior to this, in the 1980s, he spent four years in Hong Kong developing the marketing, commercial planning and technology functions for the then start-up airline Dragonair.

Paul's career in transportation arose out of the strict advice of his father not to pursue his passion for music. Paul has managed to combine a high profile career with a schedule of concert and recital engagements and has made many public appearances as a recitalist, continuo player and soloist in concerti with major orchestras.

He started to learn to play the organ at the age of 10 and later studied both music and computer science. Having aspired to train as a Cathedral Organist, he was highly placed in several national competitions and worked his way through a series of professional qualifications to become a Fellow of the Royal College of Organists. He has since become a Council member, Chairman of the Executive Committee and a Vice President of the Royal College.

Paul is married to Joanna (also a concert organist and composer) and has three children between the ages of 9 and 22.

Rashed Bu Qara'a

Chief Operating Officer, Dubai Aviation City Corporation

As the Chief Operating Officer of Dubai Aviation City Corporation (DACC), Rashed Bu Qara'a oversees the strategic development and execution of Dubai World Central (DWC). A multi-phased urban infrastructure development covering 140 square kilometers, DWC is an aerotropolis designed to meet the present and future needs of aviation, commercial, exhibition and logistics businesses.

At the heart of the development lies the Al Maktoum International Airport which, once complete, will have the capacity to handle up to 12 million tonnes of cargo and 160 million passengers annually. Furthermore, seven integrated districts designed for logistics, residential, humanitarian, commercial, exhibition, leisure and aviation requirements will position DWC as a self-contained economic platform and centre of commerce.

Before taking his current position in 2009, Bu Qara'a held the position of CEO at DuServe, a facilities management company providing innovative and cost-effective asset management solutions to both the residential and commercial sectors. He joined DuServe from Dubai Airports where he held top executive positions including Senior General Manager of Utilities and Infrastructure.

He is a board member of the Dubai Supreme Energy Council and is involved in many initiatives aimed at the further development of aviation infrastructure and related businesses in Dubai.
Bu Qara'a is a graduate of Boston University and also holds an MSc in Airport Engineering from Nan Yang Technological University in Singapore.

Tewolde GebreMariam
CEO, Ethiopian Airlines

Tewolde Gebremariam began his career at Ethiopian Airlines in 1985. He served in different capacities in the cargo traffic handling department and progressed through the ladder to Manager Cargo Traffic Handling. He was appointed as Regional Director for India and South East Asia base in Bombay and later on transferred to Jeddah as Area Manager for Saudi Arabia. When Ethiopian Airlines commenced direct services to the USA, he was appointed as Area Sales Manager for North East USA and Canada based in New York.

On August 16, 2004 Mr. Tewolde was appointed as Executive Officer Marketing and Sales to head the Marketing and Sales Operations of Ethiopian Airlines. On July 1, 2006 he was appointed as Chief Operating Officer to head all the operating divisions of the airline namely Commercial, Flight Operations, Customer Services and Maintenance and Engineering. For the last four years he successfully steered the operations of the airline towards an unprecedented and profitable growth.

Mr. Tewolde has a B.A. degree in Economics from the Addis Ababa University and a Masters in Business Administration (MBA) from the Open University in the United Kingdom.

Adel A Ali
Board Member and Group Chief Executive Officer, Air Arabia

Adel A. Ali is well known for being at the forefront of the development of modern aviation. His innovative achievements and contribution to air transport and tourism sector in the wider Arab world are globally recognised. He managed to transform Arab aviation in October 2003 when he set up Air Arabia, the Middle East and North Africa's first low-cost carrier (LCC), opening up a market niche in the region whose existence few had suspected.

The pioneering aviator drove Air Arabia's growth in the next eleven years into the largest low cost carrier in the MENA region, as well as the first publicly owned airline in the Arab World and it's largest by market value. Drawing on his 28 years of experience with industry leaders such as Gulf Air and British Airways, Adel has also been able to guide Air Arabia to become amongst the world's best run Low Cost Carriers, delivering a profit for eight years in succession.

Under the leadership of Adel, Air Arabia's business model has gone from strength-to-strength, enabling it to expand operations, enter new ventures and diversify into new revenue streams. Today, the Group holds a portfolio of successful businesses and projects, offering travel, tourism and hospitality services across the globe. In addition to being the Group Chief Executive Officer of Air Arabia, Adel is also the chairman of Sharjah Information Systems Associates, Alpha Sharjah catering, Alpha Aviation Academy and Cozmo Travel. A board member of Sharjah Aviation Services; Adel also sits on the board of Air Arabia (Maroc), based in Casablanca's Mohamed V International Airport and Air Arabia (Egypt), based in Alexandria's Burj Al Arab International Airport.

Since 2007 and for five consecutive years, Adel has been awarded 'Airline CEO of the year' by various industry forums. He was named 'World's best Low Cost Carrier CEO' during the World LCC Congress in 2008. He entered the 'Hall of Fame Award' in 2010, honouring his contribution to the Middle East Aviation. In 2011, Adel was named 'Business Leader of the Year' at the Middle East Accountancy and Finance Excellence Awards as recognition for establishing Air Arabia as the region's number one low-cost carrier. Also, in September 2012, during the third year of CEO Middle East Awards, Adel Ali was named 'CEO of the Year – Aviation'. Hosted by CEO Middle East, an ITP group publication, 'CEO Middle East Awards' recognise and reward outstanding success, innovation and ethics. Finally, in July 2014, Adel Ali won the "'Airline Business Award' at the esteemed Airline Strategy Awards 2014. Ali received the Award in recognition of Air Arabia's commitment to offer high-quality, low-cost travel solutions to passengers in the Arab world and beyond.

Ali Salem Ali Midfa
Chairman
Sharjah Airport Authority

Ali Salim Al Midfa joined Sharjah International Airport in January 1996. Having gained in depth knowledge and experience in the field of aviation, he moved up through the ranks to become the Director Administration and Commercial in October 2001.

In June 2005, he was promoted as Director – Sharjah Airport Authority. Following a successful stint in this position, in February 2012, he rose to the position of Director General – Sharjah Airport Authority. In January 2014, by Royal Decree, he was appointed as Chairman – Sharjah Airport Authority

Al Midfa is also Chairman of SAS (Sharjah Aviation Services), which is a joint venture ground handling company owned by Sharjah Airport Authority and Air Arabia, the first low cost airline in the Middle East and North Africa, whose hub is at Sharjah. Sharjah Aviation Services provides passenger and ramp handling and operates one of the region's leading cargo hubs.

He also manages Sharjah Airport Travel Agency (SATA), established in 1984 and fully owned by the Sharjah Airport, Government of Sharjah. Started as a small agency to service the passengers travelling through Sharjah International Airport, it became a fully accredited IATA Travel Agency in 2001. Since 2011, SATA has become one of the fastest growing travel agencies in UAE with its main office in the center of Sharjah city and nine branches spread around seven prominent locations of Sharjah including Sharjah International Airport, Rolla Mall, Al Arouba, Al Nahda, SAIF Zone, and Industrial Area and in the Emirate of Dubai, Ajman and Ras Al Khaimah. More branches are planned in other emirates in the near future.

Dr Mohammed Al Zarooni
Director General, Dubai Airport Freezone, UAE

Dr Mohammed Al Zarooni was appointed Director General of the Dubai Airport Free Zone (DAFZA) in 2000 and CEO of Dubai Silicon Oasis (DSO) in 2002.

In 1995, Dr Zarooni joined the Department of Civil Aviation as Director of Administration and Research. He was a key figure in establishing the Free Zone Division. Previously, he served at the Ministry of Education for eight years. In 1994 he received a Ph.D. in Economic Geography from Durham University in the UK after writing a thesis in 'The Place of Free Trade Zone in Economic Development'.

He received his BA degree from Emirates University in 1986 and an MBA in Economic Geography in 1989. Dr Zarooni is a sought after public speaker at summits and conferences around the world. He is also a writer.

Dubai Airport Free Zone, a member of the Dubai Quality Group, the European Foundation for Quality Management (EFQM) and Emirates Environment Group has emerged as a strong platform for multinational companies, who typically trade in low-volume, high value products such as telecommunications, aviation industry, pharmaceutical, electronics, electrical and computer hardware. Freight and Logistics is a core business of the Free Zone utilizing the proximity to the world's fastest growing Dubai International Airport.

Established in 1996 as part of Dubai Strategic Plan to host foreign investments and facilitate both local and foreign investors' business opportunities, the Free Zone stretches over an area of 1.2m square meters. Nearly 1400 multinational, regional and local companies are running their operations within the Free Zone.

DAFZA provides its client investors with tremendous incentives including 100 per cent foreign ownership, 100 per cent tax exemption, in addition to the easy access to airport facilities, rapid cargo clearance and availability of cost effective talents.
In terms of future expansion strategy, the Free Zone is in the process of completing its three building phases to house more international companies towards the end of the year. The Free Zone has achieved an enormous business growth in the last few years that labeled it as the Middle East's fastest growing airport free zone.

Sir Timothy (Tim) Clark
President, Emirates Airline

Mr Tim Clark has been in the civil aviation business for his whole professional career, having joined British Caledonian in 1972. In 1975, he moved to Gulf Air in Bahrain and subsequently in 1985 to Dubai where he became a member of the founding team of Emirates as Head of Airline Planning.

In 2003, he became President of Emirates Airline, one of the world's fastest growing airlines, which currently serves more than 140 destinations in 80 countries with a fleet of over 215 wide-bodied aircraft. The airline has an aircraft order book of 374 units valued at over US $162 billion at list prices. Emirates currently operates the world's largest fleet of A380s with 47 in service and 93 pending delivery, and also the world's largest Boeing 777 fleet with 135 in service and 211 pending delivery.

Emirates, winner of more than 500 international awards for product and service excellence, is on a strong trajectory to become a top 100 global lifestyle brand. The airline is gaining momentum having been named the world's Most Valuable Airline Brand, according to the 2013 Brand Finance Global 500 study, as well as being designated as one of the most iconic airline brands by the Taylor Nelson Sofres Iconicity index.

Between April 1998 and March 2008, Mr Clark was also the Managing Director of Sri Lankan Airlines, the latter position resulted from Emirates' acquisition in April 1998 of a major stake in the airline with full management control.

Mr. Clark is Chairman of the Emirates Airline Foundation, which he was instrumental in founding. The Foundation strives to improve the welfare of disadvantaged children of the world. He holds a degree in Economics from London University and is a Fellow of the Royal Aeronautical Society. He also holds an honorary doctorate from the University of Middlesex.

In the 2014 Queen's New Year's Honours list, Mr. Clark was invested as a Knight of the Most Excellent Order of the British Empire (KBE) for services to British prosperity and to the aviation industry.
In November 2009, he was conferred an 'Officier de la Legion d'Honneur' by the French government for services to transport and aviation and holds the 2009 Gold Award from the Royal Aeronautical Society for his contribution to civil aerospace. At the 2011 Airline Business and Flightglobal Achievement Awards, he was recognized as 'Leader of the year', and in 2013, he received the Center for Aviation (CAPA) Legends award and was inducted into the CAPA Hall of Fame.

flynas

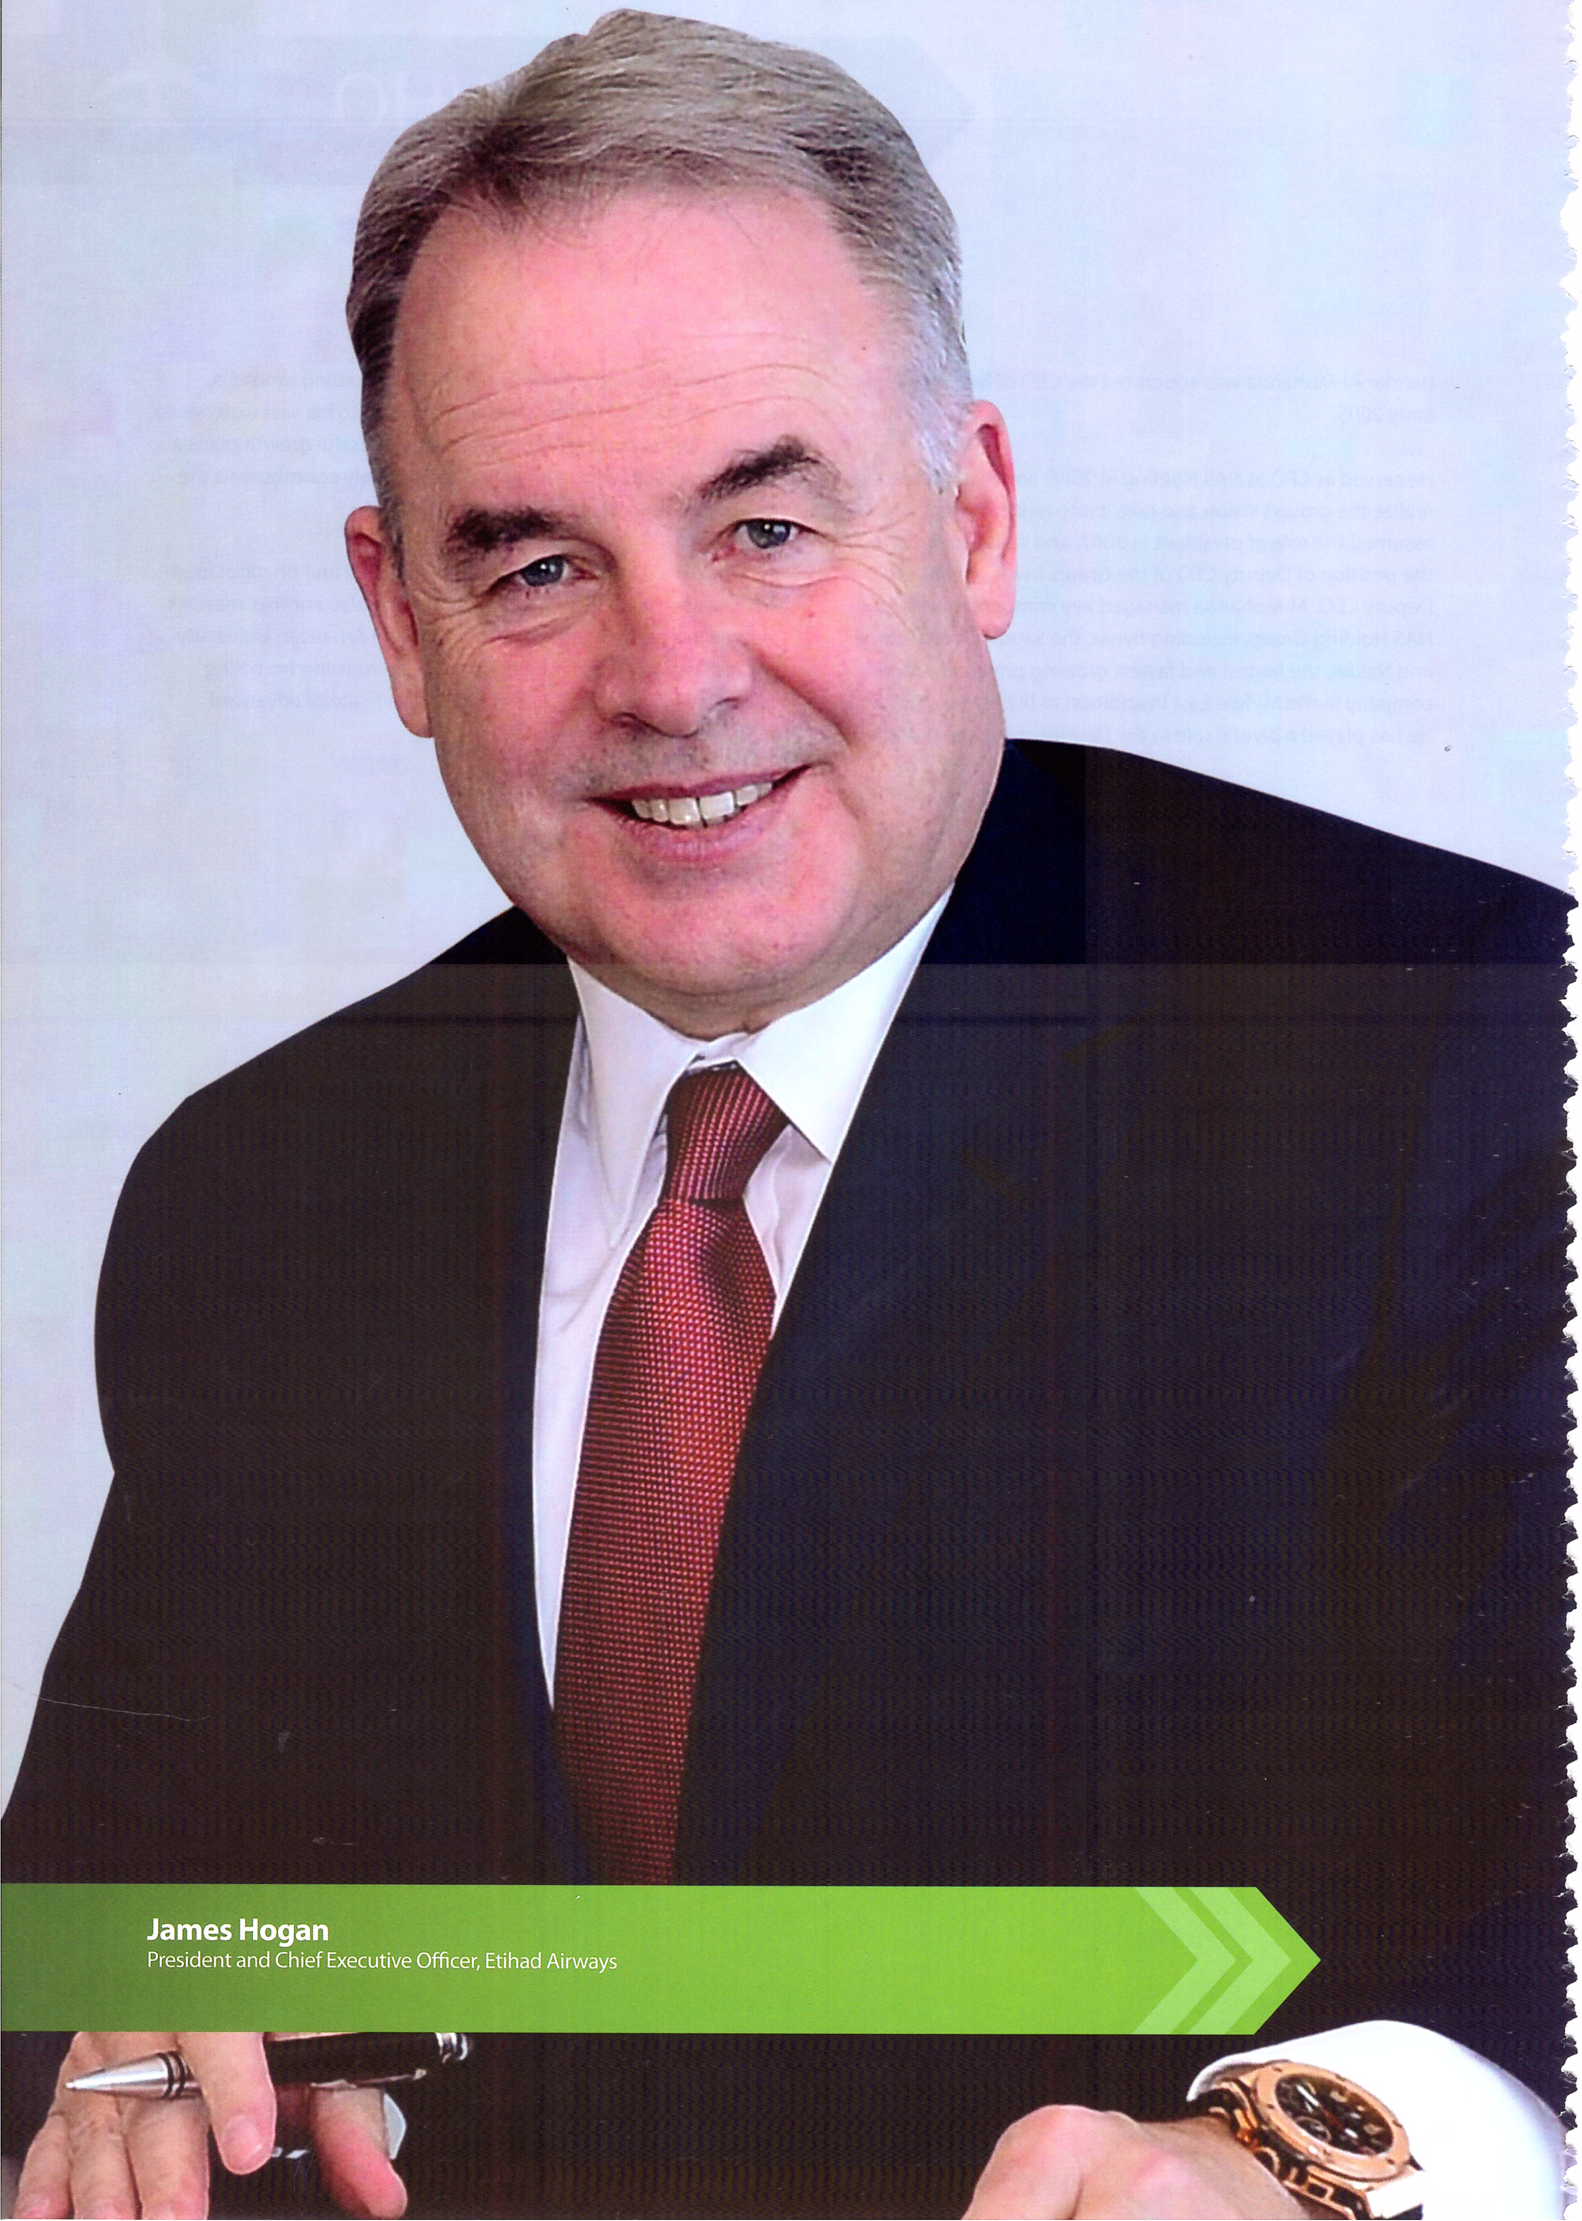
Bandar Al-Muhanna
CEO, National Air Services Group (NAS Holding)

Bandar Al-Muhanna was appointed the CEO of NAS Holding in early 2005.

He served as CFO at NAS Holding in 2006, and lead his team to realize the group's vision and take it into new heights. Al-Mohanna assumed the role of president in 2007, and subsequently to the position of Deputy CEO of the Group. In his previous role as Deputy CEO, Al-Mohanna managed key companies under the NAS Holding Group, including flynas, the Saudi national carrier, and NasJet, the largest and fastest growing private aviation company in the Middle East in addition to flynas Haj and Umrah. He has played a pivotal role in the development and growth of key companies and brands under the NAS Holding umbrella, especially flynas. In addition to that and due to his vast experience, he was able to successfully implement successful growth plans a strategic effectively enabling him to positively contribute to the operational excellence achieved by flynas.

Al-Mohanna has a master's degree in actuarial and financial math from University of Michigan Ann Arbor and also another master's degree in business administration from the American University in Washington DC, a bachelor of arts in accounting from King Saud University in Riyadh as well as a certificate of advanced management from Harvard University.



James Hogan
President and Chief Executive Officer, Etihad Airways

James Hogan was appointed President and Chief Executive of Etihad Airways on 10 September 2006, bringing more than 30 years of travel industry expertise to the Abu Dhabi-based airline.

He has overseen rapid growth of the UAE's national airline, which now serves 94 passenger and cargo destinations in the Middle East, Africa, Europe, Asia, Australia and the Americas operating a fleet of 83 modern environmentally friendly aircraft.

In July 2008, he signed one of the largest aircraft orders in history for up to 205 aircraft worth approximately US$43 billion at list prices, to meet the airline's ambitious long-term growth plans. CEO Middle East Magazine named him Aviation CEO of the Year in 2008 and Visionary of the Year in 2010. He won the CAPA Airline Executive of the Year 2012 Award at the Centre for Aviation's global awards for excellence and leadership. At the Airline Strategy Awards presented in London in July 2013, he received the Executive Leadership Award in recognition of his "influence on the aviation industry, outstanding strategic thinking, and innovative direction for growth."

James started his career in 1975 at Ansett Airlines, and subsequently held senior positions with bmi, Hertz, Forte Hotels and Gulf Air.

At Hertz, his roles included directorships of the marketing, sales and operations divisions. In 1995, based in London, he joined the executive management committee as Vice President, Marketing & Sales for Europe, Middle East and Africa.

In 1997, James became service director for bmi British Midland, leaving in 1998 to join the Granada Group as worldwide sales director, where he sat on the board of Forte Hotels.
He returned to bmi in 1999 as chief operating officer. There he was responsible for flight and ground operations, sales and marketing, commercial, cargo, engineering and handling service companies, and was a member of the Board.

James moved back to his native Australia in 2001, where he was appointed chief executive of the Tesna consortium, which was created with the aim of acquiring Ansett Airlines from administration, before joining Gulf Air in 2002, where he served as chief executive for four years.

James is a fellow of the Royal Aeronautical Society and a former non-executive director, and member of the Board's Audit Committee, of Gallaher Plc. In 2010, he served as the chairman of the Aviation Travel and Tourism Governors at the World Economic Forum. He currently serves as vice chairman on the Executive Committee of the World Travel and Tourism Council (WTTC) and is a member of the UBS Industrialization Advisory Board and the International Air Transport Association (IATA) Board of Governors. In December 2011, he was appointed as Vice Chairman of airberlin plc following the acquisition of a major shareholding in the airline.

Ghaith Al Ghaith
Chief Executive Officer, flydubai

As CEO of Dubai's first low-cost carrier flydubai, Ghaith Al Ghaith is responsible for the strategic direction of the airline, working closely with its Chairman, His Highness Sheikh Ahmed Bin Saeed Al Maktoum.

Prior to flydubai, Al Ghaith had a long track record in aviation with Emirates Airline where his positions included Executive Vice-President Commercial Operations Worldwide, Area Manager UK and Ireland, and GM Commercial Operations Europe and North America.

At the helm of flydubai since its inception on 1 June 2009, he has brought together a dynamic team to build a fleet of 49 Boeing 737-800NG aircraft flying to a route network that spans more than 90 destinations across the Middle East, North Africa, Subcontinent, Asia – and more recently, Central and Eastern Europe.

Al Ghaith is keen to draw attention to how flydubai's brand livery came about – a striking blend of blue and orange representing Dubai's climate, landscape and coastline. He explains: "We are very proud to carry the UAE flag and we wanted to have a very clear connection to Dubai in our livery."

Al Ghaith holds a Bachelor of Science degree in Business Administration from the University of Arizona, USA. He was recently awarded Personal Achievement of the Year at the Aviation Business Awards 2011, as well as Aviation CEO of the Year at both the 2011 and 2009 CEO Middle East Awards.

Bernie Dunn
President, Boeing Middle East

Bernie Dunn was appointed president of Boeing Middle East in May 2015. He is responsible for companywide activities in the region and the development and implementation of the Boeing Middle East strategy. Dunn focuses on government affairs, new business and industrial partnership opportunities, corporate citizenship projects, expanding the Boeing presence and strengthening company relationships with customers and other stakeholders. He will be based in Dubai in the United Arab Emirates and report to Marc Allen, president of Boeing International.

Dunn has more than 30 years of extensive experience with the Middle East, Turkey and North Africa, nearly all of it involving living and working in the region, and is fluent in Arabic. Most recently, he was president of Boeing Turkey and North Africa. Dunn was responsible for creating and implementing the Boeing strategy, government affairs and all Boeing activities in Turkey, Morocco, Algeria, Tunisia and Libya. Dunn was appointed to this position in July 2012.

Before joining Boeing, Dunn was vice president, Middle East/Africa, Business Development, ITT Defense International. In this role, he was responsible for coordinating and overseeing marketing and business development activities across all business units of ITT Defense, in a region stretching from Morocco to Afghanistan and including the entire African continent. He had served in this position since November 2002.

Before joining ITT Defense & Information Solutions, he was a career officer in the U.S. Army. He served in a variety of infantry command and staff positions in Germany and the United States and entered the Army's Foreign Area Officer program in 1982. After completing Arabic language training and a master's degree in National Security Affairs from the Naval Postgraduate School, Monterey, Calif., Dunn served in a variety of positions in the Middle East. Key subsequent assignments include service as the U.S. Army attaché in Jordan from 1992 to 1994, Defense and Army attaché in Syria from 1997 to 2000, and Defense and Army attaché to Saudi Arabia from June 2000 until June 2002.

Akbar Al Baker
CEO, Qatar Airways

Mr. Akbar Al Baker has been instrumental in shaping the development of Qatar Airways into one of the fastest growing and most highly acclaimed airlines in the world – named Airline of the Year 2015, 2012, 2011 and runner up in 2014 and 2013, by global industry audit Skytrax.

Mr. Al Baker has spearheaded the growth of Qatar Airways, which operated only four aircraft in a regional capacity prior to his appointment. Qatar Airways currently flies 162 aircraft to 148 destinations across six continents.

Mr. Al Baker is the Chairman of the Executive Committee of the Arab Air Carriers Organisation (AACO), a member of the Board of Governors of the International Air Transport Association (IATA) and is a non-executive Director of Heathrow Airport Holdings (HAH). AACO is the organisation responsible for the development of the airline industry in the Arab world, IATA is the world regulatory body of airlines, and HAH is the company responsible for the running and development of the UK's largest airport.

A highly motivated individual, Mr. Al Baker has been a successful businessman in Doha for more than 25 years, holds a private pilot license, and is also CEO of several divisions of Qatar's national airline – these being Al Maha services, Qatar Executive, Hamad International Airport, Qatar Aviation Services, Qatar Aircraft Catering Company, Qatar Distribution Company, Qatar Duty Free and Internal Media Services.

Born in Doha, he is a graduate in Economics and Commerce and worked at various levels in the Civil Aviation Directorate before becoming Qatar Airways' Group Chief Executive in 1997.

Nabil M Khojah
Chief Executive Officer
Saudi Airlines Cargo Company, Saudi Arabia

Nabil Khojah has over 17 years of professional experience in Supply Chain, Logistics, Information Technology, and FMCG. Nabil has taken on the responsibility of CEO Saudia early 2013.

Before joining Saudia Cargo, Nabil was the Country Managing Director for DHL Supply Chain in KSA, where he spent 7 years focused on expanding and developing a logistics and supply chain business serving customers from various industry sectors including Oil & Gas, Healthcare, FMCG, and Technology. Before that he was with Unilever where he held numerous leadership positions in the areas of Business Systems, Supply Chain Management and Logistics.

Nabil holds a Bachelor of Science degree in Management Information Systems from King Fahd University of Petroleum and Minerals. He is married and has four children.

Ajith Dias
Chairman, Sri Lankan Airlines

Ajith Dias was appointed as the new Chairman of SriLankan Airlines replacing Nishantha Wickramasinghe in January 2015. Dias was a Director of Brandix and was the former Chairman of the Free Trade Zone Manufacturers Association (FTZMA), a member of the Textile Quota Board and a member of the National Labour Advisory Council (NLAC). He is also a Chartered Textile Technologist & a Fellow of the Textile Institute of UK.

Nishantha Wickramasinghe, the brother in law of former President Mahinda Rajapaksa, was under severe criticism from the opposition over the colossal financial losses the national airline incurred, under his watch.

Launched in 1979, Sri Lankan Airlines is currently expanding and further diversifying its wide range of products and services in order to drive the country's ongoing boom in tourism and economic development. The airline's hub is located at Bandaranaike International Airport in Colombo, providing convenient connections to its global route network of 96 destinations in 46 countries (including code share operations) in Europe, the Middle East, South Asia, Southeast Asia, the Far East, North America, Australia and Africa.

Ajith Dias has championed the cause of the apparel industry with his 'Garments without Guilt' global campaign to ensure ethical apparel manufacturing and sourcing in Sri Lanka. The campaign was well received by the industry and international consumers.

Ahmed Jazzar
Vice President, Boeing International, President, Boeing – Saudi Arabia

Ahmed Jazzar was appointed president of Boeing Saudi Arabia in July 2005. He is responsible for all Boeing business operations in Saudi Arabia, including leading government affairs, developing and implementing Boeing Saudi Arabia strategy, maturing Boeing industrial partnerships, implementing corporate citizenship projects, growing the Boeing presence and reinforcing company relationships with customers and other stakeholders. Jazzar is also responsible for communicating and implementing Boeing key messages and its vision and mission in the country.

Jazzar joined Boeing with 30 years of experience in the commercial aviation industry. He graduated with a bachelor's degree in electrical engineering from the University of Wisconsin-Madison in 1980. In 1995, he completed the Columbia Senior Executive program at Columbia University Graduate School of Business in New York.

Jazzar helped establish a training institute in Jeddah for maintenance technicians to fulfill Federal Aircraft Administration (FAA), Joint Aviation Administration (JAA) and General Authority of Civil Aviation (GACA) license requirements. He also helped Saudi Airlines, now Saudia, to achieve JAA certification and expand its FAA certification for its modification, repair and overhaul (MRO) business.

Jazzar started his career with Saudi Arabian Airlines in 1974 as a certified mechanic in the radio shop. Throughout his career, he held a variety of positions, including senior and master avionics engineer, general manager of the Royal Aircraft Engineering and Maintenance Division, and vice president of the Technical Services Division in charge of all Saudi Arabian Airlines aircraft maintenance worldwide.

As Technical Services Division vice president, he oversaw the engineering, planning and maintenance operations of the commercial and royal fleet of Saudi Arabian Airlines, which consisted of more than 100 airplanes, and managed a labor force of more than 5,800 employees.

From 2001 to 2005, Jazzar served as a member of the board of directors of the Saudi Aviation Club in Riyadh. He has served on the board of directors of Alsalam Aircraft Company, on the operations committee of the International Air Transportation Association (IATA) and as a member of the advisory committee of the College of Engineering, King Abdulaziz University, Jeddah, until his retirement from Saudi Arabian Airlines in 2004. Also, he served as a member of Saudi Academy of Civil Aviation.

From 2007 to the present, Jazzar has been serving as member of the board of trustees of Alfaisal University and a member of an advisory committee for King Abdullah City for Atomic and Renewable Energy. He is also an advisor and head of the Remote Control Committee, which is part of the Saudi Aviation Club in the Kingdom of Saudi Arabia.

Sheikh Ghassan O. Attar
Founder and CEO, First Premium for Support Services

Sheikh Ghassan Omar Attar, Founder and CEO of First Premium Support Services, holds a bachelor's degree in Civil and Structural Engineering from Portland State University, Portland, Oregon, USA.

Mr. Attar completed his postgraduate studies in construction from the University in 1986. In 2000, Engr. Ghassan received the Marriott Certificate for Hotel Excellence. Sheikh Ghassan is a member of the Attar Family, who own Saddik & Mohammed Attar Commercial Company, founded in 1940's and Attar Travel Company, founded in 1952.

With a successful business start, Engr. Ghassan was on-board as Projects Executive Manager of the Construction and Decoration Department at Saddik & Mohamed Attar Company, and one of the establishing members of the Jeddah Chamber of Commerce and Industry, between 1985 and 1994. Engr. Ghassan established AMJAAD for Constructions and Decorations in 1994 and served as the company's Executive Manager.

In 1995, Engr. Ghassan entered the travel and tourism business, after being appointed as Deputy Managing Director for Attar Travel Company. He made an immediate impact, raising the company's status from being the eighth largest travel and tourism business to being the third leading company in the Saudi Arabian. Attar Travel Company expanded over 50 branches Kingdom-wide, prompting board members of Attar Travel to recognize his leadership and he was appointed as the Managing Director. Attar Travel received The Leading Travel Agency in the Kingdom of Saudi Arabia award twice, in 2013 and 2014.

Engr. Ghassan's accumulated experiences enabled him to manage the ground handling service at King AbdulAziz and King Khaled international Airports, as the Managing Director of Attar Ground Handling, from 2003 until 2010.

In keeping with market trends and developments in the travel industry, Engr. Ghassan, established E-travel Gate in 2011, an online travel and tourism company specializing in offering travel services such as, flight tickets, accommodations and other related travel and tour products, with a 24/7 customer service support. In 2014 with the massive growth of air travel in the Kingdom of Saudi Arabia, Engr. Ghassan realized the need for aviation maintenance services in the Kingdom's airports and established First Premium Support Services, an aviation MRO company dedicated to providing quality maintenance services for aircrafts and airport logistics. In addition, Engr. Ghassan also serves as CEO for ALL-in-ONE, a full service Travel Agency with offices in Egypt, Turkey and UAE with plans to expand into Malaysia. Engr. Ghassan is also the CEO for Attar Union JLT in Dubai. All companies are under the umbrella of Attar Holding Co., covering a wide range of aviation services such as airline operations, aircraft leasing, aircraft maintenance, and import and export.

Board membership:

- *Member, Advisory Board – Saudi Arabian Airlines.*
- *Member, Consultancy Committee on Travel Agencies - Saudi Arabian Airlines.*
- *Member, Young Presidents Organization (YPO).*
- *Member, Travel Agencies Board – Jeddah Chamber of Commerce & Industry.*

Rahul Shah
Senior Vice President, AAR, Growth Strategy and Business Development
Asia Pacific, Middle East and Africa

Rahul Shah joined AAR in 1991 as a Development Engineer for AAR Engine Component Services in New York and Connecticut. He then rose to the rank of Program Manager, with responsibilities for sales and marketing activities of the company's engine component repair business.

Shah became Vice President of Sales and Marketing for AAR's Asia Pacific region in 2000. He was promoted to Managing Director of Asia Pacific in 2002, and the business grew sevenfold under his leadership. He has now focused his attention on growing AAR's presence in Africa, India and the Middle East. Currently, as Senior Vice President and Managing Director, Shah manages operations, sales and marketing efforts in the region.

Shah is an accomplished executive leader with extensive expertise in start-up operations and managing businesses. He is also highly experienced in strategic planning and process improvement, combined with business development leadership in global aviation, aerospace and defense.

Strengths include:

- Sales and Marketing Strategy development
- New Market/ Business development and developing strong AAR brand
- Developing extensive network and strategic communications
- Developing partnerships, Joint Ventures and acquisitions
- Very strong International business acumen
- Building team, staff recruitment and developments
- Developing extensive network and strategic communications

Shah earned a Bachelor's degree in Mechanical Engineering and a Master's degree in Industrial Engineering. He is also certified in Business, Finance and Marketing, which he applies as he develops strategic programmes to meet the needs of AAR's customers around the world.

About AAR

AAR is a leading provider of products and services to the aerospace and government/defense industries. The Company was incorporated in 1955 and today has sales of $2.1 billion with more than 6,000 employees in 17 countries. AAR serves customers in 110 countries through two operating segments: Aviation Services

AAR combines its supply chain, maintenance and engineering capabilities to provide customers with integrated solutions that lower costs, increase asset availability and ensure high levels of quality, safety and service. Its supply chain solutions enable customers to increase aircraft availability, minimize downtime and reduce costs. AAR serves as one of the leading MRO providers in the world, performing services that range from major structural repairs to design modifications. AAR also provides expeditionary airlift for defense customers, which support in-theater activity by transporting people, cargo and supplies wherever and whenever they are needed around the world.

Technology Products

AAR designs and manufactures a variety of products and structural components for the commercial aviation and defense industries including: specialized pallets, containers, mobility shelters for transporting troops and supplies; cargo products and systems, including light-weight containers; complex aero structures requiring precision machining and composites fabrication; and communication systems for municipalities and humanitarian aid operations.

As aircraft operators, manufacturers and government customers continually find it necessary to do more with less, AAR is by their side — delivering customer value, with efficient and effective services and technologies, all from a strong, proven and trusted partner.

Rani Awad
President & CEO, Atlantic FuelEx

Rani Awad is the Founder President & Chief Executive Officer of Atlantic FuelEx.

As a driven young entrepreneur, Awad lives by his belief in focus and simplicity. With the customer at the helm, he believes in making small things unforgettable.

After completing his Bachelor of Business Administration from The American University, Cairo (AUC) in 1996, Rani began his stint in the Aviation sector as a Fuel Sales Manager with JetEx Flight Support in 2005… And 2011 he established Atlantic FuelEx. With over 12 years of experience in the Aviation industry his vision is reflected in Atlantic FuelEx's core offerings, which address the intricate needs of the Business Aviation.

Today, Rani deals with and large and well established schedule and cargo operators worldwide. Atlantic Fuelex has been successful in achieving the goal of providing one of the best fuel-saving models to Arab Carriers and assists the fuel suppliers around the globe to increase their business volume and market share through joint ventures with the organization.

Currently, Rani actively engages in all aviation industry activities around the globe and has membership in various key organisations including:

- Member of steering community for Air Arabian Carrier organization (AACO).
- Member of National Business Aviation Association NBAA
- Member of European Business Aviation Association EBAA
- Member of Middle East Business Aviation Association MEBAA
- Member of African Airlines Association AFRAA
- Member of Russian United Business Aviation Association RUBAA
- Strategicpartner for International Air Transport Association IATA

As he leads Atlantic FuelEx into its 2nd year with passion and energy – the organisation represents 'The fuel for his soul'. Rani is confident Atlantic FuelEx will be a leading fuel solutions provider very soon.

Atlantic FuelEx

Atlantic FuelEx provides high quality fuel services to commercial carriers, corporate organizations and governmental entities at competitive prices. It works closely with the clients by alerting them round-the-clock on the internationally

Furthermore, Atlantic also provides customized advice and suggestions to help clients to choose ideal locations to refuel their aircraft and enjoy maximum saving on every purchase. Their specialized team works concurrently with allied fuel suppliers, into-plane agents, and FBO's to consistently provide fast, reliable and high quality products to clients, anytime, anywhere.

Statistics often reveals fascinating facts. In the aviation industry, roughly 50% of an airline's expenses are dictated by the fuel prices. Atlantic FuelEx understands the significance and responsibilities of being one of the major fuel suppliers in the aviation industry. It therefore extends credit terms, single point of contact facilities, complete price transparency, highly pro-active credit risk management services, detailed & speedy invoicing, tax consultation & verification and periodically cross-checks with customer's accounting department to maintain reliable information. What's more, all its allies and partners enjoy all the comforts generated by its years of experience in the market.

Being a member of IATA aviation fuel consultant, Atlantic FuelEx undertakes jet fuel quality/ specification tests and inspections all over the world. Atlantic FuelEx has a well-established global network of jet fuel testing laboratories with state-of-the-art facilities to carry out tests which are akin to ASTM, MIL, DEFSTAN, AFQRJOS, and other jet aviation industry standards. Atlantic FuelEx aims to provide maximum benefits for all our business associates in the airline industry. Whether it is clients, suppliers, associates, employees or partners, Atlantic shares a successful one-to-one relationship by making use of experience, expertise, resources and facilities.

Juergen Strommer
Chief Operating Officer EMEA, Cavotec Group

Juergen joined the Cavotec Group in 2007 as Managing Director and has since overseen the steady growth of the Group's Middle East, India and Africa operations, having played a significant and key role in marking several major achievements for the company, the most noteworthy of which is Cavotec's milestone EUR 30 million turnkey project for the Bahrain Airport Company, one of the largest orders in the Group's history.

Juergen also steered the company towards landing other vital projects that helped build the region's aviation industry into the highly-developed sector that it is today. Backed by the Group's high-tech Airports Market Unit, Juergen facilitated the adoption of Cavotec's solutions in various airports in Abu Dhabi, Bahrain, Dubai, Jordan, Kuwait, Oman, KSA and Qatar. The Group's most recent project under Juergen's stewardship is the supply, installation and commissioning of in-ground pop-up utility pits, converters and PCA units for the new Terminal D at Dubai International Airport, where the latter's previous experience with the Cavotec's technical expertise and customer support played a key role in the awarding of the contract.

With 16 years' experience of working in the region, Juergen has helped establish Cavotec into an industry-leading name by drawing from his extensive knowledge of the local and regional industries and developing strategies that correspond with the unique requirements of the Middle East market.

During his time at Cavotec Middle East, the Group's regional subsidiary, which was established in 1995 and is currently headquartered in the Jebel Ali Free Zone, the unit has expanded to employ more than 80 people and has grown its presence in the Region with offices in Bahrain, Qatar, Abu Dhabi, Pune, India and Johannesburg in South Africa. In 2014, has been promoted to oversee the EMEA Region as Group Chief Operating Officer. Prior to joining Cavotec, Juergen was a Director Sales & Marketing for ThyssenKrupp Middle East and worked with the Al Futtaim Group as General Manager on engineering projects.

Born in Stuttgart, Germany in 1970, Juergen has a degree in mechanical engineering and in Business Management. In his spare time, Juergen is a keen sportsman: he is an enthusiastic skier, plays golf and tennis.

Abdullah M. Al-Sayed
President & CEO of NEXUS Flight Operations Services

Abdullah M. Al-Sayed established NEXUS Flight Operations Services and currently serves as the company's President & CEO. The company has Flight Operations Centers in Jeddah – Saudi Arabia, Manamah – Bahrain, Kigali – Rwanda, Mumbai – India, and Biot – France. Mr. Sayed served as the Deputy Chief Executive Officer of National Air Services/NETJETS Middle East earlier and played a key leadership role in shaping the organization's corporate and strategic direction. He also ensured NJME meets its obligations toward its owners and customers, developing strategic connections and productive relationships with key external & internal stakeholders and building internal capability, including a high performance culture focused on excellent customer service, ongoing learning and continuous improvement in the Flight Operations Division. He was subsequently promoted to the CEO position at NJME.

Mr. Sayed also served as Director Regional Sales & Business Development for Royal Jet under the general direction of the company to lead and direct the organization's sales programs. He was responsible for planning, directing, controlling and coordinating the marketing of the organization's products and services, the sales force and the customer service group. He was also responsible for ensuring that the products were marketed and sold in accordance with budgeted objectives to obtain maximum profitability and sales volume in relation to pre-set marketing and sales standards, continually evaluating the timely adjustment of marketing strategy and sales plans to meet changing marketing and sales conditions.

Abdullah M. Al-Sayed also has served Royal Jet as Director Guest Flight Control Center. In this position, he was responsible for directing all business operations, which encompasses ground operations, medical evacuation, vendor relations and services quality development. A dynamic leader with superb international exposure and interpersonal skills with well-built negotiating abilities, Mr. Sayed's advanced technical knowledge of the regional business aviation and intimate knowledge of the charter and fractional ownership operations in terms of customer service, vendor relations and ground operations are remarkable. UAE General Civil Aviation Authority also approved Mr. Sayed as the ground operations post holder and the final decision-maker in regards to customer flights and crew and flight control center operations.

Abdullah M. Al-Sayed is married and has four children. In his free time, he enjoys reading and travelling.

Nader Ahmed Khalawi

Chief Executive Officer, Saudia Aerospace Engineering Industries (SAEI)

Nader Khalawi has been with Saudia Technical Services Division for over the past 34 years.

In 1983 he obtained a Bachelor of Science degree in Mechanical Engineering from King Fahad University of Petroleum & Minerals.

Khalawi joined Saudi Technical Services Division in 1983 and in 1984 he obtained his A&P License. He worked as Aircraft Maintenance Technician in 1985 and became a Maintenance Section Manager in 1986, and then a Shift Manager for Aircraft Maintenance in 1988.

In 1990 Khalawi became Manager Technical Support Center and in 1998 he was promoted to General Manager Major Base Maintenance. He became the Vice President of Aircraft Maintenance in 2009. In 2011 he was promoted to CEO of the newly formed Saudia Aerospace Engineering Industries (SAEI).

Nader was representing Saudia as Board Member in Al Salam Aircraft Company from 2006 till 2009 and in the Advanced Electronics Company (AEC) from September 2011 till April 2012.

He is currently a Board Member of the following companies:

- *Middle East Propulsion Company (MEPC) since September 2011*
- *Saudia Ground Service Company (AACC) since December 2011*
- *Aircraft Accessories & Components Company since June 2012*
- *Saudia Aerospace Engineering Industries (SAEI) since 2014*

Majid Barzanji
Chairman & Co-founder, Mateen Express

Mr. Majid is the Chairman and Co-Founder of MATEEN Express, a Dubai-based air cargo, courier, transport & logistics company. A native of Erbil, Kurdistan region of Iraq, Mr. Majid has been credited of being one of the very first individuals who explored possibilities and potential of providing commercial air cargo & express services to Iraq. Not only did he carry out the first air transportation for a commercial shipment landing in Baghdad Airport but also initiated the very first commercial cargo flight into Erbil Airport, even before the airport gained its IATA code. MATEEN Express also became the first in Iraq to operate western palletized freighters (DC8-63F, A300F, and B747F) commercially into Erbil and Sulaimaniya.

Mr. Majid's in-depth knowledge and insight of the industry, help him spearhead the cause of commercial aviation in Iraq. He led the creation of a new transportation era and changed the way business was conducted in Iraq through introduction of modern concepts of Supply Chain Enhancement (Inventory Management, Cash Flow Management, Just in Time Deliveries…etc).

By May-June 2001, he had foreseen the substantial geopolitics shift in Iraq and as a result, established first commercial entity in Dubai, followed by others, after which MATEEN Express was conceived in UAE, Iraq, Kurdistan and China among other commercial businesses in Iraq & Kurdistan.

MATEEN Express Air Cargo, Courier, Transport & Logistics:

- The first ever to offer air transportation & express delivery for commercial cargo in Iraq (2003)
- Operations commenced in May-2003 within the mother company at the time
- Registered in UAE 2005, with approximate 25 branches in Iraq, Kurdistan, UAE, China and Turkey
- Passionate, energetic, dedicated team of over 400 employees from various ethnicities and nationalities
- In Iraq, MATEEN Express owns and operates a fleet of 44 Truck Trailers & 74 Toyota 4x4s serving the oil and gas industry
- Own charter operations, serving Iraqi sectors at times when others do not operate
- Carriage of Radioactive, Explosive, all classes of dangerous goods and heavy loads
- Collaborating with all major cargo airlines to Iraq & Kurdistan
- The only operator offering 'Guaranteed Next Day Deliveries to Iraq'.
- Sole Partner of TNT Express in Iraq
- The section of GSA, GSSA & CSA associated with most of the cargo carriers operating to Iraq
- Participated for 11 consecutive years in Erbil International Fair –Iraq (2005 through 2015) among many other exhibitions and events regionally and globally.

Mr. Majid holds a Bachelor of Science at Engineering, Electric Power Systems & Telecom Engineering from Iraq. For a short while in Iraq, he had worked in the field of Power Generation Systems before moving to UAE to join a leading Consulting Engineering firm for about two years. Towards end of 2001 he joined forces with other colleagues to establish the first business followed by other enterprises.

Mr. Majid is blessed with four kids and has been living in the UAE since January 2000.

Joshua Gene Bustos
Chief Commercial Officer
Safi Airways, International Airline of Afghanistan

Joshua Gene Bustos joined Safi Airways in October 2015 as the Chief Commercial Officer. In this role, Mr. Bustos is responsible for the Commercial department at Safi Airways. This includes Alliances, cargo, distribution, Government affairs, Ecommerce, network planning and scheduling, pricing, Public Relations, revenue management, sales and marketing.

Josh Bustos is a commercial aviation executive with over 19 years' experience running airlines around the world. He began working for the Airline Industry with experience ranging from full service airlines such as American Airlines to Ultra Low Cost Airlines like Spirit Airlines. Josh also worked for South African Airways from 2008-2011. He was part of the team that led the airline through restructuring and helped achieve three of their most profitable years (2008-2010). Following South African Airways, Josh spent two years at Sabre Airline Solutions running Airline Solutions Delivery and Consulting for pricing and revenue management products and oversaw consulting and delivery engagements at over 50 airlines.

Josh later joined the TigerAir Group which was responsible for the TigerAir brand of airlines which included TigerAir Australia, TigerAirIndonesia, TigerAir Philippines, TigerAir Singapore and was part of the team to start up TigerAir Taiwan. Josh then joined Revenue Management Systems where he ran the business development, sales and support activities for Asia from the Singapore office. Josh is a professionally trained spokesperson and has done both television and radio interviews along with speaking in front of governments and governing institutions. Josh has a Bachelor's degree from Excelsior College and holds a Master's degree in accounting from the University of Miami.

Safi Airways is Afghanistan's safest airline and has operated for 8 years without any untoward incident. Today it is one of the safest airlines in the region and operates according to the international accredited safety standards. It is the only Afghan airline that is IATA certified and recently passed its IOSA audit and recertification in October 2015.

Josh's goal and vision for the airline is to be the largest and most prestigious airline operating in and out of Afghanistan. The airline is working on an aggressive expansion plans into the region which will include many new destinations and more frequencies on the existing routes. Safi Airways will be working with Boeing and Airbus to fleet the airline to complement its new network strategy of bringing the world to the new Afghanistan. In addition, it is looking to bring in turbo props into the region that will enable it to serve cities that are not yet able to support larger aircraft.

A new intuitive user friendly website with improved customer experience is in place. This will include a mobile application and a dedicated site for its frequent flyers, travel agents and corporate customers. In addition, an online check-in system will be available and additional features too will be added as per customers' request.

Safi Airways intends to remain a full service carrier offering exceptional service up to the highest international standards. Opening of a new lounge along with improved transit facilities in Kabul is on the cards. The lounge will feature Afghan culture and food and will help introduce the world to Afghanistan. In addition, the transit facility will support its domestic and regional expansion plan. The airline wants customers to be able to transit seamlessly into Kabul and onwards to many destinations. Safi Airways is supporting the country's new growth as Afghanistan is open for business.

Talar Faiq Salih
Airport Director, Erbil International Airport

Talar Faiq Salih took up her role as the Director at Erbil International Airport in August 2010, having joined EIA as Deputy Director in late 2009. Under her leadership the new international airport opened in September 2010 and saw a successful first year of operation with new airlines, cargo carriers and a 39 per cent increase in passenger numbers to 555,714 in the 12 months since 1 September, 2010. The airport continues to grow and has emerged as one of the fastest growing in the Middle East, with traffic up 61 per cent in the first 8 months of 2012 and cargo tonnage plus 67 per cent.

Her contribution was recognised in June 2011 when she was awarded, 'Best Woman in Aviation' at the Emerging Markets Airport Awards, in Dubai.

Salih, married with one daughter, has devoted her professional career to helping her fellow Kurds and to serving the Kurdistan Regional Government in a variety of roles either in Iraq and her native Kurdistan or in Europe and the UK.

Her career began in travel as an IATA accredited manager in Suleymania before she joined the United Nations High Commission for Refugees (UNHCR) where she played a key role in assisting the humanitarian effort to relieve the effects of sanctions. Salih was a key member of the local staff and stayed with the UN in a variety of key positions for nearly ten years before moving to the UK to support the growing Kurdish community there. In 2002, Salih was nominated and assumed the role of 'Ambassador for Peace' at the UN linked International Inter-Religious Federation for World Peace, (IIFWP) in London. From her base in the West Midlands of the UK and the growing Kurdish community there, Salih made her move to London where she took up a role at the International Organisation for Migration (IOM) in 2006.

In 2008, Salih joined the office of the Kurdistan Regional Government mission to the UK capital. Taking up a role as a senior member of the mission she worked with senior officials of the KRG to liaise with the UK Government and members of Parliament.
Salih is an accomplished administrator and manager, who has played an important role in supporting the KRG as it, and the region, has emerged from the aftermath of dictatorship in 2003. It is these skills that are brought to bear to deliver her vision, and that of the KRG, to create for the Kurdish people and region, a modern, 21st century centre of excellence at Erbil International Airport.

In her leadership role as Airport Director, Salih is committed to a number of key priorities, notably operating a safe and secure airport that can act as a gateway to Kurdistan and wider Iraq; to develop the commercial potential of the new airport so that it can play its full role as a catalyst for further economic development in the region, and, importantly, to build for the country a pool of talented Kurdish nationals to maintain and operate the airport to the highest international standards.

Women in Aviation

Aireen Omar
Chief Executive Officer, AirAsia Berhad

Aireen Omar was appointed as AirAsia Berhad's Chief Executive Officer on 1 July 2012. She is also an Executive Director for the company. She hails from Petaling Jaya, and is an Economics graduate of the London School of Economics & Political Science (LSE) and also holds a Masters in Economics from New York University (NYU). Aireen has been a member of the senior management team since 2006 and has been instrumental in shaping the development of AirAsia Berhad into one of the fastest growing and most highly-acclaimed airline globally.

She joined AirAsia as the Director of Corporate Finance and her portfolio expanded quickly to also include Treasury, Fuel Procurement and Investor Relations functions. Today, she oversees close to 7,000 staff at AirAsia Berhad, across 18 hubs in Malaysia, Thailand, Indonesia, Philippines and India; serving over 100 destinations across the region with a fleet of 170 Airbus A320. Reporting directly to the co-founders of AirAsia; Tan Sri Dr. Tony Fernandes and Datuk Kamarudin Meranun; Aireen plays an integral part in mapping out AirAsia's growth plans and maintain its trajectory despite increased competition around the region. She began her career at Deutsche Bank Securities Inc, in New York.

Her last position being at the Equity Arbitrage Proprietary Trading Desk focusing on international equities, equity derivatives and equity-linked products, she returned to Malaysia in 2001, and served several major local financial institutions including the Maybank Group. A recipient of the 'Outstanding Achievement' Award (CEO category) at the inaugural Malaysian Women of Excellence 2014 awards and the 'Masterclass Woman CEO of the Year' award at the inaugural Selangor Excellence Business Awards 2014, Aireen continues to push the envelope of the region's aviation industry with her determination, as she keeps AirAsia focused on its mantra; 'Now Everyone Can Fly'.

Tulsi Nowlakha Mirchandaney
Managing Director, Blue Dart Aviation

Tulsi Nowlakha Mirchandaney is the Managing Director and Accountable Manager for Blue Dart Aviation, South Asia's largest domestic express cargo airline with a fleet of 4 B757-200 and 3 B737-200 freighters. She is accountable for the operations of the airline, including the flight operations, maintenance and ground handling activities. Blue Dart Aviation undertakes scheduled operations to India's seven major metros – Kolkata, Delhi, Mumbai, Bangalore, Chennai, Hyderabad and Ahmedabad and operates charters across the country and within the region.

Tulsi has an MBA degree in International Aviation from Concordia University, Montreal, and has presented a research paper on aviation education.

Tulsi has been actively associated with the airline and express industry in India for over 30 years. Tulsi moved to Blue Dart Aviation from Blue Dart Express, where she is credited with creating and marketing the air cargo products for the launch of Blue Dart Aviation, including major accounts and interline agreements with international airlines, initiating charter services and setting up the accounting, sales and operations systems for these services.

Prior to joining Blue Dart Aviation in 2008, she was the Senior Vice President – Marketing and Projects for Blue Dart Express. She has been instrumental in brand development activities in the company, and developed the industry segment module used in-house for marketing research.

Michele van Akelijen
Managing Director, F&E Aerospace

Michele van Akelijen is the Managing Director of F&E Aerospace, a division of F&E, one of the most influential and long-standing names in the Middle East's events sector, delivering world-class international trade events including the internationally-acclaimed Dubai Airshow. F&E is a member of Tarsus Group plc. Michele is an experienced Aerospace and Defence Event professional with 26 years' of experience in the event industry. Michele took over the management of the entire Aerospace portfolio as a Managing Director in February 2013.

Since joining F&E Aerospace in 2006, Michele has been instrumental in developing the company's expanding aerospace events portfolio which includes Dubai Airshow Gulf Aviation Training Event (GATE), MEBAA Show Morocco, Aircraft Interiors Middle East (AIME), Maintenance, Repair and Overhaul Middle East (MRO ME) and MEBAA Show.

Michele works closely with international aerospace associations and acts as one of F&E Aerospace's spokespersons for the aerospace sector, travelling the world to promote the company's events.

Prior to joining F&E Aerospace, Michele began her career in the USA with companies such as TWI and then moved to the UK in a senior management position with Premier Showfreight where she handled key clients such as Gulfstream, DMA – Defence Manufacturers Association and Boeing.

M.Sathiyavathy
Directorate General of Civil Aviation, India

M.Sathiyavathy was on January 5, 2015 appointed as the Director General of Directorate General of Civil Aviation (DGCA), thus becoming the first woman to be appointed so. She is a 1982-batch officer of the Indian Administrative Service (IAS). She was earlier Chief Secretary in the Puducherry government. Since February 2014 she had been the Additional Secretary and Financial Advisor in the Civil Aviation Ministry. She will hold the DGCA post till January 28, 2017.

The US Federal Aviation Administration had last January downgraded the DGCA due to poor regulatory oversight. So it has been Sathiyavathy's first task as DGCA to take India's aviation safety oversight back to its ranking. It would be her responsibility to ensure that airlines and airports operating in and from India match global standards.

Women in Aviation

Laila Ali Bin Hareb Al Muhari
Executive Director, Strategy & International Affairs,
UAE General Civil Aviation Authority

A corporate strategist with vast experience in developing and implementing strategic direction for major organizations in the public sector, Laila Hareb is the first Arab lady to hold a vital strategic position in the MENA region. Her areas of expertise extends over a variety of management sectors such as Strategic Planning, organizational development, corporate performance functions, quality & excellence and stake holder relationship management.

Her previous experience and achievements include developing a three year Corporate Strategy Plan and Balanced Score Card, development and implementation of CRM strategy for national transportation where as the Director-Strategy and Corporate Performance, she was instrumental in establishing performance standards as well as strategic and planning excellence in the organization. Laila Hareb undertook major restructuring projects for various organizations. She undertook project management such as UAE Aviation Fees and Charging Restructuring. She also brings a wealth of experience in the areas of Information Technology, Training, Corporate Marketing and communication. She initiated and personally managed training programs for aviation personnel in different continents, notably training for ladies in aviation.

Laila Hareb joined the General Civil Aviation Authority (GCAA) in September 2009 to lead its Strategic Planning and Corporate Excellence Department. In a little over two years since she began her work at the GCAA, it has been awarded the prestigious Sheikh Khalifa Government Excellence Program (SKGEP) award in recognition of its best practices in the areas of Strategic Planning and Performance Management systems. In addition to this, it was also recognized as the government entity for the most improved performance.

Barbara Baumgartner
Managing Director, FAI rent-a-jet AG, DMCC Branch

Barbara Baumgartner entered the aviation industry in 1991 when she started to work with Tyrolean Airways in her native Austria. In 1997 she along with her husband moved to Dubai. She was offered the position of head of the family office for a Saudi Minister and his Business Conglomerate. During her tenure here, Baumgartner was amongst others in charge of Asset Management, private aircraft operations and gained further experience in aircraft and yacht acquisitions and sales.

In January 1993 she joined FAI rent-a-jet AG as the Local Representative for the Middle East. Since FAI opened its branch office in Dubai in December 2011, Baumgartner became the Managing Director of FAI rent-a-jet AG, DMCC Branch in Dubai. Her long-standing experience in the Middle East has proved to be an invaluable asset in growing FAI's business exponentially in this dynamic region.

Mervat Sultan
Co-founder, RamJet Aviation Support

Mervat Sultan is one of the first women in the Arab World to obtain a FAA GCAA flight dispatch license. She co-founded RamJet Aviation Support, an haute couture aviation support company providing flight support services, in 2001.

She has since then successfully handled numerous flights world-wide. She is also the co-founder and President for Women in Aviation, Middle East Chapter. She seeks to be the premier gateway for women in the Middle East to achieving lucrative careers and educational opportunities in the aviation and the aerospace industry through the organization Women in Aviation. The organization also aims to be a platform to bring successful women who have made their mark in the aviation industry to mentor and be a source of inspiration for women aspiring to be a part of the growing aviation sector. A passionate flyer, Ms Mervat is always looking to hone her flying skills while she is not working.

Sheena Boisgelin
Country Head, VistaJet India

Sheena Boisgelin is the India head for VistaJet, one of the biggest operators of private jets. Prior to that, she was Yves Saint Laurent's muse for seven years, modeling for niche brands such as Chanel, Dior and Valentino across Europe. But Sheena de Boisgelin then moved on to acquire an MBA and work with British multinational firm International Computers and French aircraft manufacturer Dassault Aviation. She has since been strategic advisor to many firms.

"I am currently shuttling between Paris and India," she says. Her mandate is to rope in ultra high net worth individuals to charter VistaJet's aircraft. Boisgelin says she has identified quite a clutch of them already. The firm will get two India registered aircraft soon and plans on getting into partnership with an Indian player for domestic operations.

VistaJet globally has positioned itself as an on-demand company for ultra high net worth individuals, entrepreneurs and corporates who fly regularly between 50 to 500 hours per year. "We will have enough numbers in India for that type of clientele and initial discussions are encouraging," says Boisgelin.

Women in Aviation

Liana Coyne
Director, Coyne Airways

Liana Coyne is a Director at Coyne Airways and is currently based at the all-cargo airline's Dubai hub in the UAE. London-headquartered Coyne Airways, which this year celebrates its 20th anniversary, was founded by her father, Larry, and offers scheduled services to complex destinations, as well as offering charters to destinations worldwide.

Liana helps oversee Coyne's operations throughout the Gulf and Central Asia, as well as the more difficult-to-reach destinations which the airline specializes in serving, such as Afghanistan and Iraq. She was recently a member of the management team which launched the airline's new routes into Africa as part of Coyne's ongoing expansion programme.

Liana graduated with a degree in Politics, Philosophy, and Economics from Oxford University, and went on to become an English-qualified solicitor. She worked for international law firm Baker and McKenzie in both their London and Hong Kong offices for six years, during which time she co-authored a number of articles on legal subjects. In 2010, Liana decided to make the transition to join the family business and move to Dubai.

She has a passion for learning languages which include Spanish, Russian, French, Italian and Japanese, and hopes to be able to converse in Arabic one day.

Capt. Aysha Al Hameli
Permanent Representatives of the United Arab Emirates on the International Civil Aviation Organisation (ICAO)

Capt. Aysha Al Hameli has over 16 years of civil aviation experience covering aviation safety, security, environmental protection, regulations, international negotiations and strategic management. Since 2009, Capt. Al Hameli has been the Representative of the United Arab Emirates (UAE) on the Council of the International Civil Aviation Organization (ICAO) and has held many important roles.

She was elected Chairperson of ICAO's Human Resources Committee, Chairperson of the Market Based Measure (MBM) Ad Hoc Working Group, Vice President of the ICAO Council, Vice Chairperson of the Committee on Unlawful Interference, and Vice Chairperson of the Air Transport Committee. Moreover, she served as the Arab Civil Aviation Commission (ACAC) Council members' coordinator for 2010-2013. She introduced the concept of Strategic Performance Management in ICAO and facilitated workshops for the Council and ICAO Secretariat. In 2009, she also represented ICAO at COP 15 in Copenhagen.

Capt. Al Hameli has led more than 80 international air services negotiations and UAE delegations at high-level diplomatic meetings. She set up the Air Transport Department at the UAE GCAA and spearheaded the connectivity strategy for the State.

As the first female pilot in the UAE, Capt. Al Hameli's work has inspired many women from the region to pursue careers in aviation. She has a Master of Science in Air Transport Management from City University of London and a degree (BA SBS) in International Studies from Zayed University in Abu Dhabi. She is a qualified commercial pilot and certified flight instructor.

J Manjula, outstanding Scientist, has been appointed as the Director General, Electronics & Communication Systems cluster, Defence Research & Development Organization. She assumed charge from distinguished Scientist & Director General Dr. KD Nayak, who was holding Additional charge as Director General (Electronic & Communication Systems).

Manjula has the honour of being the first lady Director General of DRDO cluster. She has been leading Defence Avionics Research Establishment (DARE) one of the Establishment of DRDO as a Director since July 2014. She is an alumna of Osmania University and a practicing Electronics & Communications engineer. She had a brief stint in Electronics Corporation of India Ltd before joining DRDO, from 1987. She has served in Defence Electronics Research Laboratory, (DLRL) Hyderabad for over 26 years in the area of Integrated Electronic Warfare. She has designed and realized fast signal acquisition receivers, high power RF systems, responsive jammers, controller software etc for various systems inducted in Army, Navy, Air Force and Paramilitary. She has vast experience in EW systems design & deployment in wide area network and her specialization includes configuration of Communication & Radar ESM and ECM systems.

She is a recipient of DRDO award for 'Performance Excellence' and 'Scientist of the Year 2011'. She is also the recipient of India Today Woman Summit award for 2014.

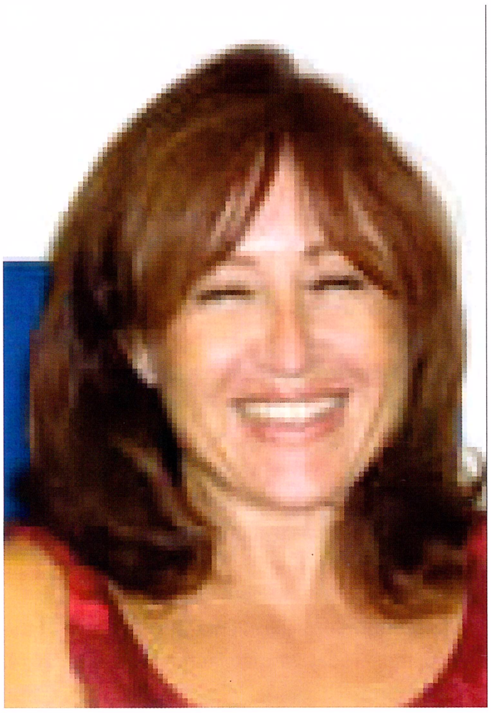
Nadia Abdul Aziz
Managing Director/ Partner UNASCO, Secretary General of the National Association of Freight & Logistics (NAFL)

Women in Aviation



Athina Kapeni
Vice President Global Marketing and Sales,
Celebi Aviation

Athina Kapeni joined Celebi Aviation Group in 2010 as the Global Sales and Marketing Director. In July 2013 she was promoted to the role of Vice President, Global Marketing and Sales. Ms. Athina's responsibilities, in her current role include co-ordination, monitoring of marketing (systems, processes, pricing, branding) and sales (key account management, negotiations, CRM etc.) for each and every company operating under the Çelebi group. In a nutshell, she is responsible for standardization/streamlining corporate systems, to maximize customer satisfaction.

A law graduate from Kapodistrian University in Athens, Athina obtained her post graduate degree in International Relations and Political Sciences. With over 25 years of experience in various fields like aviation management, business of ground handling and ancillary segmented services marketing, sales and operations, Athina has worked in Olympic Airways' ground handling and cargo business sales at 23 Greek airports and 43 international stations.

Athina, originally is from Greece and loves swimming, writing and travelling.

Divya Tekchandani
Director for Airglow Aviation Services FZC

Divya Tekchandani, started her career with Emirates Airlines as a Passenger Service Assistant in 1992 which laid a strong foundation to her career in the aviation industry. In 1998, she joined Yemenia as a Passenger Station Supervisor, which gave her a platform to grow further in the industry. Yemenia did not carry cargo or courier then which forced me to think on those lines. Meanwhile she was promoted as the Cargo Sales & Operations Manager in 2008 and began the Yemenia cargo office in Dubai. The cargo sales witnessed massive growth under the leadership of Mrs. Divya. However due to unrest and unstable situation in Yemen, Mrs. Divya resigned from the company only to start her own venture: Airglow Aviation Services FZC in May 2011.

Airglow Aviation, a two profiled company has one vertical operating as adhoc/schedule charters and another acquiring GSA/CSA of different airlines. Mrs. Divya is the director of the company which is jointly partnered with Mr. Rohit Thakwani. Her responsibilities include offering of complete GSSA services to the airliner partners by maximizing cargo space capacity on each flight thus generating higher sales yield. She is also responsible for generating ancillary revenue through the effective sales and support of Cargo Charter services.

Rasha A. Al Roumi
Chairperson & Managing Director, Kuwait Airways

Rasha Abdulaziz Al-Roumi was appointed as the Chairperson and Managing Director of Kuwait Airways on 4th December 2013. She joined the company as the Assistant Legal Director – Insurance. A Bachelor's degree holder in Insurance, Mrs. Rasha has been instrumental in implementing a tough strategy to turn around the company. She spearheaded the cause to revamp the company as she signed deals to buy new aircrafts etc. She was lauded for her efforts in upgrading the entire fleet of Kuwait Airways, which was the oldest in the region. Mrs. Rasha had maintained that the step that will save tens of millions on maintenance each year and also improve the airline's fuel efficiency, reliability, staffing requirements and appeal.

Carolyn McCall OBE
Chief Executive Officer, EasyJet Airline Company Ltd

Carolyn McCall joined easyJet on 1 July 2010 as Chief Executive Officer. Since joining easyJet, Carolyn has been responsible for improving the airline's punctuality to industry-leading levels as well as introducing important customer innovations like allocated seating. Her strategic focus has resulted in a series of milestone events including reaching the landmark of carrying 65m passengers annually and attracting more business travellers, with more than 12m now flying with easyJet each year – always ensuring easyJet provides easy and affordable travel for all. Under Carolyn's leadership easyJet has consistently exceeded City expectations. 2012 saw the company achieving record profits and paying a dividend for the first time and in 2013 the company entered the FTSE 100. In 2013, Carolyn led a rigorous evaluation process and obtained shareholder approval for the purchase of 135 Airbus aircraft.

Prior to joining easyJet, Carolyn was Chief Executive of Guardian Media Group plc. She was also was non-executive director of Lloyds TSB (from 2008–2009) and was a non-executive director of Tesco Plc (2005-2008), and of New Look plc (1999-2005). She was Chair of Opportunity Now (2005-2009) and a former President of Women in Advertising and Communications London (WACL).

Carolyn was awarded the OBE for services to women in business in the Queen's Birthday Honours List in June 2008. In April 2008 she was named Veuve Clicquot Business Woman of the Year. In 2013, Carolyn McCall was awarded the Airline Business Airline Strategy Award for Low Cost leadership. In the same year Carolyn was awarded City AM's Personality of the Year award along with the Gold Medal Award from the Chartered Management Institute for her work in management. In 2014 she was the winner of the Business Achievement Award at the British Travel Industry Hall of Fame Awards. She graduated from Kent University with a BA in History and Politics and from London University with a Masters in Politics.

Women in Aviation

Fatima Beyina-Moussa

CEO, Equatorial Congo Airlines (ECAir)

Fatima Beyina-Moussa is the Chief Executive Officer (CEO) of Equatorial Congo Airlines (ECAir), the national airline of the Republic of Congo. She has been appointed CEO ever since the airline was formed in March 2011.

A graduate of HEC-Montreal (Bachelor in Business Administration), Fatima also holds an MBA (University of Ottawa) and a Post-Graduate degree in International Economics (Institut d'Etudes Politiques de Paris, Sciences-Po).

Before ECAir was formed, Fatima served as the Economic and Reforms Adviser to the Minister of Finance of the Republic of Congo. In that capacity, she worked on the creation of the National Airline and also managed the restructuration of the National Insurance Company in 2010 (she was appointed Chairperson and CEO of the Congolese state-owned Insurance Company, for the purpose of the restructuration). Fatima began her career as a Financial Auditor with Ernst and Young, Congo. She later joined the Central Bank of Central African States (BEAC) as a Manager in various divisions, before her recruitment at the United Nations Development Program (UNDP) Headquarters in New York as an Economist in the Special Unit for South-South Cooperation.

AS the CEO of ECAir, for the past four years, Fatima and her team have been working hard to materialize the goal of the Congolese government: transform Brazzaville Maya airport into an international hub.

ECAir operates flights from its Brazzaville base to domestic (Pointe-Noire and Ollombo), regional (Douala, Cotonou, Libreville, Dakar, Bamako) and intercontinental destinations (Paris, Beirut and Dubai). In the coming months, the arline intends to connect Brazzaville and Pointe-Noire to Yaoundé, Abidjan, Luanda, Bangui and Ndjamena.

Jayne Hrdlicka

CEO Jetstar Group

Jayne Hrdlicka was appointed Jetstar Group Chief Executive Officer in July 2012. Jayne joined Qantas in August 2010 as Group Executive Strategy and Information Technology.

Jayne is a former senior partner with Bain & Company in the firm's Customer Strategy and Marketing Practice, and led Bain's Customer Practice for the Asia region. She was also an inaugural member of Bain's Global Women's Leadership Council.

Early in her career, Jayne left consulting and spent six years as an executive and was subsequently the CEO of two publishing and marketing related businesses. She later returned to Bain as a senior leader in the Australian practice.

Jayne holds an MBA from Dartmouth College, New Hampshire USA and a Bachelor of Arts degree in Mathematics and Economics from the Colorado College, Colorado USA.

In addition to her role at Jetstar, Jayne is also a Non-Executive Board Director of Woolworths Limited, Australia's largest retailer, a member of Chief Executive Women and a member of the Scotch College Council in Melbourne.

WORLD LOW COST
AIRLINES CONGRESS

Xiuzhi Zhang
Chief Executive Officer , Spring Airlines

Zhang Xiuzhi was born in 1964. During the period 1983 -1992, Ms. Zhang Xiuzhi served for textile industry in Shanghai. In 1992 she entered into tourism industry, in Shanghai International Travel Service, she was responsible for tour business, administration of subsidiaries, charter flights and product development.

Since 1994, Shanghai International Travel Service has been ranked the 1st in China's domestic tourism industry. In 2004, she has been CEO of Spring Airlines, the first low-cost airline carrier in China.

Maj Al Mansouri
UAE's first female fighter pilot

Maj Al Mansouri became the UAE's first female fighter pilot in 2007. She is a pilot of an F-16 fighter for the Air Force, and a highly trained, combat-ready pilot and wing leader. Maj Al Mansouri was one of the first women to join the Air Force Academy. She has been the recipient of the Mohammed bin Rashid Pride of the Emirates medal.

2015-end also saw her receive an award at the United Nations Headquarters in New York for 'battling stereotypes, and terror, from the air'. She was among nine people who received the Asia Society's Game Changer Award.

A graduate of Khalifa bin Zayed Air College in 2007, Maj Al Mansouri has an undergraduate degree in English literature. She was the first woman to enroll in the UAE Air Force when it opened its doors to women. As a teenager growing up in the United Arab Emirates, Mariam Al Mansouri dreamt of becoming a pilot for her country's military. But she faced a lot of problems as women were not allowed to be employed in the military. But eventually that changed and the country allowed women to join military.

Associations in Aviation

Ali Ahmed Alnaqbi
Founding Chairman - MEBAA

Ali Ahmed Alnaqbi is the Founding Chairman of the Middle East & North Africa Business Aviation Association (MEBAA), Dubai, United Arab Emirates. Alnaqbi has over 25 years of experience in the aviation industry. He began his career in the high-profile segment of VIP air transportation at Presidential Flightas the Vice President of Finance & Administration before diversifying his interest into business aviation with a specific emphasis on the Middle East and North Africa region.

His pioneering spirit and entrepreneurial mind led to the creation of Royal Jet, a business aviation venture of which he was the Founding Managing Director. Aircraft Purchase, Sale, Lease and VIP interior completion are the core areas that make Alnaqbi's numerous years of aviation experience holistic in nature and therefore he is regarded as a highly respected, and often consulted, knowledge base. Alnaqbi is an elected member of the International Business Aviation Council (IBAC) and currently sits on the board of a number of International companies in the business aviation industry.

Through MEBAA, Alnaqbi has led the MENA region into a tremendous growth rate by breaking barriers for effective communication among members of the business aviation industry. His dedication to the field extends to humanitarian initiatives that benefit from a fast passed growth, such as supporting the World Food Program's (WFP) fight against hunger through the creation of the Fly & Feed donation program in partnership with MEBAA. Alnaqbi is an avid reader and eloquent speaker in addition to being an impactful writer and presenter as is evident by the media's appreciation for his articles and his reoccurring participation in various forums and panel discussions.

Francesco Violante
Chief Executive Officer, SITA

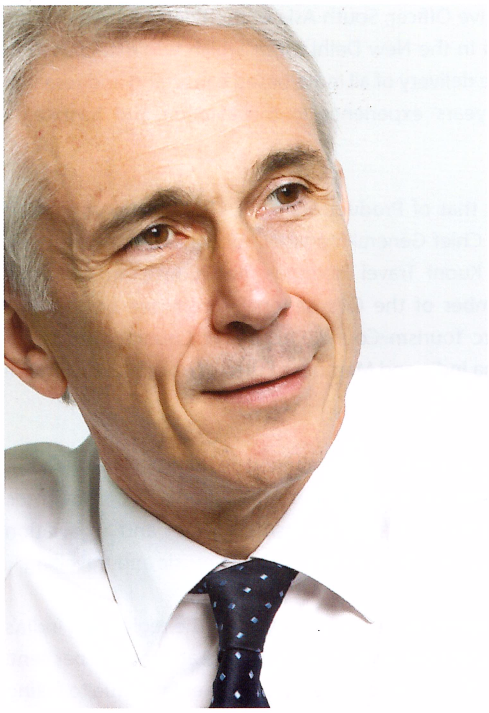
Francesco Violante was named CEO of SITA in 2006. Under his leadership, SITA has undergone a dramatic transformation with the merging of previously separate entities into a single company, delivering complex IT solutions to the world's air transport community.

Francesco's vision is to strengthen SITA's position at the heart of the air transport industry by using technology to solve industry and business issues. To this end, he championed the formation of SITA OnAir to help realize the full potential of the connected aircraft, initiated the creation of the SITA Lab as a world class R&D facility and oversaw the opening of a software center of excellence in Letterkenny, Ireland.

Francesco has grown the company to achieve consolidated revenues of US$1.71 billion in 2014 and employ over 4,500 staff in 200 countries and territories. SITA won over US $1 billion worth of new business contracts for the first time in 2006 and has repeated this achievement every year since.

A hallmark of his leadership has been his ability to forge new alliances for the company with prestigious industry partners such as Airbus, Cargolux and Orange Business Services. He has also strengthened SITA's technology leadership position with a series of acquisitions, including the purchases in 2010 of WorkBridge A/S and Com-Net Software. Previous acquisitions have included Vancouver-based SMG Technologies, Dublin-based Eland and Sydney-based CPS, which have given an innovative edge to the company's portfolio of solutions.

Francesco is a computer science graduate with a solid background in IT and Telecommunications. He started his career at Digital as a software specialist and rose through the ranks on the way to becoming Vice President for the Telco Industry World-Wide and then Vice President for Sales and Marketing, Europe.



Tony Tyler
Director General & CEO
International Air Transport Association (IATA)

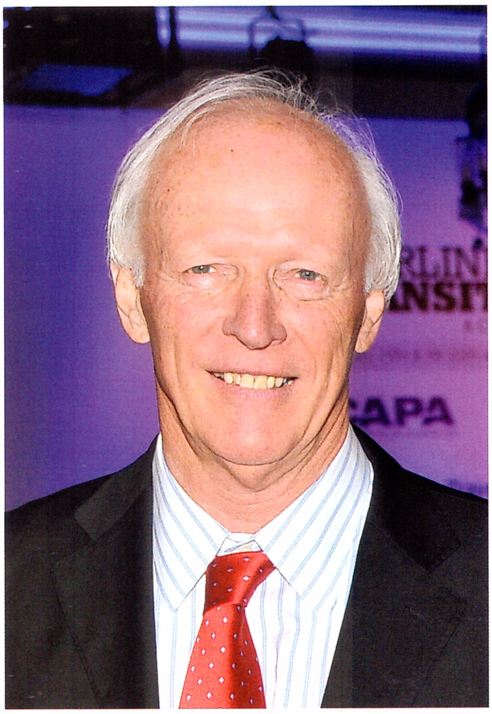
Tony Tyler became the sixth person to lead the International Air Transport Association (IATA) when he took on the role of Director General and CEO from 1 July 2011.

With over three decades of airline industry experience, Tyler is a strong advocate for a safe, secure, efficient and sustainable global air transport industry.

Tyler is keen to engage all aviation stakeholders to achieve common goals. This is evident in two projects which IATA is championing under his leadership. IATA is working with governments and industry stakeholders around the world to develop an airport Checkpoint of the Future. The aim is to improve security while removing the hassles that passengers face today. Similarly, IATA is working with multiple industry participants on a New Distribution Capability that will modernize the way that travel products are distributed.

Prior to joining IATA, Tyler built his career at John Swire & Sons in Hong Kong. He joined the company in 1977 and in 1978 moved within the Swire Group to Cathay Pacific Airways, rising to the position of Chief Executive (2007 to 2011). During that time he served on the IATA Board of Governors, including as its Chairman from June 2009 to June 2010.

Tyler, a British national, was born in Egypt in 1955 and graduated from Oxford University in Jurisprudence. He has broad international working experience in Australia, Canada, Hong Kong, Italy, Japan, the Philippines and the United Kingdom. At IATA, he works from both its main offices in Montreal, Canada and Geneva, Switzerland. He is a Fellow of the Royal Aeronautical Society.
Mr. Tyler will retire from his post in June 2016.



Peter Harbison
Executive Chairman, CAPA - Centre for Aviation

Peter Harbison is Executive Chairman of CAPA-Centre for Aviation (formerly the Centre for Asia Pacific Aviation), which is today the world's largest publisher of B2B commercial aviation information and analysis. Peter established CAPA in 1990. It now produces the leading range of executive analysis, numerous newsletters, data and information reports, covering the global airport, air navigation services and airline industries. CAPA's Knowledge Centre also presents major conferences on key aviation topics and provides education and training courses for the aviation and tourism industries.

Peter is an aviation lawyer, consultant and commentator on industry issues. He frequently speaks at industry events and presents private high-level executive briefings to airlines, airports, suppliers and consultants.

His career in aviation comprises more than 40 years, in government and in industry, including two years with the Australian mission to the International Civil Aviation Organisation in Montreal and 10 years at a senior level in the International Air Transport Association, IATA, in Geneva.

Over the past 20 years, he has conducted more than 200 consultancy projects in aviation, including airport privatizations, airline startups, strategy formulation and regulatory development. He has authored and/or edited numerous reports on the aviation industry, including a recent comprehensive 300-page report on the global low cost airline industry. Peter Harbison was formerly Chairman of IATA's World Aviation Regulation Monitoring Group, President of the Aviation Law Association of Australia and New Zealand and an IATA Travel Agency Commissioner. He holds LLBs from Melbourne and London Universities and LLM (McGill).

Associations in Aviation

Kapil Kaul

CEO, South Asia, Centre for Asia Pacific Aviation (CAPA)

Kapil Kaul is the Chief Executive Officer, South Asia of the Centre for Asia Pacific Aviation (CAPA) and is based in the New Delhi office which was established in 2003. He is responsible for the delivery of all India-based consulting and research projects. He has nearly 25 years' experience in the aviation and hospitality industry.

Kaul's previous roles include that of Product Manager, ITC-Welcomgroup; Vice President, East West Airlines; Chief General Manager, Air Sahara; Vice President, Crown Air; Project Advisor, Kuoni Travel Holdings; and Consultant, Aviation Resources Group. He is member of the CII's national committee on aviation, Goodwill Ambassdor of Saarc Tourism Council, Academic Council Member of UPES, Vice-President of Apama India and Member of the advisory board of Kuoni Travel Academy.

A BSc holder from Kashmir University, Kaul ranked in an ITC management programme and holds IATA certifications. Kaul is married and has a daughter. He speaks Hindi and English and is a keen sportsman, writer and an aviation commentator. Leisure activities include listening to Indian music and travelling.

Kapil Kaul provides incisive analysis on aviation markets in the region. On India's growth story, he states "We expect domestic growth in FY16 at about 15 per cent. We are seeing a combination of economic recovery and lower fares due to falling fuel prices. Lower fares are stimulating growth to higher-than-expected levels and will continue in the near term especially in the September quarter but impact on yields is visible."

Abdul Wahab Teffaha

Secretary General- Arab Air Carriers Organisation

After his post-graduate studies in Socio-Economic Development & Political Sociology, Abdul Wahab Teffaha joined Arab Air Carriers Organisation (AACO) as an Assistant Tariff Analyst and rose in the ranks to become Assistant Secretary General in 1992.

He was elected Secretary General of AACO in June 1996 and still serves in this capacity.

In his career he participated and spoke at a large number of international and regional conferences. Teffaha helped in transforming AACO into an effective regional association with added value services to its members.

Hani El- Assad

President, Middle East, India & Africa, (MEIA) SITA

Hani El-Assaad was appointed President, Middle East, India & Africa (MEIA), in March 2012. Prior to this Hani was Regional Vice President, Sales and Relationship Management SITA, covering the Middle East and North Africa, a role he held from 2006.

Hani joined SITA in 1995 as Sales Manager for the Middle East and ascended from Regional Sales Director in 1998 to Vice President Business Management Network Services for Middle East and Africa. Hani has a strong background in sales, business finance and marketing. He holds a Masters degree in economics from St. Joseph University, Beirut and an MBA from Ecole des Hautes Etudes Commerciales (HEC), Montreal. He is based in Beirut, Lebanon.

SITA is the world's leading specialist in air transport communications and IT solutions. SITA delivers and manages business solutions for airline, airport, GDS, government and other customers over the world's most extensive network, which forms the communications backbone of the global air transport industry.

Raymond Benjamin

Secretary General, ICAO

Raymond Benjamin is the Secretary General of the International Civil Aviation Organisation since August 2009. The Council of ICAO appointed Benjamin as Secretary General of the Organisation for a second time in August 2012.

His extensive career in civil aviation spans more than 30 years. It includes 13 years as Executive Secretary of the European Civil Aviation Conference (ECAC) where he was responsible for the development of policy advice and strategic options to the President and to the 42 Member States of the Conference. Prior to joining ECAC, Benjamin was the Chief of the Aviation Security Branch of the Air Transport Bureau of ICAO from 1989 to 1994. Among his responsibilities was the provision of advice to the Secretary General and the President of the Council on security policy matters and the development of a worldwide airport assessment and technical assistance programme. He also served as Air Transport Officer and Deputy Secretary of ECAC from 1982 to 1989 and held various positions in the Civil Aviation Administration of France from 1973 to 1982.

Benjamin holds a Master's degree in Public Law and Diplomas from the Institute of Political Studies and the Institute of Higher International Studies, Paris.
A French citizen, he was born on 24 November 1945, in Alexandria, Egypt.

WHO'S WHO
IN THE AVIATION INDUSTRY

Ajay Singh
Chairman & Managing Director
Spicejet

After a major turbulence in India's low cost carrier SpiceJet in the last few years, the baton changed hands in the beginning of 2015. Ajay Singh, the founder-cum-promoter of SpiceJet, is back with the airline as Chairman and Managing Director, following the exit of Kalanithi Maran of the Sun Group. The airline was in a major crisis before Ajay Singh took over.

SpiceJet is India's fourth largest airline by number of passengers carried with a market share of 12.3 per cent as of July 2015. The airline operates over 270 daily flights to 41 destinations, including seven international cities using a mixed fleet of dry and wet-leased Airbus A319, Boeing 737 Next Generation and Bombardier Dash 8 Q400 aircraft.

After reviving and taking over the airline SpiceJet's founder-cum-promoter Ajay Singh has infused a tranche of USD 60 million in mid-May, on top of the USD 82 billion he invested after taking over the airline earlier this year.

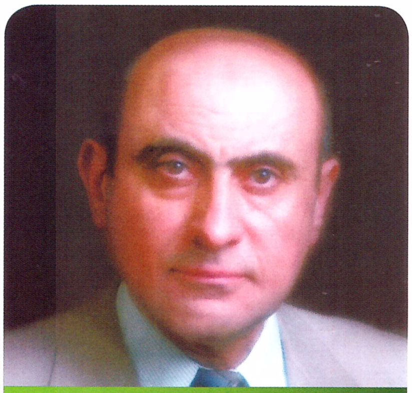
Under a detailed plan to bolster its fortunes, SpiceJet's immediate priority is to further "regain consumer confidence" before embarking on fleet expansion. "SpiceJet is on a highly visible upswing again and funding requirement depends on how much the company needs," Ajay Singh has said.

Bachi Spiga
DHL, Head of Operations, Middle East and North America

Bachi Spiga joined DHL Express more than two decades ago. He currently holds the position of Vice President-DHL Express Middle East and North America. He oversees the operational infrastructure, performance in the region across 19 markets, including the Road Network with over 3000 operational staff daily servicing the Air, Road and Ground Network.

During his time, Bachi has overseen the expansion of the air and road networks as well as the rapid expansion of DHL's footprint in the Middle east and North Africa over the last 14 years, along with market leading performance and service enhancements, the regional hubs in Dubai and Bahrain (DHL regional head office), commercial air partnerships and customer services at various times during his tenure.

Prior to this, he was the Country Services Manager for DHL International UAE for 3 years. He was also involved in other various managerial roles including Customer Service Manager for the Middle East, General Manager in East Midlands UK and Hub and gateway Manager in Italy. Bachi is dual British and Italian national and is married with three children. In his leisure time, he enjoys skiing and playing football.



Baha E Hadid
Owner & President, Hadid International Services

Baha E Hadid stepped into the aviation industry more than 3 decades ago and founded Hadid International Services to fill the gap within the aviation industry. He is a pioneer in the field of aviation services in the MENA region.

He noted, "Over the past 30 years, Hadid has been committed to staying ahead of the curve and this commitment has paid off. The company is proud to have long standing relationships with its clients, suppliers, partners and Civil Aviation Authorities around the world."

Hadid provides flight support services such as overflying and landing permits at short notice, superior ground handling services, fuel at competitive rates, state-of-the-art flight planning and tailor made charter brokerage across the globe for airlines both passenger and cargo, private and business operators, medevac (Ambulance) flights, VIP flights, Amiri/Royal flights.

The company is headquartered in Dubai, UAE, with branches in Algeria, Niger, India and Pakistan, in addition to a worldwide network of representative offices. This network gives Hadid a global reach across seven continents.

Theo Reichert
Chief Executive Officer,
Supreme Group

Theo Reichert is Supreme Group's Chief Executive Officer (CEO), responsible for managing the provision of fully integrated end to end solutions across the company's global supply chain.

Prior to becoming CEO, Theo held the position of Chief Operating Officer, managing Supreme's organizational functions of Procurement, Transportation Operations, Site Services, and QHSE (Quality, Health, Safety and Environment). Theo managed the formulation and implementation of solutions that guaranteed rapid mobilization and consistent delivery, to ensure consistent customer satisfaction.

Following a period of military service with the German Bundeswehr, Theo graduated with an MBA from Cologne University and started his career with the global brand Kimberly-Clark. After this, he moved to a FTSE 50 multinational company in the concrete industry where he rapidly progressed to Group CFO level. Throughout his impressive career, which has spanned the EMEA region, Theo has held a number of senior management and consultancy positions, specializing in finance, marketing, mergers and acquisitions, biotechnology and global logistics.

Drawing on more than 25 years of management experience, Theo contributes a comprehensive knowledge of industry best practices with a strong focus on international development and business growth via the creation of efficiencies and integration.

Charles G Hajdu
Acting General Manager, Fujaraiah International Airport

Charles Hajdu joined Fujairah International Airport's management team in 2008 as the Strategy and Business Development Manager following a 30-year career with Blue Chip Company, BAE Systems and its predecessor company British Aerospace. Charles was promoted to the role of General Manager in 2012. During his tenure, he successfully implemented Operations Group to manage regulatory compliance and safety management.

Trained as an engineer, Mr. Charles began his aviation career as an aeronautical engineer at the British Aerospace production and test flying airfield at Woodford, UK in 1978 where he was involved in the design and initial technical studies for future projects such as the Future Military Airlifter that later became the Airbus A400M.

Recognizing his customer focus skills, Charles was transferred to the Operations Support Department of British Aerospace Civil Aircraft Division in 1988 where he supported the entry into service of many BAE aircraft such as the ATP, 146, Avro RJ, Jetstream 31 and 41 and Airbus A300 Freighter conversions.

In 1997, Charles co-founded a specialist group of airline, airport and business operations experts, providing aviation consultancy advice, both internally and to customers of BAE Systems. It was during this period that Charles first encountered Fujairah International Airport in 2003.

Mr. Charles has a Masters degree in Business Administration from Open University. He also completed his Mechanical Engineering (Aeronautical Bias) from the Stockport College of Technology between 1978 and 1981. A passionate flyer, Mr. Charles is also a private pilot licence holder. His other hobbies include hill walking, maintaining and riding old motorcycles, managing junior football team etc.

Christian Tabet
General Manager,
BP Middle East

Christian Tabet is General Manager of BP Middle East, the regional downstream business of BP as well as the performance unit leader for Air BP Middle East and Africa. In his role, Christian is responsible for Air BP's businesses in all facets within this geography and represents BP as Director on a number of joint venture boards.

His passion is aviation in all its facets, having grown up in an aviation family. Tabet has completed a number of flight hours and hopes to become a licensed private pilot. He holds a Bachelor of Engineering degree in Mechanical Engineering from the Imperial College of Science and Technology in London, England.

Dr. S.Christopher

Mittu Chandilya
CEO
Air Asia India

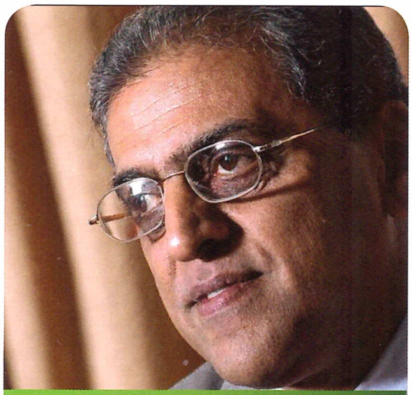
Mittu Chandilya is the CEO of AirAsia India, a joint venture between AirAsia Berhad, Tata Sons and Telestra. AirAsia India started operations on 12 June 2014. Mittu Chandilya is also the owner of the Bangalore franchise of the Champions Tennis League India.

Mittu Chandilya was born on September 22, 1980 in Chennai, India. He did his schooling at Rishi Valley School, Andhra Pradesh and then at The School, KFI, Chennai. Chandilya then studied at the Lehigh University (Pennsylvania) before doing his MBA at INSEAD (France-Singapore).

At the age of 19, he won a grant for a start-up and the prototype he built was bought by an FMCG company for a huge sum. "With the money, I purchased a house for my parents (who now live in Canada), sent my sister to university and paid up my loans. At 23, I was the general manager of a company which I had helped out with successful mergers and acquisitions. My first assignment was shutting down a plant in Colorado and moving it to Mexico for cost reasons. Imagine interacting with the union and people as old as my dad who thought I was denying them a livelihood.

It was tough, but I managed to build credibility," states Mittu Chandilya. Mittu Chandilya became the CEO of AirAsia India in 2013 at the age of 32. Mittu Chandilya is married to Inga Chandilya, an Estonian national and has three young sons.

WHO'S WHO
IN THE AVIATION INDUSTRY



Prasad menon
Chairman
vistara

The Tata Sons-Singapore Airlines joint venture recently unveiled the brand name of its new airline 'Vistara'. The Delhi-based airline has already decided to lease 20 Airbus A-320s, including seven A-320 Neo series planes which have the latest technology on board. The airline plans to have a 20-aircraft fleet in five years.

Prasad R Menon is the chairman of Vistara. He is also serves on the boards of several Tata companies, including Tata Industries, Tata Chemicals, Tata Projects and Tata Consulting Engineers. He is also on the boards of Axis Bank, SKF and the Sanmar Group.

Menon exuded confidence that Tata-SIA would become "a significant player" in the Indian aviation market by "redefining the way we travel in India. I can confidently say that Tata's and SIA's legendary hospitality standards and service excellence will make 'Vistara' a natural choice for passengers". Tata SIA Airlines Ltd-promoted Vistara got its first aircraft from the Airbus factory in Toulouse recently and is registered VT-TTB and painted all-white and without the Vistara livery. The brand new aircraft is the first of the 20 planes from the A320 family to be leased from BOC Aviation Pte by Vistara. In the latest venture, Tata Sons Ltd, the holding company of the $109 billion Tata group, has a 51% stake and Singapore Airlines the remainder.
Mr Menon has over 40 years of experience, working at some of the world's leading companies in the chemical and power industries, including ICI, Nagarjuna Fertilizers and Chemicals, Tata Chemicals (where he served as managing director), and Tata Power (from where he retired as managing director in January 2011). Mr Menon studied engineering at the Indian Institute of Technology, Kharagpur.

Ramesh Lingamaneni
Chairman
AIR COSTA

Ramesh Lingamaneni has been instrumental in establishing the year old south India's first exclusive regional airline 'Air Costa' and making it the fastest growing regional airline in the history of Indian aviation. In only 12 months of operation, Air Costa currently operates four aircraft with 38 daily flights connecting 9 destinations across India.

Born on 30th September, 1972 in Vijayawada, he is a post graduate in Commerce and has worked at various levels in his family run real estate business from the age of 19 years. His vision and goal oriented approach paved the way for development of world class infrastructure projects in Andhra Pradesh, India and development of a mixed-use project in Melbourne, Australia.

A highly motivated individual, Mr. Ramesh Lingamaneni has been a successful businessman in India for more than 20 years and is actively involved in several business divisions of LEPL Group in addition to his responsibilities in Air Costa. Some of the leadership positions currently held by him include: LEPL Projects Limited - Managing Director; Lingamaneni Momentum Melbourne Pty Ltd - Director; Whitecity Projects International Limited - Managing Director; and Lingamaneni Infocity Limited – Chairman

Mr.Ramesh mirrors the values of the organizations he heads – professionalism, dynamism and high ethical values. He deeply believes in the betterment of lives of people and he achieves this goal through his projects. For Air Costa, he has ambitious plans and plans to go international soon. At the Singapore Air Show, Air Costa ordered 50 Embraer E-Jets with options for another 50. On the first anniversary of Air Costa, he said the airline would soon go national and then look at international routes.

S.P.Shukla,
Chairman
Mahindra Aerospace

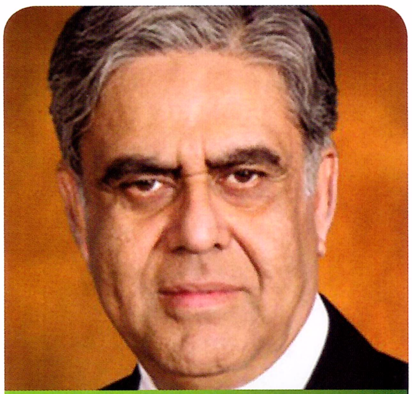
S.P. Shukla has over 34 years of varied experience in managing large projects and operations and has made a mark in various fields, including automotive tyres and Information and Communication Technology (ICT), in India. He is widely credited with taking mobile telephony to the masses by setting up telecom infrastructure in the remotest parts of India.

Mr. Shukla is responsible for the Aerospace, Defence and Steel businesses, key focus areas for the Group as it gears up to harness the vast potential that is emerging in these businesses under the "Make In India" policy of the Indian Government. Mahindra Aerospace manufactures utility aircraft and aero structures. He is also the Chairman of several companies engaged in developing and producing equipment to serve the needs of all three wings of the Defence forces. He is also the Chairman of Mahindra Sanyo Special Steel.

Mr. Shukla has served as President of Group Strategy and was the Chief Brand Officer of the Group. He has also been responsible for the Mahindra Racing portfolio – both MotoGP (motorcycle) and Formula E (electric cars) – in his capacity as Chief Brand Officer.

Mr. Shukla has a B. Tech from IIT BHU Varanasi and an MBA degree from IIM Ahmedabad.

WHO'S WHO
IN THE AVIATION INDUSTRY



Nasser N.S.Jaffer
Chairman
Pakistan International Airlines

Nasser N. S. Jaffer was appointed as Chairman of Pakistan International Airlines in October, 2014. He holds an Associated Science Diploma in Agriculture from University of California. He is the CEO of Jaffer Group of Companies and Chairman on its Board of Directors. He was Director of Jaffer Brothers (Private) Ltd. from 1969 to 2003, responsible for the chemical, insecticides and pesticides businesses, as well as the fertilizer and machinery business from time to time.

In 2003 he took over as Chairman and CEO of the company to manage the overall business to ensure growth, profitability and business satisfactory results to the stakeholders. He is on the Board of other business, philanthropy, social and health associations such as the Kidney Centre and Honorary Secretary Modern Club and Modern Society. He also held office as the Honorary Consul of the Philippines till 2010. Mr Jaffer is on the board of Shell Pakistan Limited⊠s Since June 13, 2011. He was on the Board of Pakistan International Airlines Corporation from July 3, 2013 to August 01, 2013 and from July 04, 2014 to October 16, 2014.

Recently, he set a precedent by becoming the first head of the often-criticized national carrier to board a flight as last passenger and to get a seat in the last row. Jaffer was travelling to Karachi from Lahore on PK-305 after the inauguration of Multan Airport when he chose to wait for the all passengers to get on board and then preferred to sit in 33C, last row.

R.K.Srivastava
Chairman
Airports Authority Of India

R K Srivastava took over as the Chairman of Airports Authority of India (AAI) replacing Sudheer Raheja. Srivastava's appointment is for five years. Srivastava is a 1984-batch Jharkhand-cadre IAS officer. Raheja, a Board member (Planning), was in charge of the post since late August 2014.

AAI is statutory body which comes under the Ministry of Civil Aviation. Its main responsibilities include creating, upgrading, maintaining and managing civil aviation infrastructure in India. It provides Air traffic management (ATM) services over Indian airspace and adjoining oceanic areas.

AAI manages around 125 airports in India, which include 18 International Airport, 07 Customs Airports, 78 Domestic Airports and 26 Civil Enclaves at Defense airfields.

Srinivas Bommidala,
Chairman, Airports
GMR Group

Srinivas Bommidala, One of the first directors of the Group, has been a member of the Board since 1996. Srinivas Bommidala entered his family tobacco export business in 1982 and led the diversification into new businesses such as aerated water bottling plants, etc. He was also in charge of international marketing and management of the organization.

Subsequently, he led the team as the Managing Director of GMR Power Corporation Limited for setting up the first independent power project. Situated at Chennai in India this 200 MW project with slow speed diesel technology is the world's largest diesel engine power plant under one roof. He was also instrumental in implementing the 388 MW combined cycle gas turbine power project in Andhra Pradesh.

When the Government of India decided to modernize and restructure New Delhi airport under a Public Private Partnership in 2006, he became the first Managing Director of this venture and successfully managed the transition process from a public owned entity to a public private partnership enterprise.

In 2007 he took over as the Chairman of Transportation & Highways Sector consisting of Transportation, Special Economic Zone at Kakinada - Andhra Pradesh and Krishnagiri in Tamilnadu , Construction, Commercial Property Development at Delhi & Hyderabad Airports/ Aerotropolis and other Group Properties Businesses.

WHO'S WHO
IN THE AVIATION INDUSTRY

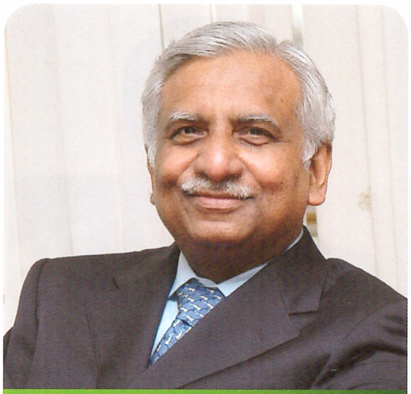
Jehangir Wadia
Managing Director
GoAir

Jehangir Wadia, also known as Jeh Wadia, is the Managing Director of GoAir, a budget airline which he founded in the year 2005, and of Bombay Dyeing, a textile company. He is the son of textile and real estate magnate Nusli Wadia and Maureen Wadia. He was educated at the Lawrence School, Sanawar. He is also the great-grandson of Muhammad Ali Jinnah, founding father of Pakistan.

The establishment of GoAir airline marked the entry into the critical aviation sector for the Wadia Group, an Indian business conglomerate famous for its companies like Bombay Dyeing and Britannia Industries. The Wadia group wholly owns the airline. The World Economic Forum elected Jehangir Wadia as a Young Global leader in the year 2008. He also leads Bombay Realty, the Wadia group's Real Estate venture.

GoAir is positioned as 'the Smart People's Airline'. Its captivating theme, 'Fly Smart' is aimed at offering passengers a consistent, quality-assured and time-efficient service through 'pocket-friendly' fares. The airline uses the state-of-the-art Airbus A320 aircraft fleet.

GoAir is reportedly laying groundwork to file an initial public offer (IPO) of USD 150 million USD 200 million. The total valuation is expected to be around USD 650 million to USD 700 million. The airline is waiting for new aircraft to arrive. It is expected to take deliveries of up to 15 aircraft each beginning 2016 till 2020.



Naresh Goyal
Chairman and Managing Director
Jet Airways

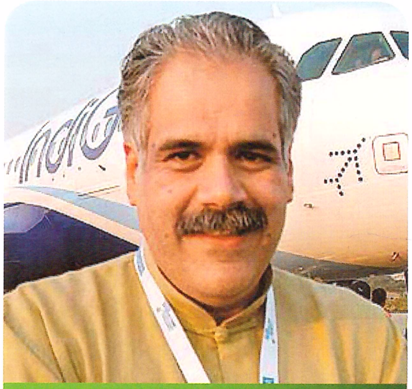
Naresh Goyal, the founder Chairman of Jet Airways, India's premier airline, has over four decades of experience in the Civil Aviation industry.

After graduating in Commerce in 1967, Mr. Goyal joined the travel business with the GSA for Lebanese International Airlines. From 1967 to 1974, he underwent extensive training in all facets of the travel business through his association with several foreign airlines. He also travelled overseas extensively on business during this period.

With the experience, expertise and technical know-how thereby acquired, in May 1974, Mr. Naresh Goyal founded Jetair (Private) Limited with the objective of providing Sales and Marketing representation to foreign airlines in India. He was involved in the development of traffic patterns, route structures, operational economics and flight scheduling, all of which has made him an authority in the world of aviation and travel.

In 1991, as part of the ongoing diversification of his business activities, Mr. Goyal took advantage of the opening of the Indian economy and the enunciation of the Open Skies Policy by the Government of India to set up Jet Airways for the operation of scheduled air services on domestic sectors in India. Jet Airways commenced commercial operations on May 05, 1993.

With his vast experience in the field of aviation, Mr. Goyal is on the Board of Governors of on the prestigious International Air Transport Association (IATA) for 2011-13, having served earlier during 2009-2010, 2008 – 2009 and 2004-2006.



Rahul Bhatia
Group Managing Director
InterGlobe Enterprises

Rahul Bhatia is the Group Managing Director for InterGlobe Enterprises. He laid the foundation for the enterprise in 1989 with its flagship business of Air Transport Management. It is under his able captainship that the enterprise has diversified manifold and is a preferred and trusted partner today for leading travel and technology companies globally.

Owing to his penchant for developing and assimilating new technologies of tomorrow, he has led the development of a number of new businesses in the travel domain and continues to oversee recent diversification into aviation and hospitality. His success mantra is four fold: Conviction, Risk Taking, Relationships and Planning & Operational Excellence. Rahul holds a degree in electrical engineering from the University of Waterloo in Ontario, Canada. He worked for IBM briefly.

He returned home to join father's airline agency business, forming InterGlobe in 1989. Other interests include a travel reservations arm and a BPO firm.
IndiGo airlines was established in 2006 by Rahul Bhatia and Rakesh Gangwal, each owning 50 per cent of InterGlobe Aviation, the company that runs IndiGo. Bhatia is the man in charge of operations.
Rahul Bhatia's policy with setting up IndiGo was to operate an airline that is on time, clean and maintained well and high on performance. The focus on these basic ideas is what has worked in favour of IndiGo and is something they plan on continuing with their rapidly growing fleet. Bhatia says that the key to growing the market is by attracting more passengers with lower fares. Another philosophy of his is to spend less on marketing and advertising. IndiGo is currently the largest airline in the country in terms of market share.

WHO'S WHO
IN THE AVIATION INDUSTRY

Umesh Vankayalapati
Managing Director
Trujet (Turbo Megha Airways)

Umesh Vankayalapati, along with cine actor Ram Charan have joined together to set up Turbo Megha Airways, a regional airline under the brand name of Trujet. It launched operations on July 12, 2015 and currently flies to Hyderabad, Tirupati, Rajahmundry, Chennai and Aurangabad.

Umesh said that in the last 10 years, the aviation growth has just scratched the surface and that there is vast potential waiting to be tapped. "We believe that there are a lot of underserved and/or un-served markets in India. And a quality airline with warmth, care and efficient service is still missing from Indian skies. That is where we believe Trujet fills the gap with its state-of-the-art, efficient aircraft and friendly service"

Trujet is a scheduled regional carrier based out of Hyderabad with a fleet of two ATR-72 500 aircraft having seat capacity of 72 seats each. Umesh said that the airline is awaiting permission from the Ministry of Civil Aviation to fly to destinations such as Mumbai and Kadapa in Andhra Pradesh.

Srinivasan Dwarakanath
CEO
Airbus India

Airbus in March 2014 appointed Srinivasan Dwarakanath as Airbus India CEO. He has a doctorate in design engineering from Cambridge University. Having joined leading European aircraft manufacturer Airbus in 1997, Srinivasan Dwarakanath will now lead its India operations. Happy about Airbus scaling up in India, he said the step would give the company a clear focus and also act as a one-stop shop for its partners. Airbus currently has 60 per cent of the aircraft market in India.

In 1997, he began as a professional engineer with British Aerospace Airbus and was with BAE Systems as its Team Leader, Product Data Management. From 2000 to 2004, he became Programme Manager, Configuration and Product Data Management, Airbus UK; Head of Development, Engineering ICT Solutions, Toulouse, France for about two years. Later, he was made the Country Manager, India of Airbus in 2006 and in 2011 he was appointed Vice President, Head of International Cooperation, Asia-Pacific, Middle East and North Africa; and In 2013 he was appointed Managing Director, Airbus India.

Shyson Thomas
Chairman and Managing Director
Air Pegasus

Shyson Thomas is the Chairman & Managing Director of Decor Aviation, the parent company of Air Pegasus, the new regional airline which has started operations from Bengaluru. A Post Graduate in Commerce and a Qualified Chartered Accountant, he is widely known in aviation circles in India and abroad.

Mr.Thomas is in this line of business for the past 10 years and well versed in aviation business and ground handling activities. Mr. Thomas is also a Director in Chartered Aviation; Andhra Ispat Ltd; Triangle Asia Private Ltd and Rukmani Steel Industries Ltd. He is Secretary of the Indian Airports Ground Handlers Association.

Air Pegasus has two ATR 72-500 aircraft and plan to get three more soon and by end of financial 2016, the airline hopes to have a fleet of 10 aircraft. All these aircraft will be leased from an Irish firm.

Grandhi Mallikarjun Rao
Founder and Chairman
GMR Group

Grandhi Mallikarjuna Rao is the Founder Chairman of GMR Group, a global infrastructure developer and operator based in India. Started in 1978, GMR Group is now present in seven countries, active in Energy, Highways, Large Urban Development and Airports sectors, known for building and operating world class national assets.

G M Rao was born on 14 July 1950, in Rajam, Srikakulam district, Andhra Pradesh. A graduate in Mechanical Engineering from Andhra University, Rao started his career in jute mills and went on to found the GMR group. He expanded the group into the energy and infrastructure sectors.

In 2007, the GMR group won a bid to privatise India's third busiest airport, Indira Gandhi International Airport. Rao spent $1 million on his bid and made a deal with Fraport AG to support his bid. GMR group has also completed a $200 million Hyderabad airport project. The recent cancellation of its airport contract by the government of Maldives ballooned into controversy with company claiming $800 million as compensation.

Ingo Roessler
Chief Commercial Officer & Partner,
Innovative Software Sarl

Born in the German city of Hamburg dubbed as Gateway to the World' 1964, Roessler chose to pursue a career in aviation. He completed the Lufthansa commercial trainee programme in 1987 gaining first-hand freight experience as route manager in German Cargo Services, a subsidiary of Lufthansa for air charters. After a 4.5 year stint as executive assistant in a project of the German Railways in Berlin, Roessler returned to his cargo roots joining Chapman Freeborn in 1997 at Frankfurt, where he grew the GSA side of the business.

Following a partnership in the GSA network Capitol International Roessler kick-started the cargo business of fledgling Abu Dhabi based Etihad Airways in 2004 as Vice President Cargo. Since April 2007 he served as Vice President Cargo & Mail of Royal Jordanian Airlines, where he managed a major restructuring.

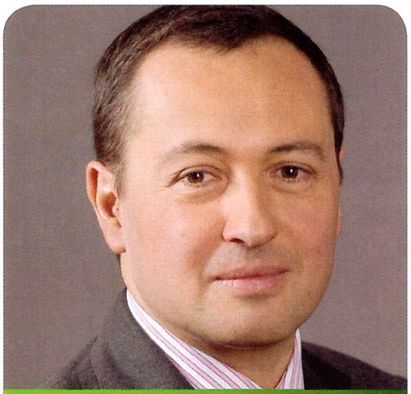
In 2010 Roessler became Chief Commercial Officer and Partner of Innovative Software S.à.r.l. from Luxemburg to change the legacy market in aviation messaging through the ground-breaking application EDIfly. Roessler has contributed too many publications in the aviation business, e.g.,The Air Cargo Guide' published by Huss Verlag. He is married and lives near Frankfurt, Germany. When he is not travelling the world over, he fancies bike riding, hiking and cooking with family and friends.

Kyle Haywood
Managing Director and CEO
Biman

Kyle Haywood, the 48-year old Briton took charge as Managing Director and CEO of Biman Bangladesh airlines in September 2014. Apart from British Airways, Haywood also worked for Etihad, Gulf Air and low-cost carriers Air Arabia, and Nasair. He also was CEO of Air Uganda, in Africa.

Haywood has over 28 years of proven track record in the field of aviation.

WHO'S WHO
IN THE AVIATION INDUSTRY



Marc Duflot
Vice President, Thales Middle East

Marc Duflot was born on August 1, 1960 and is a graduate of France's Ecole de Management de Lyon. He joined Thomson-CSF Telecommunications Division in 1985 where he held the position of Sales Manager for Spain and Portugal. In 1990, he joined the new Communications, Navigation and Identification Division as Sales Manager for the Asia/Pacific region, and in 1998, was appointed Export Sales Director. From 2000 to 2003 he was Export Sales Director of the newly created BattleSpace Radio Division. He was promoted Vice-President, ExportSales of the Land & Joint Division in 2004.

In February 2010, in the frame of the new organisation, he was appointed Vice President, Business Development Director of Defence & Security C4I Systems Division and Vice President, Sales, Export of Thales Communications & Security. Marc Duflot was appointed Vice President, Thales Middle East in October 2012. He currently oversees Thales' global interest in the Middle East region, based in Dubai, UAE.

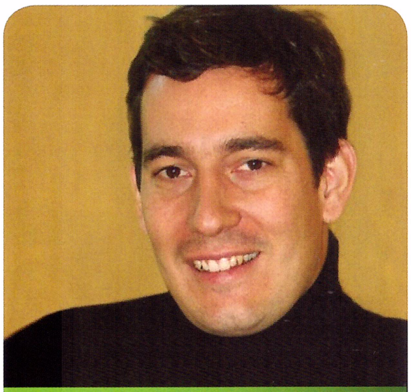
Anand E Stanley
VP and General Manager - Middle East, Turkey and Africa, Sikorsky Aircraft, United Technologies International Operations

Anand was appointed in October 2012 as the Vice President and General Manager for Sikorsky Aircraft, Middle East, Turkey and Africa. Anand is responsible for all Sikorsky activities in the region, involving customers, governments and industrial cooperation partners.

In April 2012 Anand was appointed as the General Manager for United Technologies International Operations (UTIO), Turkey. Previously, Anand was the Country Head and Managing Director for all UTC Fire and Security (UTCFS) operations in India.

Prior to this, Anand had multiple roles in the US within UTC. He held leadership assignments at the UTC Corporate, Carrier and Pratt & Whitney divisions, including being the Integration Director for the $2B GE Security acquisition.

Anand has an MBA from the University of Virginia – Darden; a bachelor's in Electronics & Communication Engineering from Andhra University; a Post Graduate diploma in International Business from International Management Institute, Delhi; and a Diplome in French. In 2009 he was recognized as a champion of diversity by DiversityPlus magazine, a leading US publication.



Mathieu Duquesnoy
Vice President Middle East, Africa and Central Asia Embraer Commercial

Mathieu Duquesnoy has been Embraer Vice President Commercial Aviation for Middle East and Africa since 2010. He currently also holds the position of Embraer Vice President of Central Asia since 2014.

He has taken on several roles within the Sales and Marketing team starting as an Airline Analyst for the Middle East region, and then becoming Sales Director for the Europe, Middle East and Africa team. His main achievements include developing the Embraer footprints in the Middle East and Africa as well as strengthening Embraer presence in the UK and with the SkyTeam Alliance.

His credentials include an Aeronautical Engineering degree from ENAC in France, Air Transport master's degree from Cranfield University, as well as an Executive MBA from HEC Paris.

Gerrit Basson
CEO of ExecuJet

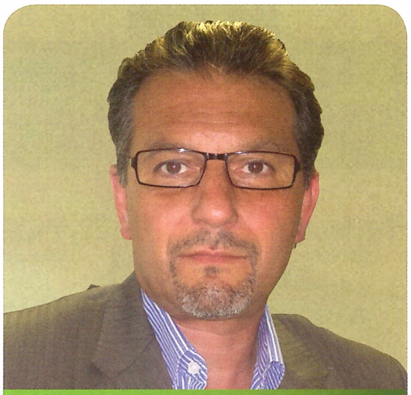
Gerrit Basson, an Australian national, was born in Pretoria, South Africa. After university, Gerrit worked in the Information Technology sector, with roles in software engineering, sales and general management. He held the position of Managing Director of Persetel, a division on South Africa's largest publicly listed IT companies at the time.

Gerrit moved to Australia and worked with a start-up software company to develop and sell transportation and logistics software to large logistics firms.

In August 2003, Gerrit moved into the business aviation industry, joining Sydney-based ExecuJet Australia Pty as Director of International Projects and Sales. In 2004, Gerrit transferred to Zurich, Switzerland, in the newly created role of Group Chief Operating Officer at ExecuJet Aviation Group AG and was responsible for the evolution of ExecuJet during a period of rapid growth. He became Group Managing Director of ExecuJet Aviation Group in 2007 and in 2010 moved back to Australia for two years.

In 2012, Gerrit was appointed again as Group Chief Operating Officer and took on the additional role of Managing Director of ExecuJet Europe in 2013, before being appointed President of ExecuJet Aviation Group in July 2014. In May 2015, Gerrit was appointed as Chief Executive Officer of ExecuJet Aviation Group after the company's acquisition by Luxaviation Group, tasked with leading the Group through another period of fast growth and integration.

Gerrit holds a Bachelor of Science degree from the University of Pretoria, a postgraduate diploma in Higher Education and a Master's degree in Business Leadership.



Patrick Natali
General Delegate
SAFRAN Middle East

Patrick Natali is retired from the Armament Engineers Corps but began his career as a military engineer, in charge of design and overhaul of safety-diving onboard French submarine ballistic missiles.

He worked for 11 years as a Technical Advisor at the Royal Saudi Naval Forces in Riyadh, in charge of Saudi-French armament naval contracts. In 2007, he returned to the Defence Procurement Agency to manage the rationalisation of the European Defence Test and Evaluation Bases and develop partnerships in this domain with the US, Great Britain and Canada. Since October 2010, Natali has been appointed as General Delegate for SAFRAN holding group in the Middle East based in Abu Dhabi.

Here, he manages SAFRAN's two delegations at Abu Dhabi and Dubai. Born in 1960, Natali is a French national and speaks English and Arabic fluently. He graduated from the Ecole Nationale Superieure des Ingenieurs des Etudes et Techniques d'Armement, France and has been decorated with the Knight of the order of Merit.

He is married with two daughters. His leisure activities include golf and music and he has a keen interest in Oriental and Arabic culture.

Mohammad Qazi
CEO, Accountable Manager and Board Director RAK Airport

Mohammed joined Ras Al Khaimah International Airport team from the UK, having previously worked across more than 13 UK airports including hub airports such as Heathrow, Gatwick and Stansted, and major regional airports such as Birmingham, Manchester, Edinburgh, Glasgow and Cardiff. He was the key driver behind the commercial strategies of a number of regional airports and played a significant role in growing revenues and improving profitability.

Prior to coming into the aviation industry worked in the IT sector for 8 years for some of the global leaders such as IBM, Hewlett Packard and Citrix Systems. Mohammed is a professionally trained MBA and is also a qualified accountant.

HE Nadir Ahmed Mohammed Al Hammadi
Chairman, Abu Dhabi Aviation

HE Nadir Ahmed Mohamed Al Hammadi's professional career began at Gamco in 1990. He held several posts in his steady career growth and was also instrumental in the establishment of GAMAERO, a joint venture of Gamco and Aerospatiale and served as its Executive Director.

In 1996, he joined Presidential Flight and held several key management positions, responsible for Maintenance and Engineering. In 2007, he was appointed as the Deputy Chief Executive Officer of Presidential Flight.

In 2009, he joined Abu Dhabi Aviation Board as its Managing Director. Two years later, he was appointed as the Chairman of Abu Dhabi Aviation.

HE Al Hammadi also holds the chairman's post in Deco Vision and Tamouh Investment, while serving as a Board Member in other private companies. Born in 1967, he graduated from Embry Aeronautical University in Florida, USA in 1990, with a Bachelor of Science degree in Aviation Electronics (Avionics). He completed his master's degree in Engineering Business Management from Warwick University, London in 2002 and participated in 'The Advanced Management Programme' held at INSEAD in Fontainebleau, France, in March 2007.

Paul Byrne
CEO, flynas

Paul Byrne is the new CEO of flynas, a position he took up in November 2014 following a three month term as Commercial Advisor to the airline. With a career spanning more than 35 years in the aviation industry, starting with Aer Lingus in 1979, Paul brings a wealth of wide-ranging experience to flynas, focused mainly on private consultancy in both the emerging low cost and full service airline sectors.

Prior to acting as Commercial Advisor to flynas, Paul undertook short TRAINING assignments in Jeju Air Seoul South Korea and Precision Air in Tanzania. Before that he worked with the RM Team at Pegasus Airlines in Istanbul, Turkey, where through the use of a more analytical approach the team is now delivering increased revenues and consistently excellent results.

Other assignments include Aero Contractors of Nigeria, where from March 2009 to April 2010 he led a team that developed revenue management, online sales, ancillary sales and onboard sales. Educated at Chanel College, Coolock, Dubin, Ireland, Paul holds an MBA from the Open University. He is a Fellow of the Institute of Independent Business International (IIBI) and was its first Chairman in Ireland.

Pramod Pillamari
Managing Director, Universal Pesticides

Pramod, B.Sc. (Agri.), MBA (Marketing), completed his post-graduation in 1985 and started his career as a Pest Control Professional in India. Way back in 1992, he founded Universal Pest Management Services Company in UAE to offer his expertise to the growing UAE market. Expertise, experience, hard work, dedication and love of his profession and employees are few of his positive attributes which he has successfully employed in his business to gain exceptional repute in the pest management industry.

Over a span of more than two decades, he has grown his company resulting in progressively increasing number of satisfied clientele. Over the past few years, he has diversified into other specialised services like fumigation, specialized packaging, and heat treatment for wooden packaging material and has gained customer accolades.

Having the company's corporate office in the busy commercial district of Bur Dubai, Pramod has expanded his operations in the UAE with divisions in Abu Dhabi, Jebel Ali and Sharjah. Customer focus, delivery of expertise and employee satisfaction is the foundation of their company culture, says Pramod.

Capt. Mohammed Al Khashman
Chairman of Board & CEO Jordan Aviation

As an entrepreneur, Captain Mohammad Khashman set out in 1998 to establish Jordan Aviation which emerged as a pioneering step in advancing the aviation industry in the country and the region.

Today, Captain Khashman steers Jordan Aviation as its Chairman of the Board and Chief Executive Officer having transformed it from a single narrow-body aircraft operation to a mixed fleet of narrow and wide-body aircraft operating around the world.

Renaud Cloatre
International Sales Director, Dassault Aviation, Civil Aircraft

Renaud Cloatre was appointed Falcon business jets Regional Sales Director in 2009 and is based in Dubai, UAE, since then. After having worked for EADS in Washington DC, he started his career with Dassault Aviation in 2001, in the Customer Service department by being in charge of the commercial relation with Dassault's avionics system suppliers and was based in Dassault's Headquarters in St Cloud, Paris area. In 2003, he was appointed Service Sales Manager for the Eastern Hemisphere, and co-developed the FalconCare nose to tail maintenance plan by Dassault.

Born in an aviation family, his passion for aviation was seen very early when he obtained a glider pilot license at the age of 14, followed by a private pilot license and started mountain flying in 2008. Cloatre holds a degree in Biochemistry and an MBA from ICN Business School in France. He is an expert in the field of business aircraft industry and business aviation and works with his clients to design with them the best business jet aircraft solution from the initial project to the Falcon delivery. His leisure interests include flying, skiing, warbirds restoration and sports.

Richard Gaona
Chairman of Board and President, Comlux Group

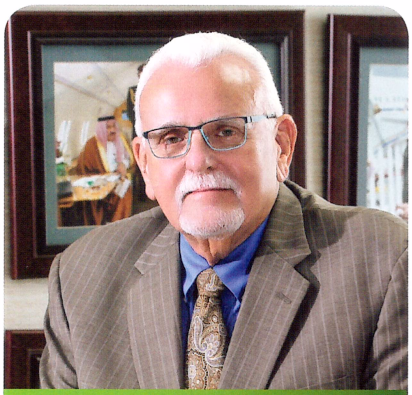
Graduated from Conservatoire National des Arts et Métiers (CNAM) as an Economic Engineer, Richard Gaona, 53, is a French citizen who started his career in 1982 in the design office of Aerospatiale (now well known as Airbus SAS).

In April 1999, after spending 17 years at Airbus, Richard was appointed as a Vice President of Airbus Executive and Private Division in order to launch the Airbus Corporate Jetliner program.

During his 8-year tenure leading the Executive and Private Aviation at Airbus, Richard Gaona achieved a total of 120 aircraft sold around the world. Among its major achievements, one could highlight the sale of the first A380 VIP Flying Palace to Prince Al Walid bin Talal bin al Saoud of Saudi Arabia and as well the launch of the successful Airbus A318 Elite program.

In 2007, after spending more than 25 years with Airbus, Richard Gaona joined Comlux, the Swiss-based VIP charter operator and created Comlux The Aviation Group. Richard Gaona is currently Chairman of the Board and President of the Comlux Group.

WHO'S WHO
IN THE AVIATION INDUSTRY



Capt. W. Patrick Gordon
Acting President and CEO, Royal Jet

Capt. W. Patrick Gordon MAS has been serving as an Advisor to His Excellency Sheikh Hamdan Bin Mubarak Al Nahyan, Chairman of Royal Jet for the past 15 years. With vast experience in the aviation industry, his previous tenures included managerial and advisory posts in Aviation Operations, TRAINING and Safety in the UAE, KSA & USA.

Between 1990 and 2000, Captain Gordon was working for Amiri Flight (now called Presidential Flight), in Abu Dhabi. During these ten years, Captain Gordon was Flight Safety OFFICER for nine airplanes and Training Captain for 14 pilots on Gulfstream IIIs and Falcon 900s, in addition to providing international support for the ruling family, government officials and foreign heads of state.

Prior to this, Captain Gordon was the Aviation Manager/Chief Pilot at Tenet HealthCare Corporation, based in the USA and Aviation Advisor/Chief Pilot to the Deputy Ministry of Petroleum for Mineral Resources in Jeddah, KSA. Captain Gordon has also held senior management positions with Imperial Aviation, Inc. and Avex Corporation both based in the USA.

Captain Gordon is an Airline Transport Pilot in both airplanes and helicopters. He holds a Master's Degree in Aeronautical Science from Embry-Riddle Aeronautical University, USA and has completed 'Managing the Corporate Aviation Function' at the University of Virginia's Darden School of Management.

Trevor Esling
Regional Senior Vice President, International Sales, Europe, Middle East and Africa, Gulstream

Trevor Esling, Regional Senior Vice President – International Sales, Europe, Middle East and Africa, Gulfstream, is responsible for leading the Europe, Middle East and Africa sales team. Mbuvi has extensive Board room experience having served on the Board of Bamburi Cement (from 1999), Hima Cement, Mbeya Cement and serving as Secretary to the East African Cement Producers Association.

Jamaluddin Ahmed,
Chairman
Biman Bangladesh Airlines

On January 26, 2009, the Civil Aviation Authority appointed retired Air Marshal Jamaluddin Ahmed as Chairman of Biman Bangladesh Airlines. He has held that post successfully for the past six years.

The Awami League government in June 2001 had elevated Jamaluddin to the highest air force rank four days ahead of his retirement. The past BNP-led government stripped him of the promotion in Oct 2004 saying there was no such post in the organogram of the Bangladesh Air Force. The High Court in Feb 2008 restored the title, declaring illegal the government's 2004 notification stripping Jamaluddin of the rank.

While his own origin in aviation dates back to 1965 when he first joined the Pakistan Air Force Academy, his journey with Biman Board as a Chairman is an episode of 26th January, 2009. Under his leadership, Biman has seen many milestones, one of them is the move to becoming a PLC, a precursor to possible privatization in the future; ordering of 10 new Boeing aircraft, and convincing various government departments to support; recruitment of an expatriate CEO are some of his decisions.

He has transformed the airline and customers believe it to be a 'Home in the Skies'. Since its inception in 1972, Biman has so far carried 6,56,000 hajj pilgrims to the holy shrines of the Saudi Arabia.

WHO'S WHO
IN THE AVIATION INDUSTRY

T.Suvarna Raju
Chairman & Managing Director
HAL

T. Suvarna Raju, took over as Chairman, HAL on 1st February, 2015 and in April he was re-designated as Chairman and Managing Director (CMD). He is an Engineering Graduate with an MBA (Marketing), M. Phil in Defence Strategies Studies and Post Graduate Diploma in Intellectual Property Rights Laws from National Law School of India University. He is also an alumnus of National Defence College.

Raju joined HAL on 26th June, 1980 as Management Trainee and has worked in different capacities at HAL Aircraft Division, Overhaul Division before taking over as Director, Design & Development on 1st February, 2012.

Raju is a firm believer that 'Best of Technology can never be bought, It can only be developed". With this vision to transform the company into a Technology Powerhouse, he has been instrumental in taking various path breaking measures to make R&D set up of HAL more competitive. He was responsible for drafting of first ever R&D policy of the company that has shaped various policy initiatives in last few years. All the design centers have been brought under the ambit of COIN (Committee of Institutional Network) to synergize the learning across the organization. The policy has enabled creation of a corpus for the R&D by keeping aside 10% of Operating Profit after Tax.

Raju has experience in various facets of Aerospace Business and is currently steering a lot of futuristic programs such as UAVs, FGFA, MTA, Civil aircraft development programme, MMRCA etc.

Marwan Boodai
Chairman of Jazeera Airways Group

Marwan Boodai is the CEO of Boodai Corp, the institutional founder of Jazeera Airways, and the Chairman of Jazeera Airways Group. Before chairing the Board, Marwan and the core founding team led the establishment process of the airline from raising capital for the airline, which was the first non-government airline in the Middle East, to securing traffic rights, fleet planning and purchasing, and financing.

Mr. Boodai continues to play an active role in steering the strategic direction of the company, especially in 2009 and 2010 when he led the Turn-Around Plan (TAP) to bring the company back to profitability after suffering losses for the first time in history due to overcapacity in the market that was led by competitors and new market players.

Jazeera Airways Group returned to profitability in the third quarter of 2010 with record quarterly earnings. The company continues to announce record profits for almost every quarter since then. Today, Mr. Boodai is leading Jazeera Airways into new opportunities to start new business lines and activities within the passenger airlines sector and the aircraft leasing sector, in addition to other complementary sectors both locally and internationally.

Boodai sits on several Jazeera Airways Group committees including governance and financial oversight committees.

Tahnoon Saif
Vice President, Aviation District, Dubai South

Tahnoon is the Vice-President of Aviation District at Dubai South. In this role he oversees the development and the execution of the Aviation District's plans at Dubai South, including the development of the business strategy and the master plan for this aerospace hub development.

With over 21 years of working experience, Tahnoon has positioned himself as a professional in the fields of aviation and logistics. He was previously Vice-President for Strategy at Dubai South, responsible for the development of the corporate strategy and maintaining the alignment of the business and functional units with the corporate strategy.

He led the development of Dubai Freezone Council's Strategy, Dubai International Airport-Al Maktoum International Airport Transition Strategy and participated in developing Dubai Aviation Sector's Strategy. Prior to that, he was the Director of Organisation Development & Strategic Planning at Dubai South.

Tahnoon is a Stanford University certified Aviation Management Professional (AvMP) and holds a certification in Strategic Airport Management from the International Air Transport Association (IATA). He earned his MBA from the prestigious Johns Hopkins University in Baltimore, USA.

Asia, ME and Africa touted as biggest aviation markets

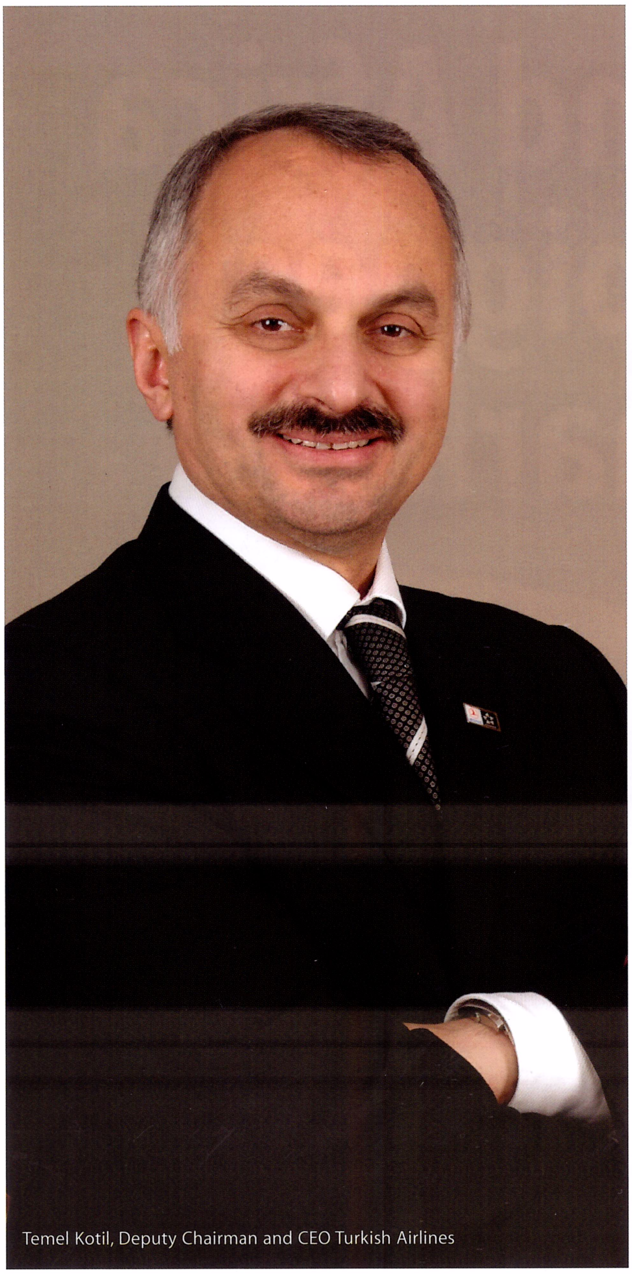
Primera
PSF

Asia, Middle East and Africa: the three largest and most important regions of the globe are also the biggest aviation markets in the world. According to the new IATA 20-year forecast, while the Middle East will expand nearly five per cent per annum and will be the joint fastest growing region that will see more than 380 million passengers pass through the region every year by 2034, Asia will see more than 100 million new passengers enter the market annually for the foreseeable future. Africa too has joined the bandwagon and it will be the fastest growing region in terms of passenger growth in the next 20 years, according to a study by IATA.

Middle Eastern region

Aviation has been a huge success story in much of the Arab region as it has an unrivalled reputation for growth and excellent standards of customer service. While the sector in this region has benefited from strategic investments and very positive policies by governments, particularly those in the Gulf, the role of growth, driven by rising incomes, favourable demographics, and the falling cost of air travel too cannot be undermined in the success story of the lucrative sector.

We can see that aviation is poised to enter its next century with the Arab region ready to lead the way. However, this story of



Temel Kotil, Deputy Chairman and CEO Turkish Airlines

success in the aviation sector is not devoid of certain loopholes and challenges. Certain issues need to be addressed, particularly with respect to air traffic management and regulation. Critics however believe that Arab region needs to learn from Europe's mistakes and ensure that air traffic management does not become its Achilles heel in its bid to grow air transport. A seamless airspace management coupled with cohesive use and implementation of technology are some of the areas the industry leaders need to concentrate on. Also, the need of the hour is to de congest air space which leads to delays for passengers and adding up additional costs for airlines. The lack of capacity is also a great concern and greater civil-military cooperation for the flexible use of airspace is urgently required.

Mr. Temel Kotil, Deputy Chairman and CEO Turkish Airlines told Aviation Guide, "It is very well clear that the Middle East has a substantial share in the world air passenger traffic. Total scheduled revenue passenger-kilometers to/from the Middle East has reached 0.7 trillion in 2014 and this number is expected to be 2.4 trillion by 2034, which means that the Middle Eastern region holds 8% of the world's air passenger traffic in 2014 and will hold 11% of that numbers by 2034."

"Turkish Airlines is aware of the crucial role Middle East region plays in the airline industry. It flies to 13 countries and 34 destinations in that region. Being a global network carrier, we have a dynamic scheduling approach which involves increases of frequencies on the currently operated destinations, as well as inclusion of the new destinations on our network. The next point in the Middle East region for Turkish Airlines will be Abha."

We asked Mr. Kotil as to how well the airliner has cashed in on the advantage of being ideally located at the cross roads between Asia, Africa, and Europe, and he observed, "Turkish Airline, located at the crossroads of Europe, Middle East and Asian regions, fly to 277 destinations worldwide with 229 international and 48 domestic routes. We fly to more countries and more international destinations than any other airline in the world. We offer the largest number of O&D's (Origin&Destination) in the Middle East and Africa and the second largest number of O&D's in Asia & Pacific. In a nutshell, we are connecting the Middle East to the world and vice versa, and 70% of international destinations, which means that more than 55 countries are within the narrow body range of our fleet."

ME airliners have gained popularity for their partnerships of various kinds along with organic growth strategies and selective code sharing, equity stakes in a range of out-of-region carriers, and traditional alliance memberships. Noted Mr. Kotil, "As Turkish Airlines, we compete with ourselves. This is what I have learnt in the last ten years of being the CEO of the company. Since the airline market is quite transparent, it only makes more sense for us to be close to our passengers and we always maintain a good relationship with them. We are happy with our membership with Star Alliance and will continue our cooperation with our partners."

"Of course, as a global carrier, we are adopting the 'hub and spoke' strategy. Furthermore, as we have a unique geographical positionining, we have the chance to reach a very large area with narrow body aircrafts. That is an exceptional advantage that no other airline enjoys. Also because of this our costs too have been reduced by 30%, lower than the European carriers."

"The center of gravity of the world traffic is moving from West and North to South and East. Market share of European carriers has been going steady and this market share can be lost to Asian and Middle Eastern carriers. If we were to go by forecast for air growth between 2013 and 2033, one can conclude that while Europe continues to drive international traffic, Asia and Pacific & Middle East regions are expected to grow faster."

African region

Driven by factors like positive economic growth across the country, growing urbanization and a rising middle class, the African aviation industry is on the resurgence. According to CEO of IATA, Tony Tyler, "IATA forecasts indicate that over the next 20 years, passenger growth in Africa will be the world's fastest."

Connectivity across Africa need to be improved so that it will help reduce the cost of doing business and facilitate air travel in the country. With the regional integration arrangements deepening with creation of larger trade zones and as Africa links into Global Value Chains (GVCs) and Regional Value Chains (RVCs), there is high potential for growth in freight traffic as well as passenger transport across the continent.

Moreover with its growing middle class and fledgling no-frills airlines, Africa's future aviation is expected to thrive on budget carriers. Airports in regions like South Africa, Ethiopia and Kenya are touted as hubs in their own ways. Nigeria's Lagos hub, Murtala Muhammed International, is widely considered one of the world's worst major airports.

Gabonese President Ali Bongo Ondimba recently announced the launch of pan-African low-cost airline Gabon FlyAfrica.com. The new airline is aimed at enhancing air connectivity across Africa and reducing the cost of doing business in Africa, Bongo said.

The affordable low-cost model, which has worked successfully in Europe and Asia by contributing significantly to economic growth of those regions, is expected to herald a revolution in Africa's airline industry, unlocking the continent's potential by boosting the economic mobility of its citizens, and encouraging increased trade as a result of the airline's unprecedented low fares for passengers and goods.

Announcing the launch, Bongo said: "My vision for Africa has always been that of an integrated continent. An Africa where every citizen has the opportunity to afford air travel and take advantage of the benefits of being economically mobile. The launch of Gabon FlyAfrica.com, a pan-African airline, is an important step in implementing this vision."

One of the biggest obstacles to Africa's growth and development was the cost of doing business in Africa, he said. Moving goods and people between African states was still too complicated and expensive and remained a major obstacle to the prosperity of the continent. Bongo called on African countries to improve connectivity across Africa to reduce the cost of doing business and facilitate air travel. He urged African countries to implement the Yamoussoukro Declaration (YD), which was the basis for creating a single airspace market for Africa.

"Aviation is the next infrastructure growth frontier for Africa. Enhancing air connectivity can help raise productivity and create jobs by encouraging investment and innovation, improving business operations and efficiency."

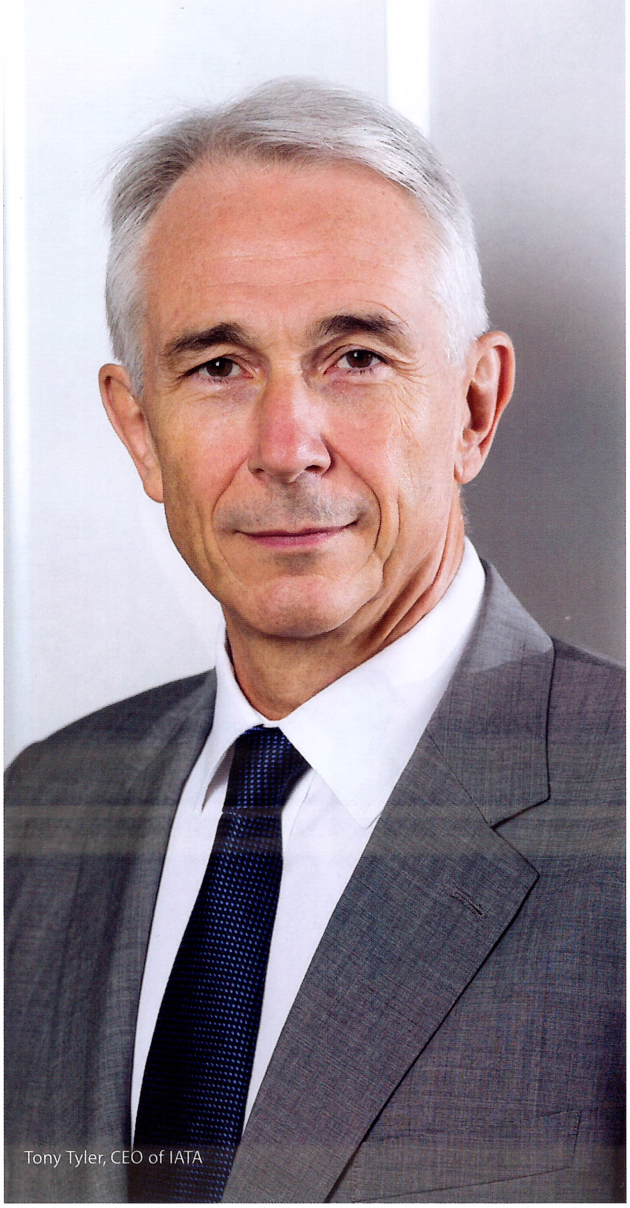
Ali Bongo Ondimba, Gabonese President

The region, in 2014, pressed approximately 21,600 airplanes in service, a number that is expected to double over the next 20 years to an in-service fleet of 43,560 airplanes. To achieve that number, 38,050 new airplanes will be required, and 26,730 of them, or 70 percent, will be single-aisle airplanes. Additionally, 8,830 new wide body airplanes will be needed.

Asian region

Asia is expected to be the largest travel market in the world, growing at 6.1 percent annually. And more than 100 million new passengers are projected to enter the market annually for the foreseeable future. As a result, the airlines and airports in these regions are continually growing, with several ranked among the largest in the world.

The main contributing factor remaining the region's GDP, which is expected to grow by 4.3 percent annually over the next 20 years. Although that growth will be mixed owing to the region's current composition of mature, developing, and emerging



Tony Tyler, CEO of IATA

markets, Asia GDP and passenger traffic will drive an estimated need for 14,330 new airplanes valued at $2.2 trillion. The LCC market, for example, is helping grow the need for 10,370 new single-aisle airplanes, with the majority in the size category of the 737 MAX 8. This size of airplane gives airlines the efficiencies needed to open new routes while continuing to operate profitably on current routes.

The low-cost carrier (LCC) business model has proved successful especially in Asia Pacific. LCC strategies include operating at secondary airports, flying a single airplane type, increasing airplane utilization, relying on direct sales, offering a single-class product, avoiding frequent-flyer programs, and lowering labor costs. Over the past 10 years, the region's LCCs have generated an average annual growth rate of 24.5 percent. By comparison, Europe's LCCs grew 13.4 percent annually during the same period, and North America's grew a modest 2.2 percent annually.

Some of the Southeast Asian countries were the first in the region to employ the LCC business model, and today, LCCs are flying nearly 20,000 weekly flights. Northeast Asia, on the other hand, has been slower to see the growth of LCCs, due to the large high-speed rail network in Japan and to an aging population. The latest region to embrace the LCC model is however China. Many airlines have also created joint-venture subsidiaries to expand outside their home country and also to avoid restrictions on foreign ownership. These subsidiaries, which employ the LCC business model, are often cobranded with the parent airline and share its name and livery. Although the vast majority of this activity has been in short-haul markets using single-aisle airplanes, the region is beginning to see joint ventures flying wide body airplanes on medium-haul operations in response to strong traffic growth.

At the other end of the spectrum, Asia's network carriers include some of the largest, oldest, and most well-regarded airlines in the world, such as Korean Air, Air China, and JAL. Network carriers tend to have major hub operations for domestic, regional, and international services and large, complex fleets; airline alliances; and a broad array of service offerings (such as airport lounges, onboard meals, and multiple cabin classes) to enhance passenger satisfaction.

Future demand

Meanwhile, wide body airplanes such as the 787 and 777 provide the needed range and economics to open markets that were inaccessible in the past. The 787 continues to open new markets to and from the region. Both Japan, a mature market, and China, a rapidly growing market, have employed the 787 to grow long-haul share. In China, the long-haul growth rate since 2010 has been 18 percent, with the 787 being used primarily to open new markets. In Japan, long-haul growth has been at 9 percent since 2010, with more than two-thirds of its new 787s being used to open new markets. These market dynamics will lead to regional need for 3,590 new wide body airplanes by 2034.

Air cargo's crucial role in Asia could be underlined by the vast amounts of goods transported over difficult terrain and vast stretches of the ocean. Many of the world's largest and most efficient cargo operators are located in the region, where the air cargo market is expected to grow by 5.7 percent per year. As a result, carriers in the region are expected to need 380 new production freighters and 570 converted freighters in the years ahead.

Regionally, the need for new airplanes is well balanced—Asia will need approximately 40 percent; Europe and North America combined will need approximately 40 percent; and together, the Middle East, Latin America, Africa, and CIS will need the remaining 26 percent. In 1994, airlines in Europe or North America carried more than 73 percent of all traffic. By 2034, that share will shrink to 38 percent, with Asia Pacific and Middle East airlines becoming prominent in global aviation.

Piling Arms

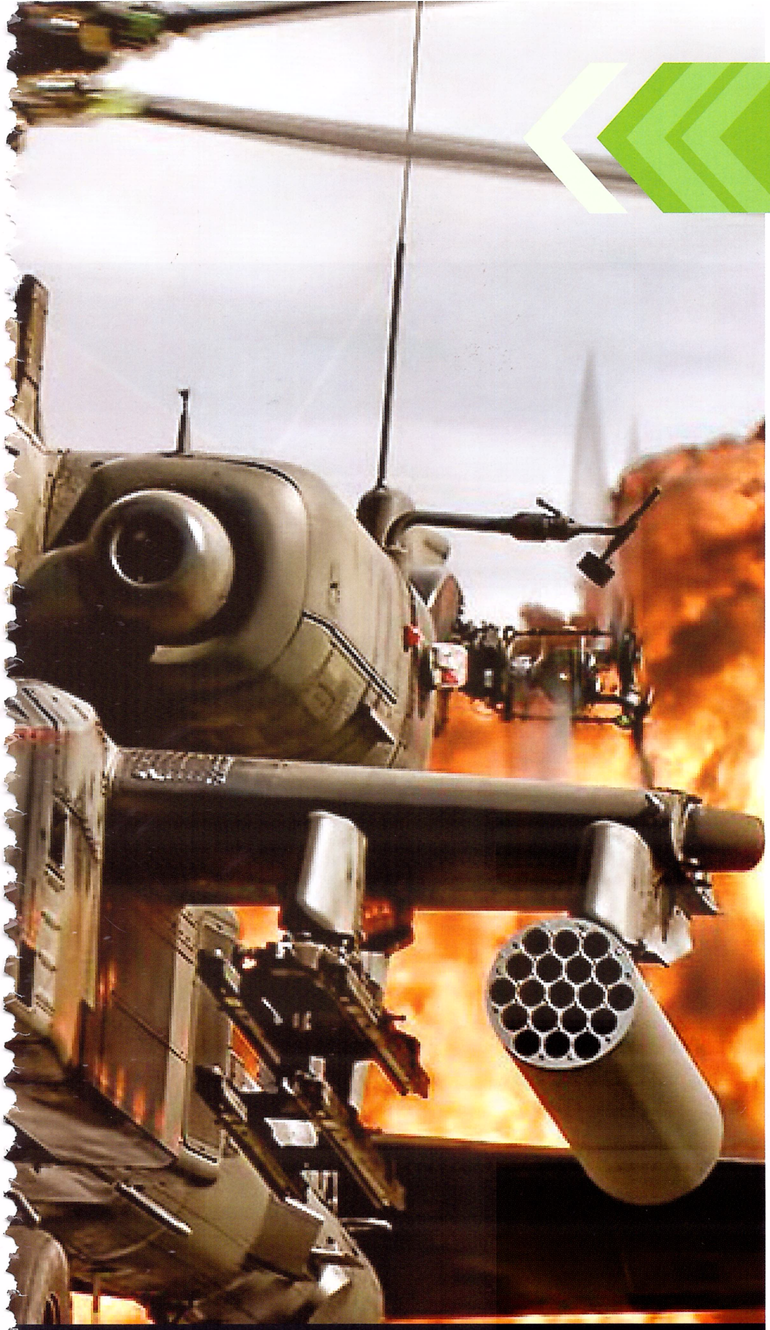
The Stockholm International Peace Research Institute (SIPRI) has released the data for arms transfers and India with 15 per cent of global arms imports tops the list of importers of major weapons during the period 2010-13. In 2014, Saudi Arabia replaced India as the world's largest importer of defence equipment. India has bounced back to the dubious number one position, after its 2015 purchases of American helicopters worth USD 3 billion and the 36 French fighters Rafale. China is ranked three and Pakistan is ranked 10th.

Indeed, Asia is stock-piling arms and it is a scary scenario. 'Enabled by continued economic growth and driven by high threat perceptions, Asian countries continue to expand their military capabilities with an emphasis on maritime assets', said Siemon Wezeman, Senior Researcher with the SIPRI Arms and Military Expenditure Programme. 'Asian countries generally still depend on imports of major weapons, which have strongly increased and will remain high in the near future.'

Even though the modern wars are asymmetric, countries are equipping themselves with more and more strike aircraft, stealth destroyers, unmanned combat aerial vehicles and more.

NDA Government signs billion dollars deals

India, under the Narendra Modi leadership, has signed deals worth billions to equip the armed forces. Many of the deals have



-Asia Stock

been pending for a long time and his government has taken decisive steps. Modi put at rest all speculation with regard to the programme of acquiring 126 medium multi role combat aircraft (MMRCA) for which French made Dassault's Rafale had been selected. With negotiations for Rafale getting stretched, Modi surprised everyone by announcing that India would buy 36 Rafale aircraft on a government-to-government basis. The deal is yet to be signed though. This decision has left the doors wide open for other fighter aircraft manufacturers to make a bid as India's needs are more.

India, under Modi's leadership, has made significant lean towards the United States of America, even as Russia and Israel continue to be top defence equipment suppliers. In September this year, the government cleared its first big ticket defence deal of US helicopters worth USD 3 billion. India is buying 22 Apache attack helicopters and 15 Chinook heavy lift helicopters from Boeing. The Apache attack helicopters will add to the firepower of the IAF, which now has Mi-35 Russian attack helicopters. The Russian attack helicopters were acquired in the early nineties and are now on the verge of retirement.

Earlier India had ordered from Boeing eight maritime reconnaissance aircraft P-8I, to which four were added later. The IAF also acquired 10 C-17 Globemaster from Boeing. From Lockheed Martin, the IAF acquired the C-130 Super Hercules. In total, the Indian armed forces acquired weapon systems and platforms from US companies are worth over US$ 10 Billion.

The Indian Air Force (IAF), established on October 8, 1932 as an auxiliary air force of the British Empire, is the world's fourth largest air force but has only 33 squadrons while it is insisting that it should be 42 squadrons to deal with any contingency.

The exact number of aircraft in service with the IAF cannot be determined. Various reliable sources provide notably divergent estimates for a variety of high-visibility aircraft. The International Institute for Strategic Studies estimates that the IAF has a strength of 1,27,000 active personnel, and Flightglobal estimates it has around 1,820 aircraft (862 combat planes). The IAF's primary air superiority fighter with additional capability to conduct air-ground missions is the Sukhoi Su-30MKI.Some of the fighter planes such as the Russian MIGs, the Jaguars and Mirages have been upgraded and according to the Chief of Air Staff, Air Chief Marshal, Arup Raha, these upgraded aircraft will come in for replacement in 10 to 15 years. India and Russia are jointly developing the FGFA (fifth generation fighter aircraft).

The new mantra in India is the aggressive initiative of the Prime Minister – 'Make in India' under which foreign companies can 'Make in India' and sell anywhere in the world. India is gung-ho about the prospects of the 'Make in India' campaign. Self-reliance is the main aim that is being pursued by the defence research and manufacturing agencies.

Pakistan faced with many challenges

Neighbouring Pakistan is a volatile state with challenges of terrorism and conflicts with India. Pakistan has found allies in the US and China, both of whom have been supplying defence equipment to it. Major US arms sales and grants to Pakistan since 2001 have included numerous items useful for counter-terrorism and counter-insurgency operations, along with a number of 'big-ticket' platforms more suited to conventional warfare.

The Pentagon reports total Foreign Military Sales agreements with Pakistan worth about $5.4 billion for FY2002-FY2014 (sales of F-16 combat aircraft and related equipment account for nearly half of this). Congress has appropriated about $3.6 billion in Foreign Military Financing (FMF) for Pakistan since 2001, more than two-thirds of which has been disbursed. These funds are used to

MARITIME

ROYAL NAVY
ZZ402

purchase US military equipment for longer-term modernization efforts. Pakistan also has been granted US defense supplies as Excess Defense Articles (EDA). Cost include training and support.

Recently, the United States handed over Pakistan 14 combat aircraft, 59 military trainer jets and 374 armoured personnel carriers which were earlier used in Afghanistan and Iran. "As the US withdraws its forces from neighbouring Afghanistan, the major defence articles have been transferred to Pakistan under its 'Excessive Defence Article' category, an internal Congressional report said. Also China is selling 110 JF-17s Thunder fighter jets to Pakistan in a joint venture project. The Pakistan Air Force (PAF) already received 50 Block I planes. A more advanced version (with a new air-to-air refuelling probe, enhanced oxygen system and improved electronic countermeasures system) will also soon enter service.

PAF was born immediately after its separation with India in 1947. The PAF got 16 fighter aircraft as its foundation. It started off with one squadron of eight Tempest aircraft but now has grown into a formidable force. From 1955 to 1965, the Air Force armed its squadrons with the most modern jet fighters and bombers, Sabres and F-104 Starfighters, B-57 bombers and C-130s transport aircraft. Now its inventory has gone up and according to reports it has JF-17 Thunder (53 numbers); US F16 Fighting Falcon (99); France Dassault Mirage III (75); France Dassault Mirage 5 – 82; F7P -91 and F7PG – 55. Under trainers it is said to have 298 ab-initio trainer aircraft, 120 intermediate jet trainers, 98 higher basic jet trainers (Cessna T37Tweet), and 34 advanced supersonic jet trainers (Northrop T38 Talon).

Bangladesh Air Force to induct seven squadrons by 2021

The Bangladesh Air Force (BAF) was established on September 21, 1971. It has over 22,000 personnel, including 1,500 pilots and is said to have a fleet strength of 190 aircraft of all types. Bangladesh Air Force has been part of major operations such as Operation Desert Storm, Gulf Storm, Gulf War and Chittagong Hill tracts operation. The force has been an active participant in the UN peacekeeping missions. The air force has plans to procuring aircraft and inducting seven squadrons of fighter jets by 2021.

After independence, the BAF received a significant donation from the former USSR. Among the aircraft delivered were ten single-seat MIG 21 MFs and two twin-seat MIG-21Ums. Later China also supplied some equipment.

The Bangladesh Air Force has an ambitious modernization plan to be implemented in upcoming years under the Forces Goal 2030. As per the goal, air force is to be a strong deterrent force to well protect the sky of Bangladesh. Currently, the BAF has concentrated on improving its trainer fleet and air defence capabilities. BAF has already taken the delivery of nine K-8 basic trainer aircraft, four Mil Mi-171SH combat helicopters and two Let L-410 Turbojet transport

aircraft this year. By the end of 2015, it will take delivery of 16 Yakovlev Yak-130, two AgustaWestland A2 139 maritime search and rescue helicopters, one Mil Mi-171 SH combat helicopter, one Let L-410 Turbojet and new 12 Nanchang PT-6s.

BAF is also in the process of acquiring new 4th/4++ generations fighters soon. Besides, the force is trying to make its own surveillance drones, which are expected to come in service by 2017.

Sri Lankan Air Force and Civil War experience

The Sri Lanka Air Force (SLAF) was founded in 1951 and has played a major role throughout the Sri Lankan Civil War. The SLAF operates over 160 aircraft and has a projected trained strength of 27,400 airmen and 1,300 officers. The SLAF has expanded to specialize mainly in providing air-support to ground forces, troop landing, and carrying out air strikes on rebel-held areas in the Northern and Eastern theaters, but is also capable of high- and low-level air defence.

In its early years, the air force was engaged primarily in immigration patrol, with occasional assistance in emergency relief. During the insurgency of 1971, the air force played a major role in restoring internal order; in addition to providing transport of supplies and troops, it participated in assaults against insurgent strongholds. Following the ethnic rioting of 1983, the air force was placed on permanent active status and participated in counter-insurgency activities and air strikes on the rebel-controlled areas of the Northern and Eastern Provinces.

Rapid growth began in the mid-1980s, when the Sri Lankan Civil War against Tamil separatists drew the service into a major, long-term security role. In 1982 the SLAF reactivated airfields at Batticaloa, Anuradhapura, Koggala and Sigiriya that disused since World War II, all later becoming SLAF Stations. During the First Eelam War between 1983 and 1987, the force grew by nearly 50 per cent.

Inventory goes up

After the 1983 riots, the government worked rapidly to expand the SLAF inventory, relying largely on sources in Italy, Britain and the United States. From the period 1983 to 1985, the Air Force acquired 11 Bell 212 helicopters, four Bell 412 helicopters, three SIAI Marchetti SF 260s, two Cessna 337s, one Hawker Siddeley HS748 and two Beechcraft Super King Airs. By 1985, nine more Bell 212s were added to the fleet, along with four Bell 412s. The 412s along with the SIAI Marchetti SF.260 aircraft advanced the attack capabilities of the SLAF. Central in the government's security efforts were six SIAI Marchetti SF.260TP turboprops which were used for rocket attacks and strafing. Additionally, the air force, with the help of Heli Orient of Singapore, equipped twelve Bell 212 and Bell 412 helicopters to serve as gunships and as transport vehicles for highly successful commando assault operations. The air force had a fleet of approximately eighty aircraft, of which sixty-four were reported to be operational in early 1988.

Since the start of the civil war the SLAF used its combat aircraft in a ground-attack role to attack LTTE targets in the then LTTE-controlled areas in the northern and eastern parts of the island. Following confirmation that the LTTE was using several light weight aircraft in 2006, the SLAF expanded its air defence capabilities which had been neglected for years. Extensive air defense radar network was established and ground based air defence strengthened.

In October 2008 the air force claimed its first air-to-air kill, when it reported that one of its Chengdu F-7G interceptors shot down a Z43 of the LTTE air wing when it attempted to attack a military base in Vavuniya.

By 2009 SLAF operated three FT-7, three F-7BS, six F-7G, two Kfir TC.2s, two Kfir C.7s, eight Kfir C.2s, seven MiG-27s and one MiG-23UB trainer. In April 2015, following a massive earthquake in Nepal the Sri Lankan government responded in deploying relief contingent from the armed services including teams form the air force, these teams where air lifted to Nepal by a SLAF C-130 of the No. 2 Heavy Transport Squadron, which was followed by other flights carrying in aid supplies. This was the first time a SLAF aircraft has been deployed on a rescue mission to a foreign country.

Regular, in-depth training imperative to keep pace with constantly evolving technology

Airlines worldwide are growing their international footprint, also strategizing to tap into potential growth markets. This has led to continuous fleet expansions with a large number of highly sophisticated aircraft being put into service. Here comes the critical issue of recruiting qualified and well trained professionals including pilots, cabin crew, engineers and maintenance personnel for successful operations. Not only are the airlines responsible, but also the Original Equipment Manufacturers (OEMs) have a crucial role in ensuring that the companies and professionals operating and maintaining the aircraft function on a parallel level of professionalism and safety.

Technically competent and professionally focused aircrew, technicians and dispatchers are vital to the accomplishment of safe flight operations, says Tom Huff, Aviation Safety Officer, Gulfstream Aerospace Corp. "A thorough understanding of the aircraft systems and operational procedures in an immersive training environment enables further knowledge retention and practical application, while exploiting the full capabilities of the aircraft."

Andreas Kaden, Managing Director, Lufthansa Technical Training GmbH

As a manufacturer, it is extremely significant that they have the ability to influence how their planes are piloted and maintained, says Chris Warton, Director of Flight Training, Sales and Customer Services, Bombardier Aircraft Training. "We know the aircraft inside out and we are able to provide a world-class training experience that goes above and beyond the standard outsourced course."

Andreas Kaden, Managing Director, Lufthansa Technical Training GmbH, says, "Profound technical basic, and aircraft type related training for maintenance and operations professionals is the one most important baseline for establishing a sustainable safe and economical operation of commercial aircraft. At Lufthansa Technik, both ab-initio and continuation training of maintenance and operations staff well exceed the levels as required by law and lay the ground for the renowned expertise of the airline group."

'Lifelong learning' inevitable

Both technological and regulatory change impact the aviation industry continuously and the skills required to maintain aircraft designed and built in the latter half of the last century by no means suffice to keep state-of-the-art modern aircraft flying safely and economically, states Andreas Kaden. "All staff in the industry must continuously adapt to the changing requirements and "lifelong learning" is the most commonly used proverb which describes best what they are faced with. It is one of the differentiating aspects in the industry how well organisations support this and Lufthansa Technik takes some pride in being an industry leader and forerunner when it comes to the application of new technology and upcoming legal requirements in the learning environment."

Bombardier provides pilots and technicians with the most up-to-date training on their aircraft, systems and configurations using effective and advanced training methods to ensure their customers receive "world-class flight training", says Chris Warton. "Regular training is imperative as technology is constantly evolving. Our business aircraft represent world-class luxury and efficiency and it's important that the professionals operating and maintaining them function on a parallel level of professionalism and safety."

Tom Huff remarks that training providers are increasingly offering enrichment courses specific to new technology capability and operation, and targeted safety training. They are also increasing course offerings and quality of maintenance technician training. "Gulfstream works collaboratively with training providers to develop technical training content and provides aircraft components, engineering support, and documentation to establish world-class training environments, with exceptional training capabilities at facilities located throughout the world," he continues.

Comprehensive and tailored training solutions

Bombardier offers comprehensive and personalised training solutions that meet all regulatory requirements and each customer's specific needs, notes Chris Warton. Training is delivered at Bombardier-run facilities in Montreal and Dallas; Customer sites worldwide using eLearning training systems; ATP sites in the United Kingdom, Amsterdam, and United Arab Emirates (UAE).

Do OEMs provide entry-into-service on to the customers' personnel development programmes directly? Gulfstream provides every customer with an entry-into-service pilot, cabin system specialist and maintenance technician to facilitate a seamless aircraft ownership and operations transition, says Tom Huff.
Chris Warton says Bombardier offers pilot support for new aircraft customers to ensure their aircraft is operated with the "highest safety standards" as it enters into service.

Tom Huff, Aviation Safety Officer, Gulfstream Aerospace Corp

Mark Pierotti, COO & Accountable Manager of Al Jaber Aviation and Avisa Gulf

At Lufthansa Technik, all training for maintenance staff is provided by the wholly owned subsidiary Lufthansa Technical Training GmbH (LTT), says Andreas Kaden. LTT provides for up-initio training of technical apprentices under a 3-year dual education programme in Hamburg and Frankfurt, and in both locations runs training centres for classroom training for certified technicians and for aircraft type training for all major commercial aircraft types. Courses are also open for participants from outside the Lufthansa Group and LTT provides classroom training on demand at customers' locations worldwide.

In the United Arab Emirates (UAE), aviation consultancy & training organisation Avisa Gulf, located in Al Bateen airport, Abu Dhabi, offers services in all aspects of aviation operations, maintenance and commercial activities. Their training courses extend from airworthiness and regulations, to safety management and operations management, plus many other subjects. Being part of an aviation company, with access to the airport and aircraft is a great advantage and their instructors are industry professionals, which brings great depth and added benefits for students, notes Dr Mark Pierotti, COO & Accountable Manager of Al Jaber Aviation and Avisa Gulf. "As well as training specialists and airworthiness specialists, our aviation consultancy and advisory service is very active in assisting start-ups both airlines (AOCs) and maintenance facilities (MROs), and restructuring existing operations to become more efficient and effective," he adds.

Palm Aviation provides essential training courses to their staff to make them realise the value and their role in delivering the final product, says Sameer Dabbagh, CEO, Palm Aviation. "We start off with the familiarisation phase after the new staff join us. In parallel, we provide our new members with courses in Ground Handling, Human Factors, Business Ethics and International Business Compliance."

Lufthansa Technical Training
Lufthansa Technical Training

Saudi Aerospace Engineering Industries (SAEI) CEO Nadir Khalawi says while some training is mandatory for the employees in certain stages of their career, others are vendor training, mostly out of the Kingdom. SAEI is expanding its facilities, which on completion will be the largest in the Middle East. This includes a Training Centre.

Sameer Dabbagh, CEO, Palm Aviation

Key challenges and issues that need to be addressed

Business aviation shares some common aviation community safety hazards such as fatigue, airspace complexity and ground movement collisions. Tom Huff says, "fact of life" threats to business aviation include remote airport operations, unpredictable schedules and limited support infrastructure. "Business aviation offers tremendous flexibility and freedom of action that requires absolute professionalism and safety focus to ensure mission

G550
N550GA

success. A robust Safety Management System that incorporates a positive safety culture can enhance safety performance and should be scaled to the size of the flight department operation."

The expanding global market for business aviation presents an exciting opportunity and a challenge for Bombardier with a large number of their aircraft worldwide that need to be supervised, notes Chris Warton. "This increased number of aircraft will result in a higher volume of pilots and maintenance staff internationally. As the industry expands, we need to stay on top of pilot and maintenance training to ensure that we deliver high-quality training to this increased number of professionals."

Samer Dabbagh says their main target is to "consistently" deliver a superior product to their clients. "We are pleased to operate out of DAFZA, as Dubai offers a complete range of skilled and trained professionals to select from, without going through the burden for overseas recruitment."

They have created processes to systematically manage and overcome anticipated challenges based on certain integrated processes, he notes. "We identify the requirements, create the right applicable solution, train our team to adapt and deliver the right solution, monitor results through KPIs and customer feedback and adjust as required, and continuously improve and fine tune the process to maintain "consistency" in delivering our superior product."

Nadir Khalawi, CEO, Saudi Aerospace Engineering Industries (SAEI)

In Nader Khalawi's view, the challenges related to recruiting MRO personnel are global, but SAEI plans to integrate the newly hired staff into the two-year training programme at the academy when the new facility starts operations.

Besides knowledge on technical aspects, the awareness of human factors in the labour environment and training of attitudes and behaviour are of paramount importance when it comes to safety aspects, remarks Lufthansa's Andreas Kaden. "These need to be addressed in training repeatedly but even more importantly, they have to be established in the day-to-day labour environment as common ground for all tasks and decisions taken even under adverse conditions like time pressure or environmentally strenuous situations."

Safety is paramount

Recent incidents indicate personnel behaviour and performance is crucial in successful operations. How can one ensure safe operations?

Tom Huff underscores that procedural non-compliance, lack of organisational oversight, and normalised deviant behaviour have been cited as contributing factors in several recent mishaps. "Flight data monitoring as a key element of active flight department safety assurance is a growth area. Aggregating the data provides a broader view of business aviation community safety performance and is the impetus for continuous improvement initiatives."

Aviation is extremely dependent on safety and quality aspects, and this is no experience from the recent incidents, but has been obvious since the first days of human flights, Andreas Kaden points out. "Therefore, the minimisation of possible technical and human errors has been a main focus within the whole aviation industry over the past decades."

Middle East MRO forecast at $4.6bn

Airlines in the Middle East will generate $4.6 billion in MRO expenditures in 2015, according to Aviation Week forecasts. While engine expenses account for 41%, components are slated at 22%. The Middle East commercial aviation MRO market is growing at a faster rate than the global average. While the majority of expenditures are driven by wide body aircraft, the Boeing 777-8 and -9 will account for the most new aircraft—12% of the 1,900 total aircraft delivered to the region over the decade, according to Aviation Week data.

ICF International also predicts the Middle East MRO market at $4.6 billion, but it pegs it to grow 6.7% per year, to $8.8 billion in 10 years, compared to $8.7 billion in Aviation Week's data. ICF Principal Richard Brown said 76% of that $4.6 billion is influenced by wide body aircraft, with narrow bodies accounting for 19%.
Four airlines—Emirates (29%), Qatar (15%), Etihad (15%) and Saudia (8%)—account for nearly two-thirds, or about $3 billion of Middle East MRO expenses, Brown said. These airlines are well equipped with in-house maintenance capabilities which explain why 76% of heavy airframe MRO is done within region. Of that, 81% of is performed in-house by airlines, "which means the opportunity for third-party suppliers targeting Middle East airframe and modifications is relatively small," noted Brown.

The consultancy predicts that the Middle East MRO market will require 11.7 million maintenance man-hours to support the region's growth by 2024, which has a compound annual growth rate of 6.7% compared to the global average of 3.8%. Middle East is challenged by a fragmented regulatory structure which makes it difficult to find enough qualified maintenance and engineering staff. While countries such as Saudi Arabia and the United Arab Emirates have larger cash reserves than Brazil and Venezuela, not all the countries in the Persian Gulf region enjoys a similar situation.

Trent 800
trac

market

The Middle East accounted for 5% of the 2014 fleet and 7% of the air transport MRO demand, according to Berger, but it is poised for a 5.3% CAGR over the next decade, higher than the 3.8% in Latin America. While there are many operational, cultural and geographic differences between the two regions, both are addressing regulatory and protectionist measures that could ease the movement of goods and people between countries.

Middle Eastern promise

For MROs, the Middle East could prove to be one of its most lucrative playing fields, albeit one not without significant challenges.

Home to an MRO industry with an average annual growth rate of 6.7 per cent, the Middle East has expanded rapidly in the past 10 years as a result of large-scale investment from airlines including Etihad Airways, Emirates Airlines Qatar Airways and Saudia. By 2020, the number of aircraft in the region is expected to double from its current figure of around 500, with large orders placed by airlines for the A350 and 787, among others.

Zilvinas Lapinskas , CEO , FL Technics

CEO of FL Technics, a global provider of tailor-made solutions for aircraft maintenance and repair, specializing in base and line maintenance, spare parts & component support, military aircraft component support, engine, APU and LG management, full aircraft engineering, technical training and consulting, as well as logistics and customs clearance, Mr. Zilvinas Lapinskas told Aviation Guide, "We constantly look for new opportunities in expanding our capabilities and penetrating new markets as well. The Middle Eastern MRO market is expected to grow around 7% a year and should be worth around $9 billion by 2025, so it is certainly a region to take in to account when considering expansion plans."

"FL Technics' main aim for the following year is a further diversification of our product range. Over the past several years we significantly diversified our already broad spectrum of services by adding engine, APU and landing gear support, launching online training platform, expanding our spare parts stock, etc. We have won the trust of such airlines as Turkish Airlines, Emirates, Etihad Airways, Garuda Indonesia and many others. However, our goal is to not stop improving and we will soon not only introduce services for new aircraft types but will also expand our presence in the emerging regions" he observed.

On his views on the MRO sector in the Middle Eastern region, Mr. Lapinskas noted, "Main Gulf carriers account for more than

Rahul Shah, senior Vice-President and Managing Director at AAR

a third of all MRO expenses in the region. However, the major players themselves will still encounter some issues, as for instance attracting and retaining technical talent has long been a challenge in the region. Just to get a grips of the problem, Germany, for instance, currently has 696 aircraft in their fleet, which means that there are 115 000 Germans for each aircraft. In comparison, the UAE with 9 million citizens is home to 470 aircraft, which means that there are only 19 000 people for each aircraft. In other words, the UAE has almost 10 times less talent to choose from and train in handling every new aircraft. Moreover, it is predicted that the Middle Eastern MRO market will require over 11 million maintenance man-hours to support its growth by 2024. In other words, region has the potential to largely rely on local MROs but the major issues facing maintenance sector is the lack of qualified workforce as well as limited access to the latest technologies, which vastly concerns the engine support. It is why local aviation players will continue to partner with maintenance professionals from Europe, North Africa, Southeast Asia as well as OEMs in order to assure sufficient maintenance for their ever-growing fleet," he signed off.

John Bowell, Managing Director of ADA Millennium — a JV between Abu Dhabi Aviation and JCBA— said that fleet expansions lead to more and more JVs being signed. "There are big moves towards in-house capabilities which open up opportunities for MROs outside the region to come and get into play for business here. Technology, new materials and IT are the sector opportunities that should convince people to make a presence here."

David Stewart, Vice-President at ICF International, pointed out that while the Middle East offers a lot of opportunities, MROs must find the answer to exactly what these opportunities are. "The growth is with certain airlines, namely Etihad, Emirates and Qatar, who are signing long-term deals with OEMs, as well as looking to build their own airframe maintenance capabilities in-house. A question to consider is just how much of this growth will actually available to third parties."

Rahul Shah, senior Vice-President and Managing Director at AAR, is realistic in his outlook of the independent MRO's Middle Eastern prospects and predicted OEM dominance in the region will continue. "While the Middle East MRO sector is expected to grow between seven to eight per cent a year for the next 20 years, for an impendent MRO like us, I don't see a lot of opportunity right now mainly due to OEM dominance," he said. "If the major airlines driving growth through big orders have a long-term OEM strategy that doesn't purchase anything from us, then this market would is a bad entry barring something really drastic happening to change this."

Like most countries and regions, issues over skilled labor shortages also threaten to inhibit growth in the Middle East. One statistic showing the gravity of this is the Middle East's burgeoning MRO sector will require 11 million maintenance man hours within the next 10 years to maintain fleets. So while opinions over where opportunities lay for MROs differed, there was a more common stream of opinions in how to address the skills shortages: investment.

One airline doing this is low-cost carrier flydubai. Mike Ainsworth, head of maintenance at the airline, oversaw the building of its MRO division when it was setup in April 2011. The intention, according to Ainsworth, was for a multi-national workforce and flydubai got just that, with its entire maintenance staff currently comprised of expatriates. While Ainsworth admitted this is not something that will ever be totally reversed, he said the airline is intent on bringing more Emirati technicians into its ranks in the coming years through a soon to be established apprenticeship scheme.

Ashley Davies, senior lecturer of aircraft maintenance at Abu Dhabi Polytechnic observed that the way in which the industry acquires existing talent has also changed. "It was common for military personnel to join airlines once they had left that career, but now with military numbers greatly reduced, there's no longer that pool of experienced engineers coming out and moving into commercial aviation."

Davies stated the number of UAE nationals who are licensed aircraft engineers stands at just 349 and it is the industry that must act to change this. "The shortage is only going to get worse with the global aviation industry forecast to double by 2033, and we now have to look to our own to try and bridge this gap," he said. "Training facilities, OEMs, MROs and aircraft operators are going to have to form alliances and work together in achieving this."

Surf, read, watch and

According to In-Flight Entertainment & Connectivity Market – Analysis & Global Forecasts to 2020, published by MarketsandMarkerts, the in-flight market is expected to reach US$5.80b by 2020 from US$2.85b in 2015 at a compound annual growth rate (CAGR) of 15.23% during the forecast period. The following study also covers hardware, content & connectivity out of which connectivity segment is expected to grow at a CAGR of 28%.

"As operating margins remain low and competition intensifies, airlines are identifying factors rather than prices to attract customers. In-flight and connectivity will be the key for airlines to achieve differentiation and boost brand royalty," according to Frost and Sullivan Aerospace and Defense Consultant Lisa Montzavinow.

IFE variations

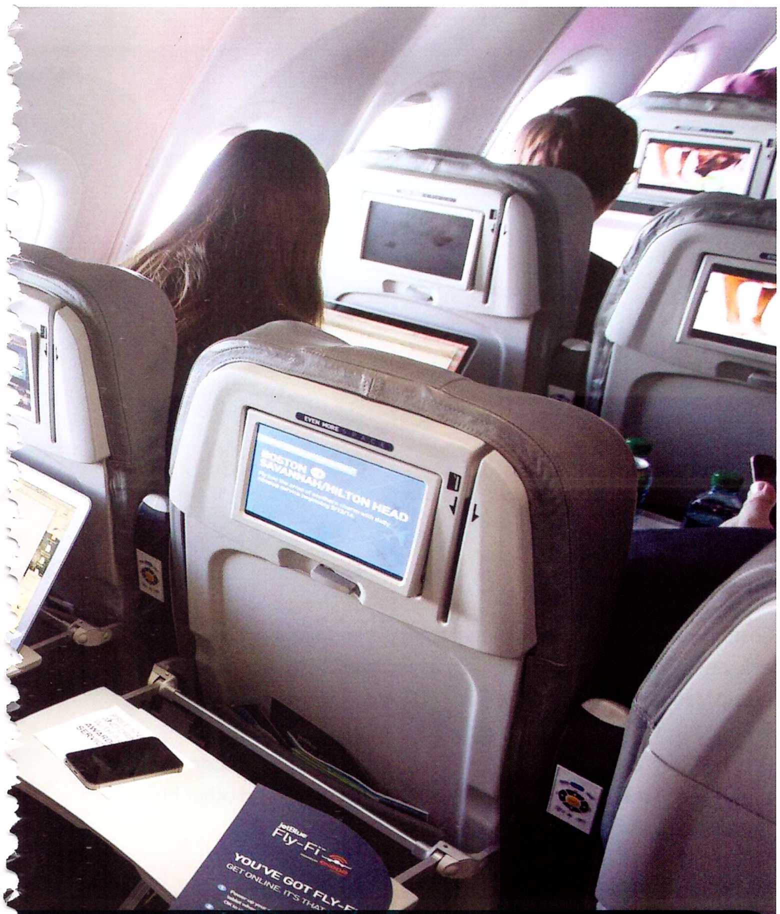
Various airlines offering IFE have dedicated selections for all kinds of passengers. From games and audio books for children, to movies which have been carefully picked up, the IFE offers infotainment to passengers belonging to various age groups and ethnicities. Some common picks that airliners offers range from current blockbusters, to film classics, from music to games, ensuring that passengers have a good time while they are flying.

Qantas Head of Digital and Entertainment Jo Boundy said, "Qantas provides a range of entertainment options including on-demand seatback screens, Q Streaming and, on selected flights, overhead screens. In terms of entertainment categories, we offer TV shows, movies, games, music and access to nearly 4,000 leading titles of the world's largest newspaper and magazine platform, PressReader."

Long-haul flights

Travelling by air, especially a long-haul flight could be a painful task. Long flight duration, coupled with limited space and an unusual cabin environment in terms of air pressure, humidity and continuous noise can cause physical and psychological discomfort and stress for the passengers.

Richard D'Cruze, British Airways' Head of In-flight entertainment noted, "IFE greatly enhances the travel experiences as it allows



listen

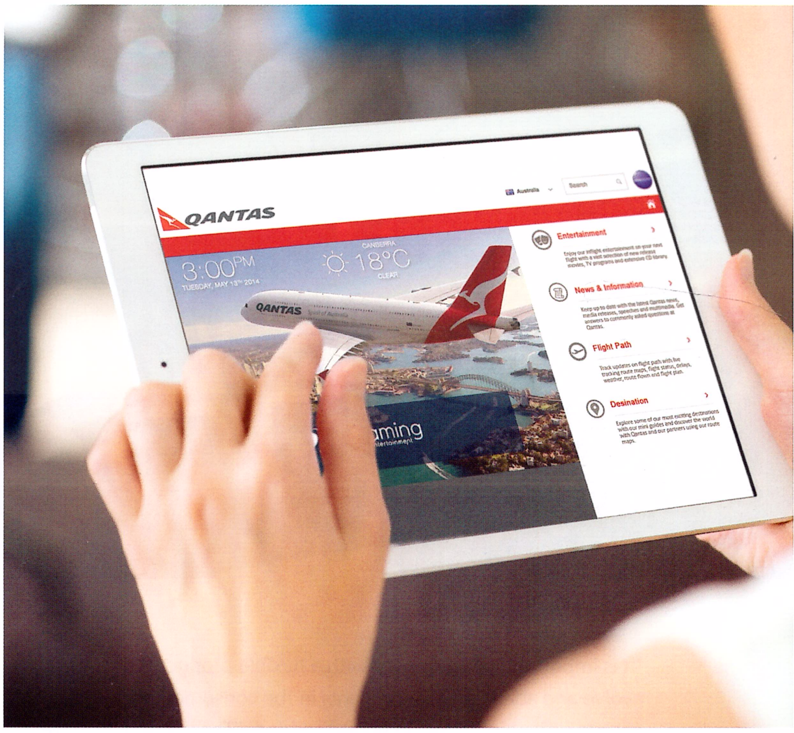
customers to make better use of their time on flights and serves as a great distraction. Providing IFE on long-haul flights is now an expected product offered on international airlines. It's an element of the journey that, we know, contributes to a high customer satisfaction."

Jo Boundy added, "Our customers look forward to make the most of the opportunity for some uninterrupted viewing time on board and for many it's a chance to catch up with their favourite shows or watch some of the latest blockbusters."

Travel experiences

Passengers' experiences from a particular airline's IFE are benchmarked against their experience with consumer electronic devices and technologies to which they are accustomed. A good IFE system must engage passengers with a variety of infotainment such as audio, SMS, shopping destination etc. at all times.

Lufthansa's spokesperson Klaus Gorny, noted, "We see passengers especially on long-haul flights ardently looking forward to an extensive entertainment offer in order to make their journey feel faster. Furthermore, many passengers find time on their flight to



catch up with the latest movies or series which normally they do not have time in their busy day-to-day life. We also witness that our young travelers use many of our interactive games while other passengers enjoy or well-selected movie offer."

Observed Jo Boundy, "Qantas invests heavily in making sure we have fresh content and a wide range of programs to cater for different tastes and customers of all ages. This includes a dedicated kid's channel where they can watch age appropriate content such as cartoons or play games to pass time."

While Richard D'Cruze added, "IFE greatly enhances the travel experience as it allows customers to make better use of their time on flights and serves as a great distraction."

Consumer expectations

The rapid pace of development in the consumer electronics market has had an impact on the entertainment systems now available for aircraft. The latest systems features high definition (HD) capacitive touch screens with media servers capable of holding thousands of hours of content. "This allows us to better meet our consumers' expectations by providing an entertainment experience that is similar to that which they get on the ground," says D'Cruze.

"The choice has significantly increased over the past years because personal devices have become lighter and more affordable. We also witness passengers bringing in their own content," said Klaus Gorny, Lufthansa's spokesperson.

Competitive innovation

With consumer technology developing at a phenomenal rate, people are accustomed to being engaged and entertained 24/7 whether it's on their phone, computer, iPod or TV. As a result, in-flight entertainment is becoming one of the most competitive and innovative areas of the in-flight experience.

PROFILE DETAILS
in.
FLIGHT KL
AMS - JFK
KLM

"It is important we keep pace with a flexible product that can evolve and adapt to developments in the consumer electronics and entertainment industry," Jo Boundy added. "The way in which we all consume media has changed greatly over the recent years. With streaming media and mobile devices now allowing us to watch where and when we want, resulting in consumers watching greater amounts of media with expectations to do so even when flying," D'Cruze opined.

Popular IFE onboard

Constant accessibility is the key, but passengers also desire fast connections that enable them to stream videos, live chat with friends and family.

According to Qatar Airways, the future of IFE depends on connectivity as it is a defining aspect of the passengers' onboard experience. The rise of wireless connectivity and the increasing trend of passengers bringing their own devices have dramatically changed the face of the in-flight passenger experience and also has become increasingly influential on a passenger's buying and wireless usage behavior, including flight selections and in some cases, pay more for a specific flight.

"Wireless connectivity and in-flight TV is definitely an important part of the future. The likes of jetBlue, Delta and Virgin America are already doing a great job in this area and Southwest Airlines has pressed in TV over IP service which allows passengers to stream live TV on their own devices," explains Mary Kirby, Editor-in-Chief of Airline Passenger Experience magazine.

A recent survey suggested that more than three quarters of Middle East passengers view in-flight connectivity as important or vital, but just 27% of the UAE travelers have accessed Wi-Fi in the air.

Airline innovation

United Airlines is continuing the expansion of its 'United Private Screening' in-flight entertainment with the launch of free personal device entertainment on two-cabin United Express regional jets. Customers on flights with personal device entertainment can enjoy popular releases of films such as 'Birdman', 'The Second Best Exotic Marigold Hotel' and the 'Taken' trilogy, as well as kid-friendly favorites such as 'Alexander and the Terrible, Horrible, No Good, Very Bad Day' and 'The LEGO Movie'. Hours of popular television shows are also available and may include HBO's 'Veep' and other hit shows.

Virgin American will begin operating the first of its 10 aircraft equipped with superfast Wi-Fi allowing users to stream movies or series from their Netflix accounts. The airline recently also introduced high-quality surround sound on some pay-per-view content, including episodes of HBO's popular shows such as 'Game of Thrones'. The system, which is coming to all planes next year, will also feature retro games such as Pac-Man.

Wi-Fi have also been a boon for airlines such as Southwest, which now offers satellite-based Wi-Fi for domestic flights on about 80% of its fleet, with gate-to-gate connectivity for passengers with their own electronic devices.

Passengers can freely view live television, stream music or send messages free and watch pay-per-view movies. However, Southwest restricts high bandwidth streaming and does not allow passengers to stream movies from sites such as Netflix and Hulu or use video phone services such as Skype.

Alaska Airlines has a similar offer for video content on flights of more than 3.5 hours. Air France has an app that downloads newspapers and magazines free as long as 30 hours before the flight.

Airlines have also taken advantage of the larger digital bandwidth to offer unique programming. Alaska Airlines features videos from the Seattle International Film Festival. Hawaiian Airlines has a video channel with Hawaiian music videos and audio channels for passengers to snooze to the splash of wind through the palms. British Airways offers a series of channels to help flyers relax. Offerings include footage of puppies and kittens, a video series on meditation and 'Slow TV 'with marathon coverage of someone knitting or un-edited 7.5 hours train trip.

Some airplanes such as Airbus A380, mostly flown by the Middle Eastern and Asian airlines and a handful of European carriers, have cameras that stream take-offs and landings. Passengers can watch the scenery below on one channel or take in the view from the cock-pit on another.

Most investments have been made in video programming, but a number of airlines are focusing on their audio content too. Delta Airlines offers its Delta Artist Spotlight, highlighting emerging artists including Scottish electro-pop band Chvrches, US singer-songwriter Banks and, when it was introduced in June 2014, a pre-Grammy Sam Smith.

Short flight entertainment

While Wi-Fi access has improved entertainment options even on short flights, features generally increase with distance flown and seatback screens have essentially become standard on long-haul, transoceanic routes.

"Inflight entertainment is still something that engages customers and keeps them coming back," said Paul Ng, Manager of Inflight Entertainment for Singapore Airlines. "On a 12 to 15 hours' journey you need something to keep them entertained." This year, Singapore introduced a system for premium economy cabins for those travelling to the United States in December. It will have a swipe-screen remote control that also serves as a mini second screen, allowing passengers to look at a flight map, play a game or learn a foreign language while watching videos on a 13.3-inch monitor.

Carriers are also paying special attention to children. On more than 200 domestic aircraft with streaming video service, American Airlines offers two free family movies per month (recently they were 'Thor' and 'Saving Mr. Banks') as well as more titles to rent. Air France offers an app that allows children to digitally colour pictures and download free games before takeoff.

KLM's 'Meet and Seat' service allows passengers to upload personal information and pick a seat next to someone with similar interests. Virgin America allows its passengers to send a drink to a fellow passenger through its system and Etihad Airways lets you e-chat with other people onboard.

What's next?

With the advent of digital content and on-board Wi-Fi and the rise in personal laptops, smart phones and tablets, airlines are beginning to anticipate passenger-supplied digital hardware and provide IFE systems that can stream content on to passengers' devices.

This trend is beneficial to airlines as passengers pay for, maintain and upgrade devices. This is particularly cost-effective as IFE systems are traditionally one of the largest line item costs of outfitting a plane.

"The future of inflight entertainment is all about more powerful and reliable hardware with more simple and intuitive software. It is also making it easier for customers to explore and engage with our Q-Entertainment content. We are committed to ensuring that Qantas has the latest and most desirable in-flight entertainment in the sky," Mr. Boundy noted.

Airlines have been slow to appease the consumer demand to install Wi-Fi connectivity on aircraft, but this is changing rapidly. There are currently eight airlines that offer free inflight Wi-Fi which include Emirates, JetBlue, Turkish Airlines, Air China, Philippine Airlines, Hong Kong Airlines and Nok Air, and many others offering paid Wi-Fi and/or GSM internet access.

Thales, a key player in the on-board entertainment solutions space, is working on embedding gesture control and eye tracking technology into in-flight entertainment systems.

With the gesture control technology, passengers would no longer need to use a controller to interact with the screen. Meanwhile, with eye tracking technology, passengers would no longer need to hit the pause button on a movie before interacting with an air stewardess.

The industry is also looking into integrating directional acoustics into airplane seats, such that a passenger would no longer need to use headphones. Directional sound is a technology that concentrates acoustic energy into a narrow beam so that it can be projected into a specific area much as a spotlight focuses light.

"We are striving to get as close as possible to the latest consumer technology. Our goal industry-wide is to make sure that the passenger has as close an experience in the air as on the ground," the Thales spokesman said. Qantas partnered with Samsung Electronics Australia this year to launch a trial of virtual reality (VR) entertainment for premium passengers. "These devices will provide virtual tours, showcasing Qantas products and play the latest in-flight blockbuster movies," added Jo Boundy. Qantas is also working closely with production company Jaunt to develop live-action content including destination footage.

As new devices are constantly emerging to make our travel experience better, KLM is taking a step further and experimenting with 'Social Seating' – a new feature that allows passengers to choose seatmates based on social profile.

As mobile Wi-Fi develops further, and the technology opening up to airlines becomes even more sophisticated, these trends will continue to evolve. But for the time being, airlines should very carefully consider which passenger demographic they are targeting with their in-flight and the image and branding that they attempt to create.

"Passengers expect seamless travel experience with personal care as well as digital support at all times. This is the service Lufthansa aims to provide by integrating digital experiences on the ground and on board. IFE plays an important part in this process," Lufthansa Airlines spokesperson Klaus Gorny said.

South Asia aviation

Over the next 20 years, world air cargo traffic is expected to grow at 4.7 per cent per year. The International Air Transport Association (IATA) predicts that world air cargo traffic will increase from 207.8 billion RTKs (revenue tonnes per kilometre) in 2013 to 521.8 billion in 2033. Asia will continue to lead the world in average annual air cargo growth, with domestic China and intra-Asia markets expanding 6.7 per cent and 6.5 per cent per year, respectively.

In this write-up we will look at air cargo trends in four South Asian countries (India, Pakistan, Sri Lanka and Bangladesh). South Asia air cargo flow exceeds 1.67 million tonnes per year and constitutes approximately 4 per cent of the world's air cargo traffic in tonnage and 4 per cent in tonne kilometres.

South Asia cargo expands

South Asia continues to expand economically. The region saw 4.9 per cent collective economic growth in 2013. It remains one of the largest population centres in the world with more than 1.6 billion people, nearly one quarter of the world's population. Total international air cargo flowing to, from, and within South Asia amounted to 1.68 million tonnes in 2013.

Asia Pacific is South Asia's leading air trade partner, accounting for 30 per cent of the region's total air trade. Air trade with Asia Pacific grew 11 per cent in 2013 to 504,000 tonnes. Europe is South Asia's second largest trade partner. Air cargo tonnage between South Asia and Europe expanded 2.5 per cent in 2013 to 477,000 tonnes a year. Foreign carriers transport much of the cargo to and from the region. India is the largest air cargo market in the region with foreign carriers transporting over 80 per cent of all international cargo to and from the country.

Overall air exports from the region comprise primarily textiles and apparel. Other smaller, yet growing, air export commodities for the region include meat and produce. The leading imports to South Asia are computing equipment; small packages; and capital, electrical, and telecommunication equipment.

Indian domestic air cargo market expands

From 2003 to 2013, the domestic Indian air cargo market expanded at a 6.9 per cent average annual rate. In 2013, domestic Indian air cargo increased 2.3 per cent over 2012 to 371,000 tonnes. The expansion is projected to continue at a rate of 6.3 per cent per year up to 2033, when it will reach 1.2 million tonnes flown per year.

E-commerce - the key driver

The biggest growth story under the Narendra Modi government is the explosion of e-Commerce. The race among online vendors

– Positive trends

Bangladesh
TFM

to deliver first has propelled India's domestic air cargo traffic since May 2014, enabling it to grow at an unprecedented 21 per cent to 25 per cent in six of the past 14 months, with double-digit growth in virtually every month. Growth in cargo movement has been the sharpest at airports in Bengaluru, Hyderabad and New Delhi "home to major warehousing hubs for big ecommerce players."

In the first nine months of 2014-15, cargo revenue at India's largest passenger carrier Indigo was USD 477 crore compared with 485 crore in 2013-14. Jet Airways' cargo income touched 1,413 crore in 2014-15, growing at a moderate 6 per cent. "This growth in domestic air cargo has been primarily driven by ecommerce and is a positive indicator, from the economy's point of view, of higher investments in the logistics sector that is a high job creator," said Manish Agarwal, of consulting firm PwC. However, air cargo as a proportion of India's total freight and aviation business is still low.

Pakistan's new aviation policy to spur growth

Pakistan's economic freedom score is 55.6, making its economy the 121st freest in the 2015 Index. It has improved on its score from 126th with modest improvements in investment, business and trade freedom. Pakistan is ranked 25th out of 42 countries in the Asia– Pacific region, and its overall score is below the world and regional averages.

About 95 per cent trade of Pakistan is carried out by sea. However, expensive articles, perishable goods and items requiring quick delivery are sent by air in spite of much higher freight rates. Although in terms of weight the share of exports sent by air is about 1.3 per cent, in value terms it is estimated to be about 8 per cent. There are 42 civil airports in Pakistan, out of which 10 are categorized as international airports.

The EU is the single largest trading partner of Pakistan absorbing over one-third of the exports. The EU accounted for 12.4 per cent of Pakistani imports and 22.6 per cent of its exports. Pakistan exports rice, oranges, mangoes, furniture, cotton fibre, cement, tiles, marble, textiles, clothing, leather goods, sports goods, cutlery, surgical instruments, electrical appliances, software, carpets and rugs, ice cream, livestock meat, chicken, powdered milk, wheat, seafood (especially shrimp/ prawns), vegetables, processed food items etc.

The national airline is Pakistan International Airlines (PIA) which has shown a downward trend since 2002 in its performance. The government is taking initiatives/steps to improve the performance of PIA by contracts re-negotiation, route rationalization, re-deploying aircraft on more profitable domestic and international routes.

The national aviation policy suggests for efficient and quick transit, a single window clearing mechanism and facilities for warehousing, weighing scales, airline offices, freight forwarders, customs house agents, Government and regulatory agencies, airline ground handling agents, insurance and banks' facilities, etc. shall be made available under one roof. Infrastructure of a cargo village shall include multi-modal transport, cargo terminals, cold storage centres, automatic storage and retrieval systems, mechanized transport of cargo, dedicated express cargo terminals with airside and city side openings, computerization and automation.

The plan shall be based on PPP at all major international airports which shall be promoted as trans-shipment hubs through development of requisite infrastructure. Cargo villages shall be established on PPP model at major international airports and linked with national trade corridor. Cargo villages, one in South at Karachi and other in North is to be set up.

The available land at AIIAP, Lahore and JIAP, Karachi are to be given to private companies to develop: centres for perishable facility, cold chains, common facilities for freight forwarders etc.

Announcing the policy, Prime Minister Nawaz Sharif said, "The present taxes and duties on the aviation sector are unjustified, and a major hurdle in the growth of travel and cargo handling through air."

Bangladesh - one of the fastest growing air cargo markets
There are currently eight airports in operation in Bangladesh - three international and five domestic. Despite the very short domestic travel distances in this small country (less than 30 minutes), the domestic airports could be sustained because of a lack of bridges over the many rivers that crisscross the country making road and rail travel time-consuming and cumbersome. Over the years surface transportation is improving and some of the domestic airports are losing out. On the other hand, the international airports showed an opposite trend as air cargo handled in Dhaka and Chittagong continues to grow. Bangladesh (339,000 tons) is one of the fastest growing markets.

Sri Lanka

In 2014, the Sri Lankan economy showed its resilience in the face of domestic as well as external challenges. Real GDP grew by 7.4 per cent in 2014, in comparison to the growth of 7.2 per cent in 2013. Earnings from exports grew by 7.1 per cent in 2014 compared to the previous year and reached US dollars 11,130 million, reflecting increases in all major categories. The highest contribution to export earnings was from industrial exports, supported by the substantial increase in exports of textiles and garments. Earnings from textiles and garments exports, which accounted for about 44 per cent of total exports, recorded an increase of 9.4 per cent in 2014, reflecting increases in garment exports to both traditional and non-traditional markets.

This revival was reflected by 9.5 per cent growth in the import volume index in 2014, compared to the contraction of 1.5 per cent experienced in 2013. Accordingly, import of consumer goods increased significantly by 20.2 per cent during the year compared to 6.6 per cent in 2013, due to higher demand for both food and drink, and other consumer goods.

The freight ton kilometres flown by SriLankan Airlines and Mihin Lanka contracted by 1.0 per cent during 2014, compared to 0.7 per cent contraction in 2013. However, the passenger kilometres flown by the domestic aircraft operators grew significantly during the year continuing its positive contribution to the sector. Further, air cargo tonnage handled by the Bandaranaike International Airport increased slightly during the year. Total volume of cargo moved through the Bandaranaike International Airport (BIA) increased by 4.1 per cent to 192,371 MT. The total number of aircraft handled at BIA increased by 8.5 per cent to 55,288 during 2014.

Corporate Profile

Atlantic FuelEx

www.atlanticfuelex.com

Atlantic Fuelex Afghanistan

Atlantic Fuelex Afghanistan is an emerging company and has invested a large capital in petroleum products. Below is detailed information on the Mechanical, Civil, Structural and Electrical installations of Atlantic Fuelex Afghanistan fuel facility. Mechanical installations include Bulk Fuel Storage Tanks (vertical and horizontal), Upload and Download System, Fire Fighting Pump Stations, Cooling System for Fuel Storage Tanks and Fuel Filtration System. Civil Installations include offices, residential area, security towers, quality control buildings, boundary wall of the facility and fuel storage tanks, roads and security barriers inside the facility. Electrical installations include electric motors their wiring, flood lights, generators, electrical wiring of civil installations, grounding of electrical appliances, lightning arrestors over the bulk fuel storage tanks.

Bulk Fuel Storage Tanks

Atlantic Fuelex Afghanistan has a large fuel storage capacity by the virtue of a number of vertical and horizontal storage tanks. These storage tanks are constructed according to international standards by skilled technical workers. The standards implemented in the construction of fuel storage tanks are given below.

- American Society for Testing Materials (ASTM)
- API 650 Standard Construction and Design
- API/IP 1590 for aviation fuel micro filters
- API/IP 1581 for aviation jet fuel water filter separator
- API/IP 1596 for aviation fuel water filter separator Vessel
- SSPC and SIS Standard for Sand Blasting
- ASME B31.3 for piping construction

For better management the Fuel Storage Tanks have been divided in two blocks. Each of these blocks can be used for the storage of any liquid fuel like TS1, JP8 JA1 etc. These blocks are interconnected and can be accessed from any upload and download points.

Block A contains 5 horizontal fuel storage tanks. These storage tanks are constructed according to the standards stated above. These vertical storage tanks make about the 65 per cent storage capacity of the Atlantic Fuelex Afghanistan fuel facility. Three of these storage tanks have a volume of 1000 MT. each, and the other two have a volume of 2000 MT. each. The total storage capacity of these vertical storage tanks is nearly 7000 MT.

Block B contains 3 vertical storage tanks. These storage tanks have a total storage capacity of 3 million liters. Their height is 6m and diameter is 15m. These storage tanks are also designed according to the international standards.

Fuel Pumps

Specified fuel pumps are installed in Atlantic Fuelex Afghanistan fuel facility. These pumps fulfill the upload and download duties for the facility. These pumps are installed separately for upload and download area. There are three upload pumps each one capable of delivering Fuel at a rate of 600 GPM. Atlantic Fuelex Afghanistan has installed 3 pumps for downloading fuel from fuel tankers. They are specified fuel pumps, with 600 GPM download ratio.

Fire Fighting System

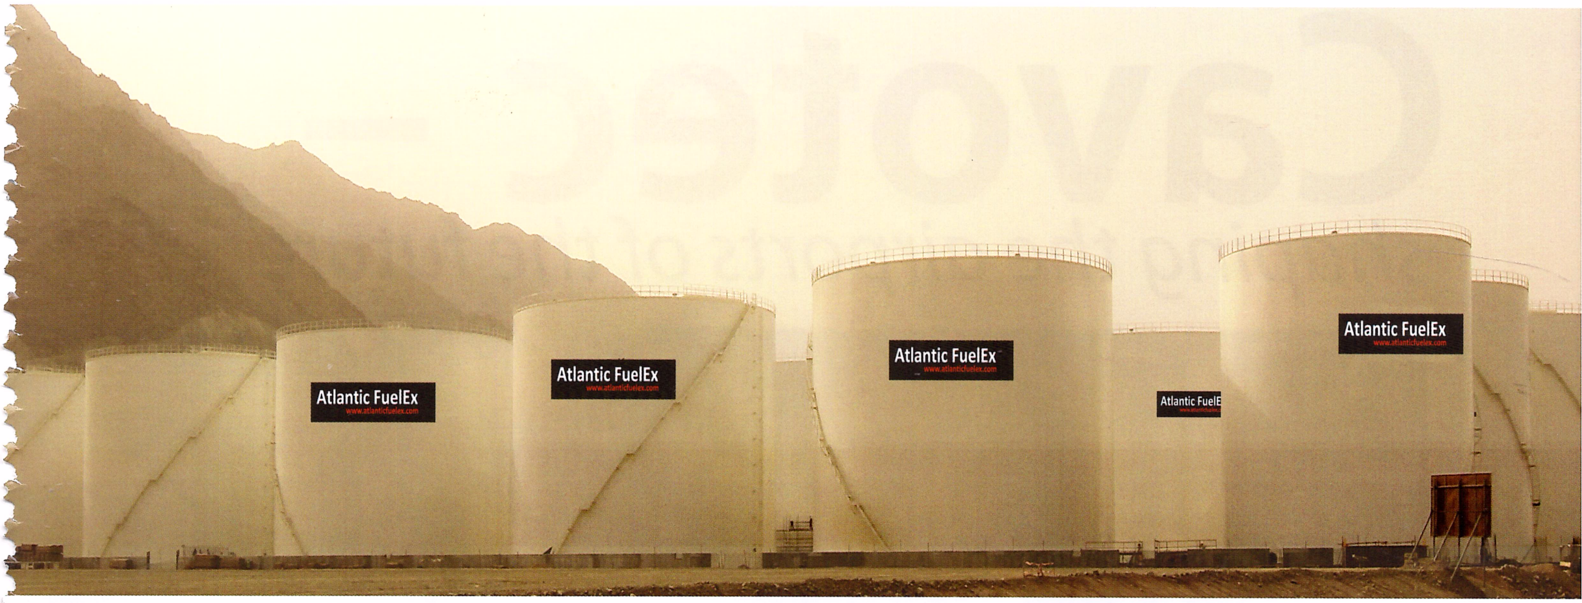
Fire fighting system is one of the most important part of a fuel storage facility, this is why Atlantic Fuelex Afghanistan has adopted all important measures to make sure the safety regarding the fire fighting system. Atlantic Fuelex Afghanistan has adopted 3 methods for this purpose.

Installation of Fire Fighting System: In this system Atlantic Fuelex Afghanistan has managed to install a fire fighting pump station, which consists of 6 fire fighting pumps. Each one of them has a 55kw electric motor and centrifugal pump 4x4 inch. Motor and pump are connected by shaft coupling. All these pumps are supplied with two storage tanks on their suction side.

Mobile Fire Fighting System: This consists of two fire fighting vehicles. These two vehicles are always at stand by to handle any unwanted event. Each one of these vehicles has 5,000 liters water storage tanks and 1,000 liter foam storage tank. These tanks are connected to the suction side of the fire fighting pump, which has a 40m striking range. Each vehicle is controlled by 4 skilled fire fighters. These fire fighters are trained and equipped with special fire fighting skills.

Fire Extinguishers: Fire extinguishers are an additional and most important step that Atlantic Fuelex Afghanistan has taken to control small incidents on the spot. Fire extinguishers are kept on each important and vulnerable area. A guide line paper is supplied with each fire extinguisher, so as, to make it easier for everyone to use fire extinguisher. For this purposes Atlantic Fuelex Afghanistan has trained all its employs with practical use of Fire Extinguishers.

Keeping in view the importance of quality control Atlantic Fuelex Afghanistan has established a Standard A level Laboratory and



Quality control system. The laboratory is supplied with all modern and advanced technology testing machines. These machines are capable of making correct and precise conclusion about any materials related with liquid fuels. Along with this the laboratory is supplied with Additives, Tracers, Water Detectors and all other necessary laboratory materials.

The laboratory is being operated by an experienced and educated staff under the supervision of laboratory manager. The quality control team of Atlantic Fuelex Afghanistan works in coordination with its laboratory staff. Quality control staff is responsible for keeping every single object of the facility in accordance with up to date national and international standards.

In general fuel quality is controlled in two most important steps: Filtration and Laboratory test. In the first step incoming or outgoing fuel is passed through water filter separators to remove the unwanted particles (dirt and water) from the fuel. Then the fuel is tested in laboratory for various types of unwanted particles in it.

Admin and Residential Area

A separate side for administration and residential building has been allocated inside the facility. The total area of administration and residential area is 2,500 sq m. Offices and residential areas are separated from each other. These building can handle the whole facility staff and workers inside the facility.

Parking Area

Atlantic Fuelex Afghanistan has a large truck parking area. Several hundred trucks can be parked in it easily. Parking area contains 3 vast fields surrounded by open side roads to ensure easy parking. Parking area can be used in summer as well as in winter.

Atlantic Fuelex Afghanistan has taken concrete steps to secure the whole facility. For this purpose security guard tower has been built up at a distance of 70m away from each other around the boundary wall of facility. Special security steps have been taken at the entrance and exit gates. The gates are secured to extreme limits by building up blast resistant security barriers.

Specially trained security personals have hired to ensure maximum security. Flood lights have been installed around and inside the facility to ensure maximum visibility at night and low light times. Security barriers have been set up at suitable places inside the facility. Fuel storage tanks, parking area and residential area are all separated from each other through strong security and visibility barriers.

Safety

Atlantic Fuelex Afghanistan strives to ensure that extreme safety rules are implemented in its facility. Special sign boards and notice boards are installed throughout the facility. Special warning symbols are also installed at suitable places. Fire extinguishers are kept at suitable places to prevent any harmful incident as it takes place. Emergency showers are installed at each upload and download points, supplied with eye wash etc.

Conclusion

Atlantic Fuelex Afghanistan has one of the best fuel storage site in Kabul Afghanistan. It has an upper hand over other fuel storage facilities by the virtue of the following properties.

- Huge storage capacity
- A large number of fuel storage tanks enable it to store a variety of Liquid Fuels
- Advanced A Level Laboratory
- Advanced Filtration System
- Various points for Upload and Download of fuels
- N.E.C. certified electrical wiring
- S.G.S. calibrated storage tanks and flow meters
- Huge parking area
- Integrated security system
- Large administration building
- Large residential building for staff and workers

Cavotec –

shaping the airports of the future

Cavotec - A leading systems integrator

Cavotec is a leading systems integrator in the global airports sector. Our comprehensive range of innovative ground support equipment (GSE) includes air, fuel, electrical power and water systems housed in underground pits, tunnel systems and caddies. We develop technologies for our own customers, and as a trusted partner of leading OEMs.

Global expertise and local presence

Cavotec has global reach with local presence. Supported by extensive engineering expertise drawn from applications around the world, we work closely with customers and suppliers locally to deliver systems that meet the specific demands of each project.

The Cavotec product range includes 400Hz power systems, pre-conditioned air (PCAir) units, refuelling and Wet Services, tunnel systems, connectors and tow-bars, cable coilers, crocodile systems and battery-driven caddies. Our innovative technologies help reduce tarmac congestion, improve efficiency and reduce environmental impact.

Cavotec's Centres of Excellence

Cavotec's Airports Market Unit comprises three 'Centres of Excellence'. Cavotec Germany is home to our Cavotec Fladung airports division which designs and manufactures a broad range of in- and above-ground GSE. Cavotec Dabico in UK and USA has been at the forefront of in-ground fuel delivery systems for some forty years. Its systems are in use at airports and air bases worldwide. Cavotec INET in USA designs manufactures and installs stationary and mobile aircraft servicing equipment. Through its domestic and international sales and field support offices, the company supplies 50/60-400Hz power conversion, pre-conditioned air and other power generation systems to the global aviation market.

Cavotec Middle East

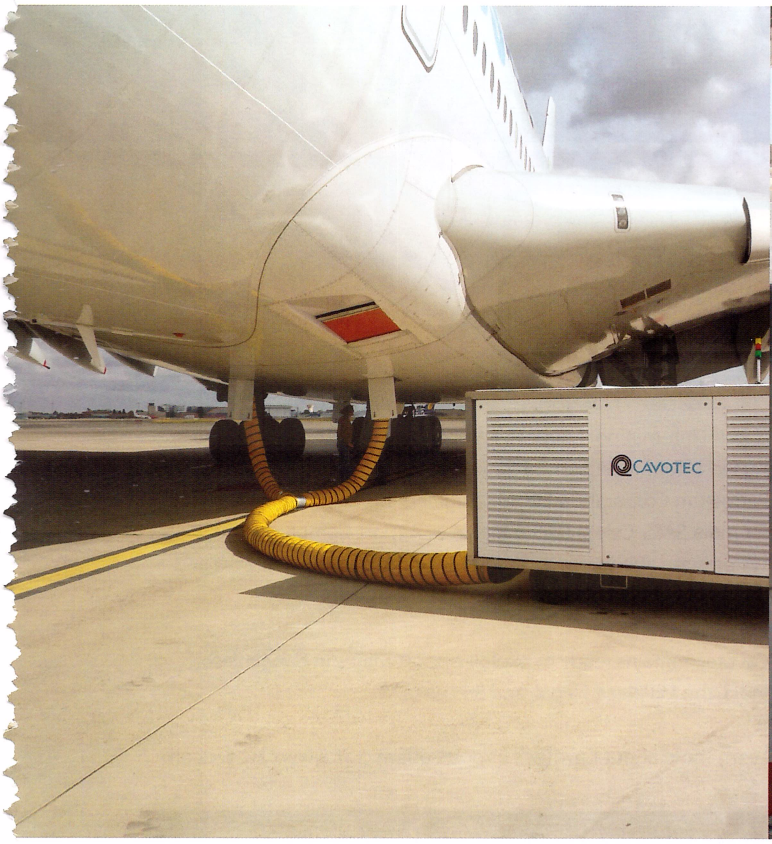
Since its establishment in 1993, Cavotec Middle East (CME), the Group's UAE-based subsidiary, has worked on a large number of major projects across the region. Cavotec systems – including PCAir, 400Hz converters and 400Hz cable coils, mobile ACU/GPUs, pop-up and hatch pit systems and refuelling – serve airports in Abu Dhabi, Bahrain, Dubai, India, Jordan, Kuwait, Oman, KSA and Qatar.

Cavotec's regional headquarters are located in Dubai, with branch offices in Abu Dhabi, Doha and Bahrain.

In close co-ordination with customers, suppliers and other stakeholders, Cavotec has focused on product research and design thereby supporting customers' efforts to improve operational efficiency and reduce environmental impact.

systems with under floor cable coilers for Cairo International Airport's Terminal 2 renovation project, fuel hydrant pits for King Khalid International Airport in Saudi Arabia and fuel hydrant pits and access covers for Ataturk International Airport in Turkey.

Cavotec is also currently fulfilling the testing and commissioning of Concourse 4 and Expo remote Stand projects at Dubai International Airport. These orders include large number of Super Cool DX PCAir units, 400Hz frequency converters and technical pit systems for PCAir and 400Hz power.



Cavotec has carried out several major projects in the region. The Group's fuelling systems complement its already strong presence at airports in areas such as hydrant pits, isolation valve pits, truck loading skids and tank floating suction units. Interest in metering skids has increased recently, which complements Cavotec's truck loading arms.

Recent orders in the Middle East

Cavotec continues to register a great deal of activity in the Middle East, with new orders for the Group's Airports market unit in the UAE, Oman, Egypt, Saudi Arabia and Turkey recently.

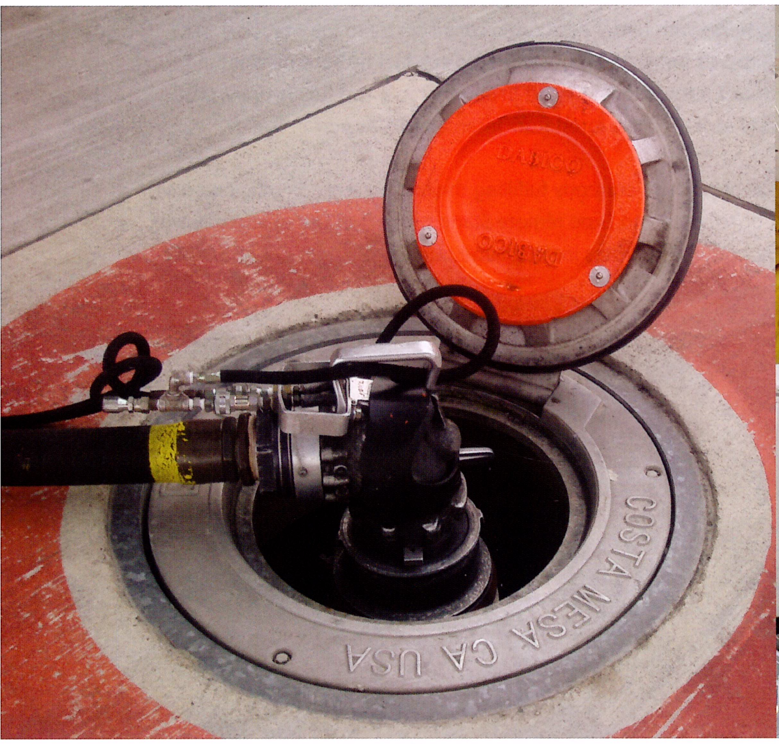
Cavotec has been selected to supply its DX-Boost PCA units and pop-up pit systems for Oman Air hangars at Muscat and Salalah airports. The Group is also supplying a turnkey project to supply DX-Boost PCA System, 400Hz Converter and Pop-Up Pits System to Presidential Flight Hangar in Abu Dhabi, UAE.

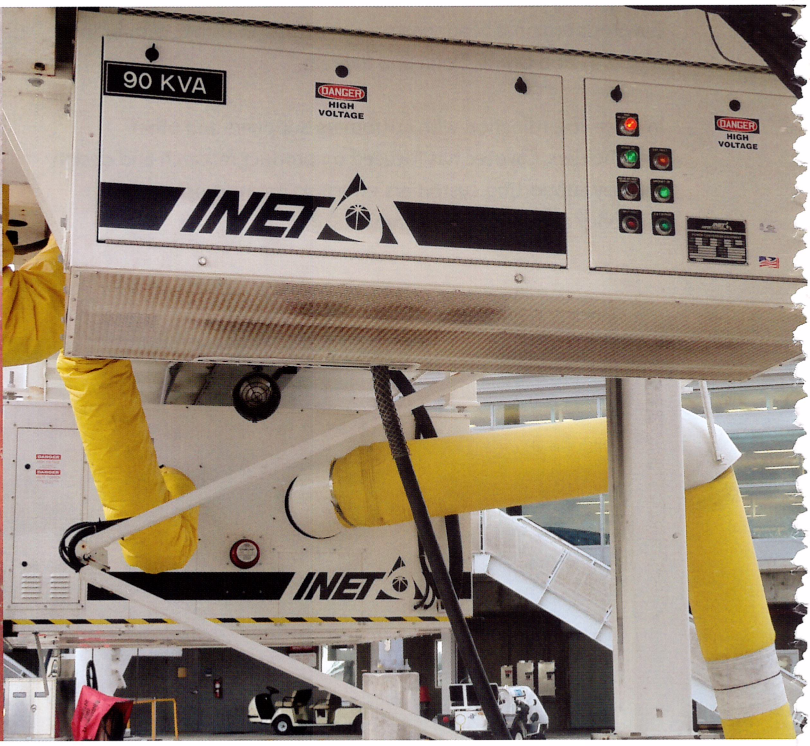
Cavotec is also supplying 400Hz Pits System to Midfield Terminal Project in Abu Dhabi and 400Hz electrical converters and pit

The Group has already supplied pop-up pit systems to New Doha International Airport in Qatar, and a fuel leak detection system for Senegal Airport. It has also supplied one hand lift vault access covers for a fuel hydrant system at Abu Dhabi International Airport for various projects including its Midfield Terminal development.

Cavotec has already supplied, installed and commissioned in-ground utility Pits and PCA units for A380 hangars at the Emirates Engineering Centre at Dubai International Airport. Cavotec PCA systems cool all types of aircraft, including Code-F A380 super-jumbos.

Cavotec equipment was previously selected by the Emirates Engineering Centre to provide utility services to the Emirates fleet. Cavotec also manufactured the world's first subfreezing PCA system to meets IATA's Airport Handling Manual (AHM) 997 specifications, now operational in Bahrain International Airport. Sub-freezing PCA units are compatible with all aircraft currently in service.





Cavotec's innovative pop-up system serves Dubai International Airport's Concourse A the dedicated terminal for Emirates' growing fleet of A380s, Concourse B, and Concourse C.

Cavotec Middle East's facility in Dubai has 4,525 sq. office space and a warehousing facility with workshops staffed by fully trained engineers and technical experts who support customers across the region. Cavotec also offers installation services as part of its system integration function – a unique offering in the region.

Cavotec's growing presence in the Indian subcontinent
Cavotec is steadily growing its presence across the Indian subcontinent, where the Group has recently won a number of important orders. The number of projects currently being undertaken by the Group underlines the increasing importance and market potential of this region to Cavotec.

Cavotec's Fuel Hydrant Pits, Vault Access Covers are Operational at International Terminal (T2) at Mumbai International Airport. Some other operational equipment includes its Vault Access Covers installed at Terminal 3 Delhi International Airport, Fuel Hydrant Pits at Cargo Apron Terminal 2 Delhi International Airport, and Vault Access Covers at Bangalore's Kempegowda International Airport.

Cavotec successfully commissioned DX Boost PCA units, 400Hz Converters, Pop Up pits at Air India's state of art MRO Hangar Facility in Nagpur. Besides this a number of Cavotec's prefabricated fuel pit systems are installed at two major airbases in India. Cavotec has recently secured three major orders for fuel systems one at another major Air force station in north India, and other commercial airports namely Cochin and Gwalior airports.

In addition to Mumbai International Airport and Delhi International Airport, some of Cavotec's key customers in India include Rajiv Gandhi International Airport, Kempegowda International Airport, Larsen & Toubro, Indian Oil Tanking, IndianOil Sky tanking, Bharat Petroleum Corporation Ltd, MP. Engineering, Bridge and Roof Co., Air India SATS, Celebi NAS & Maldives Airport Company Ltd. Cavotec systems are also in use at Shah Amanat International Airport and Osmani International Airport in Bangladesh.

Cavotec remains ready to exploit opportunities in Bangladesh, India, the Maldives, Nepal, and Sri Lanka.

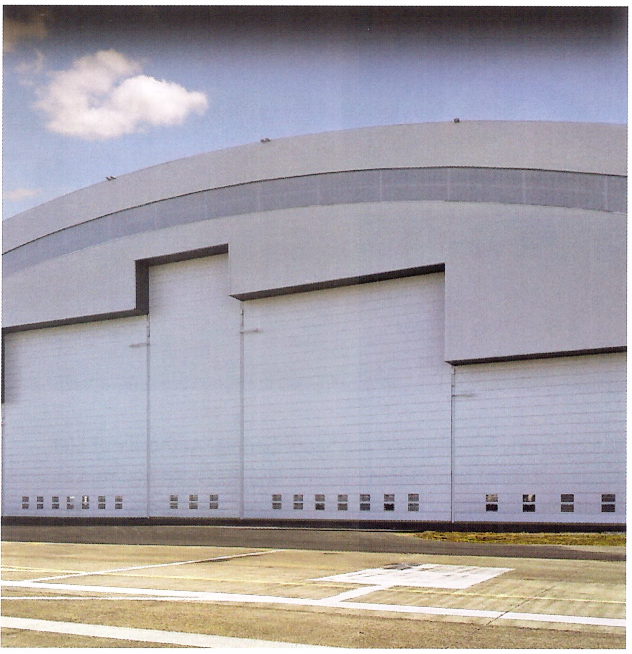
Learn more about Cavotec's airports offering at www.cavotec.com

Cavotec Group profile

Cavotec is a global engineering group that enables industries worldwide to improve productivity, safety and sustainability. We manufacture innovative power transmission, distribution and control technologies that form the link between fixed and mobile equipment in the Ports & Maritime, Airports, Mining & Tunnelling and General Industry sectors.

CHAMPIONDOOR®

Championing hangar doors for aircrafts



PANAVIATIC

Helicopter Hangar
Door size: 27x9m
Finland

Champion Door is a family owned company located in Finland and it began operations back in 1974. Champion Door makes very competitive fabric fold-up hangar doors for aircraft hangar installations and all large doorways – in all sizes from military planes to jumbo jets. Door solutions with elevating support posts are the best choice for extra wide and extra high doorways up to A380 aircrafts. Doors are always tailored to the customer's needs.

Champion Door has clients spread all around the world. Its customers are airports, airlines, airplane manufacturers and maintenance industries. It's lightweight and durability remain its greatest advantages. Also they do not need extra heavy support structures such as many other hoist-up fabric hangar doors in the market. This helps significantly reduce the hangar construction costs. Door model NK4 Warm Door is the only one product in the market with additional thermal insulation, which will help to keep down the costs arising from the hangar heating and cooling. Champion Door is a reliable choice for all climatic conditions: It could be used in extremely cold Arctic areas to places with scorching heat climate. Champion Door makes sure that its products can endure reliable airport usage.

Shaping the future of Line Maintenance and Support Services in Saudi Airports

Sharklets - hunting down fuel bu
AIRBUS A320
A400M

The aviation sector has boomed over the past two decades and has become an integral part of the business world in the Kingdom of Saudi Arabia. KSA airports currently serve over 100 airlines and receive well over 300,000 flights annually. Notably, KAIA is served by almost 100 airlines and handles over 55,000 scheduled flights annually.

The development of the airports technical support services has lagged behind the increase necessary to support the operations of these airlines. Subsequently, this has become a major challenge for the operators into the Kingdom.

The Attar Group recognized the essential need to bridge the gap for technical support services. With over four decades in the travel and aviation business, the company keenly understood the needs and concerns of clients. First Premium Support Services was formed in response to those needs. With the goal to provide our clients with the highest quality technical support services, we strive to meet the needs of the market.

The company has acquired the Saudi General Authority of Civil Aviation (GACA) approval to perform line and light maintenance on aircraft and is in the process of obtaining more approvals from GCC civil aviation authorities as well as the European Aviation Safety Agency (EASA).

FPSS provides line maintenance and airport logistics services as well as providing maintenance equipment and office facilities lease to operators.

The company has selectively employed qualified technical staff with line maintenance and inspection experience and invested in approved tooling and GSE and a dedicated MRO software solution for maintenance planning and technical records. It provides transit, daily, weekly, and A checks. Additionally, it provides lease of GSE and tooling required for aircraft maintenance. Customer airlines enjoy a 24/7 support line to ensure all client needs are met.

First Premium is a customer-focused service provider that makes it the right choice.

NEXUS –A leader in Flight Operations Services

NEXUS Flight Operations Services is the very first and only licensed company in the Kingdom of Saudi Arabia, India, Rwanda, China and Monaco to set up independent Flight Operations Services.

The license was provided by General Authorities of Civil Aviation to NEXUS, in recognition of its technical capabilities and business vision. The aviation background of its team comes from its varied experience in an array of diverse sectors within the aviation industry including airlines, private, corporate, government and authorities, MROs, and aircraft manufactures.

The company aims to provide its customers with superior quality safe aviation services at any destinations around the globe. It also looks to provide value for its customers by timely delivery of its services, at competitive prices, continuously innovating to find the means of making available to its customers the best technologies and service methodologies. The company also aims to build the NEXUS brand to be touted synonymous to highest quality services with a worldwide reach.

Establishing new benchmarks for Flight Operations Center services worldwide, with its quality of services and state of the art technology is yet another aim the company is looking to achieve.

Services -NEXUS Flight Operations Services offers the following services:

- Crew schedule and planning
- Flight dispatch
- Trip planning
- Aircraft scheduling & planning
- Crew Support
- Fuel Management
- Global concierge
- Aircraft dispatch training
- Security
- Maintenance management
- Personal global support
- Aircraft brokering
- Safety & quality management

Systems and Infrastructure:
NEXUS Airlines Information Management System is the backbone of it is global operations:

NEXUS can access system & service customers from multiple locations at any given point in time. Remote web-server system with a secure hosting out of Miami Florida, US, NEXUS has setup two parallel infrastructures (Jeddah & Bahrain) which complement each other, to ensure 100% back-up.

Process and Policies:
NEXUS has established fully certified processes and policies that ensure that it can meet the requirements of its customers.

Certifications:
NEXUS has achieved the distinction of being the only company to be fully certified by GACA to offer flight operations services and flight support services in the Kingdom of Saudi Arabia. NEXUS has also acquired certifications and affiliations from various other agencies to give the best support to its clients.

IBAC/IS-BAO Auditor: International Business Aviation Council (IBAC) accredits NEXUS as an audit organization according to the IS-BAO. IBAC recognizes NEXUS as an Aviation Support Service Organization for having demonstrated knowledge of the IS-BAO standards and are in the business of providing services and products to business aircraft operators.

ISO 9001:2008: specifies requirements for a quality management system where an organization needs to demonstrate its ability to consistently provide product that meets customer and applicable statutory and regulatory requirements, and aims to enhance customer satisfaction through the effective application of the system, including processes for continual improvement of the system.

Sharjah International Airport– UAE's road to its success map

Sharjah made aviation history in 1932, when the first flight landed at the Al Mahatta runway. Since then, Sharjah International Airport, through a series of path breaking initiatives, has become a world class modern international airport.

Sharjah International Airport has an open sky policy, which allows airline traffic from all over the world hassle-free access to the airport. The Airport has the newest and one of the longest runways (4060 meters) in the region, (which was opened in 2014) with Cat II capabilities), this enables all aircraft, up to the A380, to land and take off with full load capacity during all weather conditions. The airport offers the most competitive landing and handling rates in the region making it popular with both large and small operators.

Furthermore, SIA has also emerged as an important air cargo hub for many of the world's major carriers. Strategically located, SIA is close to Sharjah city and within 20 minutes driving distance to Dubai and the other northern emirates. SIA provides access to the main ports of the Gulf with direct road links to both the seaports of Sharjah.

SIA also plays a significant role in the Sharjah economy and has been instrumental in developing the emirate as a centre of trade and commerce. The airport has established a reputation for providing quality services and a competitive value proposition that has continued to attract a growing number of passengers, as well as airline and cargo shipment clients, each year.

Sharjah Airport Authority (SAA) is committed to manage Sharjah International Airport (SIA) in a highly professional manner that seeks to achieve a high level of safety and customer satisfaction in the delivery of all its service products through the application of continuous improvement programmes and the implementation of a formal Integrated Management System (IMS).

Environment Initiatives

Sharjah International Airport is committed to maintain high environmental standards to ensure that the Carbon footprint due to its operations are maintained at a minimal level and to ensure an environmental friendly airport by itself. This includes minimizing pollution, using energy and other resources efficiently, recycling and reusing wherever possible, and continually improving its environmental performance.

SIA already has a well established environmental Management System which is certified ISO14001-2007. As the Importance of reducing green house Gas emission and requirement of a sustainable Operational model is increasing day by day, SIA is committed to ensure follow of environmental friendly operations through various initiatives.

SIA is also accredited with Airport Carbon Accreditation Programme, an internationally recognized accolade for mapping its carbon footprint and committing to reduce its carbon emissions by Airport Council International.

Saudia Aerospace Engineering Industries saei

SAEI – KSA's leading aviation technical solutions provider

Saudi Arabian Airlines Engineering and Maintenance centre, previously known as Technical Services Division (TSV), established in late 1959, is known today as Saudia Aerospace Engineering Industries (SAEI), a limited liability company (LLC). Officially registered in 2009, SAEI has its base at King Abdul-Aziz International Airport in Jeddah, Kingdom of Saudi Arabia.

SAEI today is the leading aviation technical solutions provider in the Kingdom of Saudi Arabia, the Gulf and Middle East regions backed by over 50 years of experience and more than 5,000 highly qualified and trained professional workforce, 92% of which are Saudi nationals. SAEI holds GACA, FAA, EASA and several other regional and international authorities' approvals.

SAEI offers an extensive array of integrated Maintenance, Repair and Overhaul (MRO) services to Civil and Military Aircraft owners and operators, both locally and abroad. SAEI services include Aircraft, Engine &Component Maintenance as well as Engineering, Manufacturing, GSE Maintenance, Supply Chain & Logistics and Technical Training.

By 2016, SAEI will establish its new facility which would be the largest in the Middle East, capable of accommodating the most famous aircraft in the world today. It will also include a test cell that can handle up to 150,000lb engine thrust.

Safi AIRWAYS
خطوط هوائی صافی
The International Airline of Afghanistan

Safi Airways was founded in the year 2006 and established itself as Afghanistan's privately owned international airline. Owned by Safi Group of companies, a diversified conglomerate based in Dubai, United Arab Emirates, Safi bridges the market gap for a full service and safe carrier providing quality service for travelers to and from Afghanistan. The airline offers the highest international safety and service standards.

As the first Afghan carrier to operate in compliance with EASA (European Aviation Safety Agency) requirements, Safi was the first Afghan carrier certified as complying with the strict IOSA (IATA Operational Safety Audit). The airline is a United Nations (UN) approved carrier operating to and from Afghanistan.

The airliner is looking to expand its route network in an effort to place itself on the global aviation map. Now operating international flights from Kabul to Dubai, Delhi, Jeddah and Islamabad and operating between Kabul to Herat and Mazari Sharif on the domestic network, the airline is in the process of operating additional international and domestic destinations in 2016.The airline has decided not to launch long-haul flights in the near term and will instead focus on Middle East and former Soviet Union countries within three to three and half hours flying time from Kabul. Beginning flights to places like Lebanon, Kuwait, Iran, Uzbekistan, Kazakhstan and more cities in India are all on the cards.
Safi Airways which is currently after by the country ban of Afghanistan by the EU to fly to European cities is working with authorities to get access into Europe. They are also looking to partner with airlines flying to popular destinations through interlines and code shares.

Safi Airways currently operates a mixed fleet of modern Boeing and Airbus aircraft. It's employees are professionally trained and have gone the extra mile in building Safi Airways as a force to be reckoned with today, with the limitations and obstacles faced in day-to-day operations.

The airline currently operates a fleet of four aircraft; two Airbus A319s, one A320 and one Boeing 767. The Airbus aircraft are equipped to offer the very best in-flight comfort and style. The aircraft are environmentally-friendly and provide the highest degree of operational flexibility along with passenger comfort. Safi Airways will aggressively expand in the next three years in a move to fend off competition from international airlines. The airline is looking to order up to 20 narrow-body aircraft and will need at least 10 within two to three years.

The airline is also looking to expand its current loyalty program into a frequent flyer program and is looking to partner with other airlines so that the passengers can get more benefits for their travels.

Safi Airways has come a long way in establishing its mark in the aviation industry of Afghanistan. It has not been an easy task, taking into consideration what Afghanistan has gone through in recent decades. Safi Airways has been resilient and made good progress in the last eight years in building a reputable airline and infrastructure.

30 years on, Emirates still says **'Hello tomorrow'**

On a sultry morning on October 25th, 30 years ago, a plane left Dubai for Karachi, carrying royal dignitaries and VIPs from across the UAE and Emirates airline was born. Three planes bearing the first insignia of the young airline took flight that day — the others heading for Mumbai and Delhi and the rest, as they say is history. President of Dubai Civil Aviation and Chairman Shaikh Ahmad Bin Saeed Al Maktoum and the founding CEO of Emirates and the executive vice-chairman of The Emirates Group Briton Sir Maurice Flanagan had been given two planes and $10m to get the airline off the ground – a figure they would now spend in a split second.

No airline has grown at a faster pace in aviation history like Emirates. In 30 years, Emirates Airline has covered an astonishing milestone. It has not only become one of the largest commercial air carriers in the world but has dramatically influenced the entire global industry. Today, the airline carries about 50 million passengers annually, with a fleet of more than 230 aircraft. Its 140 destinations in more than 80 countries on six continents are continually expanding. It employs a workforce of 75,000 people representing more than 160 nationalities.

Emirates' humongous growth has been illustrated by its multiple record-breaking plane orders. It has the world's largest fleets of Airbus' double-decker jet, the A380, (for which it also has a dedicated concourse at its terminal at Dubai International Airport) and Boeing 777 aircraft, and has at times been a lifesaver for both manufacturers, placing multi-billion dollar orders when no one else was buying.

A decade into the business, Emirates was flying to 34 locations in the Middle East, Asia and Europe. It entered the African market, with flights into Johannesburg, Nairobi and Kenya. The continent later became one of its greatest opportunities. Capacity soared a whopping 26 percent in just 12 months in 1998, even before the first of 17 new generation A330-200s were delivered.

The same year also witnessed Emirates order seven A380s from

Airbus at the Farnborough Air Show. It also booked another six B777-300s. The year 2000 saw government announcing a new $600mn terminal to be built at Dubai International dedicated exclusively to Emirates, with a capacity for 20 million passengers a year. Its first phase opened in October 2008. While the rest of the industry was struggling to comprehend the sudden change in the global business following the September 11, 2001, attacks in the US, Emirates made a surprise $15bn order for 15 A380s, eight A340-600s, three A330s and 25 B777s. In 2001, Sheikh Mohammed insisted air travel would double in the next 15 years, despite difficulties at the time.

"Even today we need larger aircraft, let alone in five years when our first A380 leaves the runway at Dubai," he was quoted by media. He was indeed a shrewd business man as Emirates' passenger figures rose 18.3 percent to 6.8 million in 2001, while global passenger levels fell 4 percent.

More surprises were in the offing as Emirates ordered for another 71 aircraft worth a total $19bn, during the 2003 Paris Air Show. That was followed up a year later with four B777-300ERs and then, in 2005, an additional 42 B777s in a deal worth $9.7bn, the largest Boeing 777 order in history. The aviation industry was by now, accustomed to Emirate's massive growth. It placed another $3.3bn deal with Boeing in 2006, followed by contracts for 120 A350s, 11 A380s and 12 Boeing 777-330ERs, worth an estimated $34.9bn the following year.

The expansion continued and today, Emirates' average fleet age of 75 months is half the industry average of 140 months. The airline has advocated for even bigger planes, although they could be some time off with other airlines still preferring slimmer models and the A380 struggling to find buyers other than Emirates.

As Emirates continues to foray into unseen territories and uncapped regions, it announced that it would launch the world's longest, non-stop route — 17 hours and 35 minutes — between Dubai and Panama City in Central America, from February 1, 2016.

As one of the airliner offering the best of inflight entertainment, Emirates was also the first airline to install TV screens on the back of all seats, in all classes, in 1992, to providing the first in-flight fax service in 1994 and email and SMS services in 2013. It currently shells out $20m annually adding WiFi across its fleet, with more than 1 million passengers expected to log on during a flight this year.
Emirates added fresh impetus to the aviation profession, with about 400,000 people applying for cabin crew roles each year and about 350 new flight deck crew joining the fleet in 2014-15. The Emirates Flight Training Centre opened in 1995 and the airline now also runs training programmes in Australia and the US.

Within Dubai, the aviation sector contributed a total of $26.7bn to the economy in 2013, according to an Oxford Economics analysis, including $10.2bn in tourism revenues. The figure was equivalent to 26.7 percent of the emirate's gross domestic product (GDP) during the same year and supported 416,500 jobs, or 21 percent of the emirate's total employment.

The report, commissioned by Emirates Group, found that for every $100 of activity in the Dubai aviation sector, a further $72 of additional value was created in other areas of the economy, as a result of supply chain linkages and employee spending. For every 100 direct jobs in the industry, another 116 were created, in addition to the estimated 157,000 jobs in tourism. The GDP contribution is expected to grow to 37.5 percent by 2020 and 44.7 percent by 2030, "provided that capacity continues to expand to meet potential".

Emirates SkyCargo is now the world's largest international cargo airline in terms of freight tonne-kilometres flown (FTKM). It carried 2.4 million tonnes of cargo during the last financial year, contributing 15 percent of Emirates' transport revenue.

The airline's growth has been synonymous with the expansion of Dubai International Airport, which was inaugurated in 1960 by Sheikh Rashid Bin Saeed Al Maktoum, the then-ruler of Dubai. The airport now has three terminals (one of which is dedicated to low-cost carrier flydubai and another to all foreign carriers).

From its humble beginnings 30 years ago, Emirates has proved that for the airline even the sky is no limit.

Istanbul to get its third airport soon

Three public and three foreign-financed banks will provide 4.5 billion euros to a joint venture involving five Turkish construction companies that will construct Istanbul's third airport. The signing ceremony for the financing of the first phase of the airport, which is expected, be the world's largest in terms of passenger capacity, was held in Istanbul during the last quarter of 2015. President Recep Tayyip Erdo□an and Prime Minister Ahmet Davuto□lu too were present.

Erdo□an emphasized that the project will be the beginning of a new era not only for the banking and construction sectors, but also for the Turkish civil aviation sector. "After the completion of all stages of the project, Turkey, especially Istanbul, will become a global hub in world air traffic," Erdo□an said.

Stressing that the first phase of its construction would result in the partial opening during the first quarter of 2018, Erdo□an noted, "The project will provide employment for approximately 80,000 people annually during the construction period. This figure will increase to 120,000 when the airport becomes fully operational."

Erdo□an underlined that the new airport would be an example to the world in terms of its impact on the environment. "Generating its own energy, this airport is designed to be eco-friendly and disabled-friendly," he said.

The IGA Havalimanı □□letmesi A.□. consortium, which won a tender held in May 2013 to build Istanbul's new airport, signed an agreement with six banks, including state-owned Halkbank, Ziraat Bankası and VakıfBank as well as the foreign-financed banks DenizBank, Garanti Bankası and Finansbank. The consortium includes Turkish construction companies Cengiz, Mapa, Limak, Kolin and Kalyon. According to the agreement, the loan maturity date will be in 16 years. Moreover, 3.5 billion euros belong to state-owned banks, while the rest are provided by private banks.

The total investment cost of the project is 10.2 billion euros, which is the highest investment amount Turkey has ever spent in this area. According to the IGA website, the airport will contribute 22.2 billion euros, in addition to value-added taxes, over 25 years to the state. The third airport, which is being built under the build-operate-transfer model, will be managed by the IGA for 25 years.

The total budget of the project's first phase is about 6 billion euros, and 25 percent of this budget will be financed by the consortium's equity capital. The four phases of the project will be financed by bank credits totaling 80 percent and equity capital totaling 20 percent. Moreover, it is not expected to be a burden on the Treasury.

The airport is planned to serve an average of 200 million people annually when all four phases become operational. Currently, a total of 8,000 people are employed on the project; however, when the construction work reaches the most intensive level, it will offer jobs to a total of 100,000 people. Also, there are 2,500 trucks and heavy equipment machines deployed at the site. The airport will have 165 passenger jetways, four terminals connected with a railway system, three maintenance buildings, eight air traffic control towers, six runways, 16 taxiways, a 6.5 million-square-meter airport hangar with a capacity of 500 airplanes, an approximately 70,000 vehicle capacity parking area – touted as the largest airport parking lot in Europe – a clinic, fire department, hotels, a convention center and recycling and waste disposal plants. The airport will also host 150 airlines. The airport will be connected to the Istanbul metro, and multi-lane highways will be built to facilitate access. The area where the airport is being built was chosen after the ecological balance, wind data and the natural and artificial obstacles of the region were taken into consideration.

New metro tender to be held in 2016

A tender will be held for a new metro line from the third airport to Gayrettepe in the first quarter of next year, which is aimed to be completed when the first phase of the airport becomes operational. The airport will also be connected to the Asian side in May 2016 when Istanbul's third bridge with linking roads is completed. "Turkey will be in the center of the linking roads, not only connecting the European and Asian sides, but also connecting the European and Asian continents along with Beijing and London," Davuto□lu said.

In 2014, Istanbul Atatürk Airport served 56.7 million passengers, while Sabiha Gökçen Airport served 23.5 million passengers. Davuto□lu stressed that since Istanbul's two airports operate at 90 percent of their capacity, it will become impossible to up their demand soon, which is a proof of the need of a new airport in the city.

Operations begin at Salalah International Airport

Operations and air traffic have been moved from Salalah's old airport, which opened in 1977. The Salalah International Airport project included the construction of a passenger terminal spanning 65,000sqm, which will accommodate 2 million passengers per annum initially, and a 4km long and 75m wide main runway, which can aircraft as large as Airbus' newest model, the A380. The airport also features air navigation and auto landing devices as per international standards and regulations.

The project includes a 57 metre tall control tower; 27 new buildings, the most important of which is the air traffic control building; an information systems centre; and, a luggage-handling unit at the passenger terminal, which includes three conveyors for transferring passengers' luggage boarding domestic and international flights.

Dr. Mohammed bin Nasser al-Za'abi, chairman of the country's Public Authority for Civil Aviation said that the new airport is one of the landmarks in Dhofar governorate.

"It is a valuable addition to the economic and tourism development projects carried out all over the Sultanate," al-Za'abi said.

"Salalah International Airport is provided with the latest facilities and equipment. It includes 30 counters and 10 check out gates," he added.

The airport is designed to provide services that include retail shops, restaurants and other services that meet the needs of passengers from their arrival to their boarding.

The airport's premises boast 29 lifts, 13 escalators and 8 tubes for passengers to ascend to the planes. It also includes a VIP lounge, in addition to car parking area that can accommodate 2200 vehicles.

The official opening for the airport is scheduled for November 2015, in order to coincide with the Sultanate's celebrations of the 45th National Day, state newswire Oman News Agency reported.

Alcatel-Lucent's LTE technology drives European Aviation Network

Alcatel-Lucent, a leading IP networking, ultra-broadband access and cloud technology specialist, has signed a contract with Deutsche Telekom to deliver the world's first LTE ground network which communicates with airplanes and complements satellite services from Inmarsat, in order to meet rapidly evolving demand for broadband data connectivity on European flights.

The European Aviation Network (EAN) will consist of an LTE ground network component, provided by Alcatel-Lucent – using its specially adapted radios and IP Mobile Core – combined with a satellite network component.

Passengers will be able to use their Wi-Fi enabled personal mobile devices to enjoy mobile data access using the seamless transition between the LTE ground network and the satellite network. The network will also open up opportunities for airlines to offer innovative consumer-led data services to passengers.

Deutsche Telekom and Alcatel-Lucent have previously conducted test flights of the LTE-based network and are working with Inmarsat, a leading global satellite communications provider, which will operate LTE in the S-band. Deutsche Telekom and Inmarsat have recently announced a strategic partnership for the European Aviation Network to develop and commercially roll-out the network in Europe with a test flight program planned for the hybrid LTE and satellite network in 2017.

Alcatel-Lucent will also provide network operations and field services for the LTE ground network to Deutsche Telekom. The agreement with Deutsche Telekom highlights how Alcatel-Lucent is working with service providers to deliver breakthrough communications innovations to new markets to satisfy the growing demand for always-on connectivity.

Wilhelm Dresselhaus, CEO of Alcatel-Lucent Germany and Head of the Deutsche Telekom sales account at Alcatel-Lucent, said: "For years, flying has been a communications black-out leaving both business and personal travelers alike feeling out of touch when in the air. We are proud to be an integral technology provider for Deutsche Telekom's LTE-based ground network effort by adapting our LTE RAN solution to the Inmarsat S-band spectrum. Together, we are able to provide travelers in Europe with high-speed data connectivity in the air."•

Dubai Airport readies for contactless departures

Immigration counters will soon be relics of the past as Dubai International airport is pressing on with plans for contactless departures as early as next year. And since sky is not the limit when it comes to passenger comfort, Emirates passengers could get the immigration facility on board before landing at Dubai airport.

"We are coordinating with other partners and the contactless process will be launched in the first quarter of 2016," Major General Obaid Muhair bin Surour, Deputy Director of the General Directorate of Residency and Foreigners Affairs-Dubai said. In the first phase, departure will be without immigration counters and in the second phase it will be implemented for arrivals, Maj-Gen Surour explained.

He also talked about the scenario where passengers can complete the immigration or smart gate process on board Emirates planes before landing at Dubai International airport. The combination of advanced passenger information, biometrics, and IRIS on the move technology (IOM) will help the seamless departures and arrivals of passengers at the airport within seconds, he explained.

Emaratech - the leading online, smart and technology solutions company in the Arab region - is behind all smart gates in Dubai. Earlier this year, Emaratech showcased IOM technology in Dubai. Its officials maintained, "We are currently working closely with our strategic partner, the General Directorate for Residency and Foreigners Affairs, to maximise the benefit of having IOM. We believe that IRIS on the move is the future of intelligent travelling."

Maj-Gen Surour noted that Dubai Airport has 125 e-gates and smart gates where departure and arrival is possible without stopping at immigration counters. Users of these gates require mandatory registration of their passport and national ID. Dubai's second airport, Al Maktoum International Aiport, does not have e-gates or smart gates at the moment. Maj-Gene Surour said the new airport will have them next year. Emaratech is a strategic partner in this upgrade, he added.

The smart gate is recognised as the most efficient and advanced around the world from a technical, operational and security point of view. The smart gate uses IRIS cameras to capture facial and eye biometrics of registered users. Passengers can speed through immigration in as little as 20 seconds. This means, three passengers will be able to proceed each minute using the smart Gate.

The smart gates are free to use by registered UAE citizens and residents. There are 20 registration stations throughout Dubai for travellers to register their biometrics for smart gate passes.

'Heathrow's noise footprint is smaller than ever'

Pilots are continuing to descend aircraft at quieter levels on arrival at according to the latest Fly Quiet League results.

Airlines trending reduced noise levels include British Airways' short-haul routes, which took the number one spot; followed by Aer Lingus; and Virgin Atlantic's Little Red routes; between April and June this year.

Among the biggest movers over the three-month period were Air India, moving up 20 places from 35th to 15th place; Lufthansa, who were up nine places to 16th position; and South African Airlines, up 18 to 26th position.

The table compared the top 50 airlines, according to the number of annual flights through the hub airport, across six different noise metrics. The airport operator said the use of the Continuous Descent Approach has resulted in more than 85% of aircraft adhering to this quieter flight procedure on arrival into the airport.

During this type of descent, pilots land at a steadier rate and avoid the traditional way to fly at low altitudes longer.
'More to do'

Matt Gorman, Heathrow's sustainability and environment director, said: "The Civil Aviation Authority recently released a report showing Heathrow's noise footprint is smaller than ever.
"But we know we have to do more to provide greater respites for our neighbours. "We will continue to engage directly with our airline partners to build on the trends we see today.
"We are pleased to see the great leaps forward made by some airlines in their use of Continuous Descent Approaches into the airport, while innovative noise-reduction tools like steeper approaches are being explored and employed by all our airlines."

Other results showed there were no early morning pre-4.30am flying restriction violations, compared to two in the last quarter.
Last year, Heathrow CEO John Holland-Kaye, wrote to airlines' executives asking them to improve on their scores, which has led to improvements including LOT Polish Airlines moving up from 60% to 99% adherence, and Austrian Airlines moving up from 63% to 90%.

Boeing joins hands with Etihad for sustainable fuel

ETIHAD
BOEING
Sky NRG
ETIHAD AIRWAYS
Sustainable Aviation BIOFUEL
1863
FLAMMA

American aircraft giant Boeing is working with Etihad Airways, the Abu Dhabi National Oil Company's Takreer, Total and the Masdar Institute of Science and Technology on a new initiative to produce environment-friendly aviation biofuel in Abu Dhabi, according to a senior Boeing official.

The project - first announced in January 2014 - will involve planting a highly salt-tolerant halophyte plant called salicornia bigelovii that yields an oil from which biofuel can be made.

Julie Ferger, Managing Director of Environment Strategy and Integration for Boeing Commercial airplanes said that the project involves the use of nutrient-rich water from local aquaculture projects to irrigate the salicornia fields. "The water has a lot of nutrients in it due to the waste that comes out of the aquaculture organisms," she said. "We're using that water to irrigate through to the salicornia fields.it grows the salicornia plants. You can harvest the salicornia plants and use the oils from the salicornia plants to create biofuels. That's the idea."

A test farm in Abu Dhabi will be completed in the next three or four months, after which "a small pilot programme" will begin. "We'll take a year to 18 months to run through a couple of harvest rotations and see what the opportunities are to scale that up," she said. "It's not a big demonstration project. You're looking at around an acre."

"It's really a technology testing area," she added. "We're looking at some of the technology pathways used to convert the oils into synthetic jet fuel down the road. It's going to take a little bit of time to get it up and going. We need to ensure that we can get the plants growing to scale and get the yields of the oil out of the plants to the point where we can get enough oils out to go ahead and make a significant quantity of jet fuel."
The project is just one of 19 biofuel projects that Boeing is involved in around the world, which the company hopes will significantly reduce the aviation industry's carbon footprint.

"We have 50 to 80 per cent lower life cycle emissions by using sustainable aviation biofuels," Felgar said. "The fuel is technically viable, and what it has proven over time is that it is actually a higher quality standard then Jet A [currently the most commonly used jet fuel]."

"If you put it in layman's terms, you can actually fly further on a gallon of biofuel than on regular Jet A," she added. In January 2014, Etihad conducted a 45-minute demonstration flight in a Boeing 777 powered - in part - by UAE-produced biofuel.

In 2011, the airline conducted the region's first biofuel flight by delivering a 777 from Boeing's manufacturing facilities in Washington to Abu Dhabi using a mixture of plant oil and petroleum-based jet fuel.

Baggage Handling market at USD 6.45 billion

According to the projections in Global Forecast to 2020 - Reportlinker Review, the market size of the baggage handling system market is estimated at USD 6.45 billion in 2015 and is projected to grow at a CAGR of 7.72%, to reach USD 9.36 billion by 2020 during the forecast period.

This report provides a comprehensive analysis of the baggage handling system market for the North America, Europe, Asia-Pacific, Middle East, Latin America, and Africa regions. This report segments the baggage handling system market on the basis of identification technology, service type, airport class, type, and efficiency. The two identification technologies considered in this report are barcode and RFID. The baggage handling system market is segmented, by service type, into assisted service bag check-in and self-service bag check-in. The BHS market is also segmented on the basis of airport class into class A, class B, and class C.

The market is segmented, by efficiency, into below 3000, 3000 to 6000, and above 6000.

The report also includes industry value chain, PEST analysis, market revenue, and Porters' Five Forces analysis for the baggage handling system market. The report also provides a general overview of the companies, products, services, financial analysis, and key developments of the major players in the industry. All percentage shares, splits, and breakdowns are determined using secondary sources and have been verified through primary sources. This report also concentrates upon various drivers and restraints that are currently influencing the market, the challenges that are obstructing of the market, and the opportunities that can promote the growth of the market.

The Asia-Pacific region is expected to exhibit the highest growth rate in the baggage handling system market, and is growing at a CAGR of 8.26% during the forecast period from 2015 to 2020. The RFID segment in identification technology is projected to exhibit a strong growth as well. The concept of self-service kiosks, which provide passengers with convenience and operational efficiency, is the current trend at major airports.

The self-service bag check-in segment is expected to register a CAGR of 12.07% during the given forecast period.

The report also offers a competitive landscape by analyzing the market share of key players in this market. The major players in the market include Siemens AG (Germany), Vanderlande Industries (Netherland), Daifuku Company Ltd (Japan), Pteris Global Limited (Singapore), Beumer Group (Germany), Grenzebach Maschinenbau GMBH (Germany), BCS Group (New Zealand), Logplan LLC (U.S.), G&S Airport Conveyor (U.S.), and Fives Group (France)

Comlux America poised to open widebody completion hangar

Comlux America, the US completions and service centre arm of the Comlux Group, is planning to induct the first green widebody airliner into its Indianapolis facility in early November, as the construction of a new hangar extension to accommodate twin-aisle aircraft nears completion.

The new building – on which Comlux broke ground in April 2015 – will expand the footprint of the VIP maintenance, repair and overhaul facility from 11,900m² (128,000ft²) to 14,600m². This will be "large enough to house aircraft up to an Airbus A340-600 or Boeing 747-800 size", says Comlux.

Its inaugural aircraft, an A330-200, was delivered to Indianapolis in July, and Comlux plans to hand the completed VVIP airliner to its unnamed customer in the fourth quarter of 2017. "We expect this aircraft will be the first of many widebodies for us," said company chief executive, Scott Meyer. "It is the beginning of the next generation of business for Comlux America."

Comlux is a relative newcomer to the VIP airliner completions market. It made its first foray into this niche sector in 2012, four years after its acquisition of Indianapolis Jet Center – an MRO facility for Bombardier Challenger-series business jets. To date, the company has outfitted nine VIP narrowbodies, with two more projects under way.

Comlux is now seeking to expand its MRO presence globally, Meyer said, to take advantage of its growing international customer base. "We are pursuing several prospects beyond our current footprint in the USA," he said. "We want to be closer and more supportive to our clients based in Asia, central Asia, eastern Europe and the Middle East."

Boeing launches digital MRO tool

Boeing has launched a new digital records management capability to its Maintenance Performance Toolbox that it said will enhance maintenance operations and reduce costs for airlines.
The records module will enable firms to manage scanned and digitally produced maintenance and flight records and eliminate the need for paper-based maintenance records.

According to Boeing, the module works with other toolbox applications to increase efficiencies related to both day-to-day airline maintenance operations and the management of leased aircraft.

Per Norén, vice-president of digital solutions at Boeing Digital Aviation, said: "Automation of the maintenance record keeping process is a new and essential component of our Maintenance Performance Toolbox and we are pleased to provide airlines with the foundation for establishing more efficient maintenance operations."

VOLGA-DNEPR Gulf commences Boeing 747 MRO contract with Eagle Express

Volga-Dnepr Gulf (VDG), which represents Volga-Dnepr Technics in the Middle East region, has signed a contract with Malaysian charter operator Eagle Express to provide maintenance services for the airline's Boeing 747-400 fleet.

Work under the contract will be carried out in Volga-Dnepr Gulf's modern hangar complex located in Sharjah, UAE, which was launched by Volga-Dnepr Group in April 2013. The contract covers maintenance services for A4-check, Out-Of-Phase Routine Tasks and AD/SB performance.

In July, Volga-Dnepr Gulf successfully conducted maintenance on the first Eagle Express Boeing 747-400 and work has subsequently been completed on a further two aircraft. Volga-Dnepr Gulf was authorized to undertake the work after the Department of Civil Aviation of Malaysia evaluated the company's hangar facilities in Sharjah Airport and granted approval for VDG to perform maintenance services.

Victor Sherin, Managing Director of Volga-Dnepr Gulf, said, "We are happy to start our cooperation with Eagle Express and ready to provide high quality services to meet all of the airline's requirements. Eagle Express is planning to expand its fleet and VDG has already started negotiations regarding a long-term contract for maintenance performance on its new aircraft. We are sure that the quality and efficiency of the services we deliver for Eagle Express will further enhance our position in Middle East MRO market and lead to new growth opportunities."

I am A Thousand Ways

Orna Plachinski
Supervisor Cargo Dangerous Goods and Quality Control

Sometimes tailor-made is just not tailor-made enough. Sometimes a very fast solution is needed very fast indeed. Sometimes the only possibility is someone who will make it possible. Sometimes it is good to remember that **We care for your cargo.**

We care for your cargo.

We care for your Cargo.

LuxairCARGO is the leading air freight handling agent at Luxembourg airport. LuxairCARGO caters for all categories of cargo and aircraft and has a capacity of 1,000,000 tons per year. It has developed a major distribution hub for high-tech goods, perishables, livestock, pharmaceuticals and consumer products. The facilities and handling processes are additionally designed to handle off-size, heavy, or high-value cargo. Being adjacent to major pan-European motorway networks enables goods to be delivered within one business day to the majority of the EU economic centers.

For any request please call **+352 2456 6001** or visit **www.luxaircargo.lu**

SH-60
SEAHAWK

Joined in a mutual commitment to success, Sikorsky Aircraft is proud of its ongoing association with the countries of the Middle East. Sikorsky has the capability to provide a total package of helicopters and support services to meet ever-expanding requirements.

SEAHAWK® Helicopters
— for maritime superiority.

BLACK HAWK Helicopters
— for military operations.

S-92® Helicopters
— the ultimate in safe VIP transport.

S-76® Helicopters
— the offshore oil mainstay.

M28 Twin Turboprop
— the best for short takeoff and landings.

Time and again, nations with expanding requirements turn to a single, exceptional provider for world-class products and support.

There are those who fly.
And those who fly Sikorsky.

Sikorsky
A United Technologies Company
